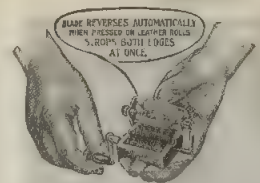
One in a cardboard box; weight per dozen 5½ lbs.

SAFETY RAZOR STROPPERS
DUBELEDGE



A small, compact, heavily nickel plated and easily operated stropper. The sharpening rollers are wound spirally with a strip of horse-hide, sharpening the blade with a diagonal stroke. Blade reverses automatically sharpening edges without removing the blade from the machine.

	Per Dozen
No. 4G—For Gillette blades	$49 50
No. 6DD—For Durham-Duplex blades	60 00
No. 5EG—For Ever Ready and Gem Junior blades	49 50

One in a cardboard box; wt. per dozen 4 lbs.

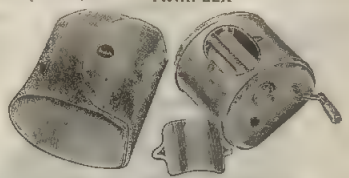
ZIG ZAG AUTOMATIC STROPPER

Stropper equipped for sharpening all standard safety razor blades. Highest grade of leather, suitable for this purpose, used. Metal handle, roughened grip. Cutting of strop impossible, as the slightest change of stroke reverses the blade holder. The curve in the strop gives a barber's stroke. Every stropper guaranteed.

	Per Doz.
No. 1ZZ—Length of strop, 14 in.	$49 50

One in a carton, half dozen in a display box; wt. per doz. 4 lbs.

TWINPLEX



FOR GILLETTE BLADES ONLY

Nickel plated case, 2¾x2¾x1⅛ in.; disappearing handle.

Quick and positive in action. Strops both edges at once, reverses itself and strops other side. The blade is easily inserted and released. The disappearing handle is a clever improvement which considerably reduces the size of the Twinplex.

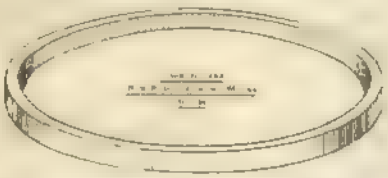
American Hammered Piston Rings



Individually cast and tested, of special grade close grained gray iron. Every ring is individually tested under the Brinnell system.

One Piece Rings

Easily installed and leakless, the American process of hammering assures a permanent and equal pressure against all points of the cylinder walls. Heat does not affect them, comes in a sealed moisture-proof container.

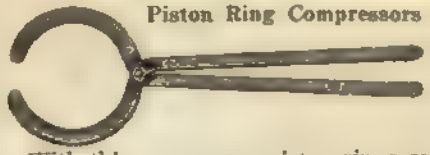
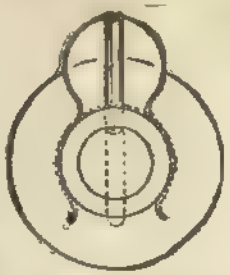
Piston Ring Compressors



With this compressor piston rings can be set in just a fraction of the time ordinarily consumed. A slight hand pressure on handles produces a leverage strong enough to compress even the new and stiff rings with very little effort. Finished in black enamel.

Each $0.65

Crank Ratchet Pins



On account of its unhandy location the crank ratchet pin on the Ford is replaced only with great difficulty. The Jiffy crank ratchet pin does not require riveting when in place, as the steel spring holds it firmly. It can be taken out or replaced in a moment.

Jiffy Crank Ratchet Pin, each.....$0.30

Milwaukee Timers

Accurately designed and assembled. All wearing parts are machine hardened, ground and polished, and fitted to the thousandth of an inch. The insulating ring, of finest Egyptian fibre, is carefully shrunk into place. Grooves are then machined out and the contacts carefully imbedded.

All operations are made with the greatest of care. Each part is tested for accuracy and fit. The finished timer is then tested electrically to determine its workmanship and ability.

Will fit all Ford cars up to and including 1921 models.

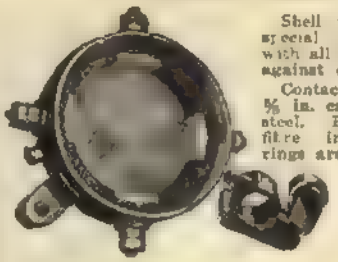
Milwaukee Timers . . each,	$2.10
Extra brushes .. . .each,	.75

Red Star Timers

The contact roller is made of case hardened steel and revolves on a case hardened steel sleeve. Both rollers are of case hardened metal. Timer shell is of stamped steel copper plated. For Ford cars, trucks and tractors.

Each $2.25

Goodrich Timers



Shell is made of special alloy metal with all parts treated against corrosion.

Contact roller is of ⅝ in. case hardened steel. High quality fibre inserts and rings are used.

Complete .....each..$2.00

J. & B. Timers

For all models of Ford cars. Is easily installed, as it is unnecessary to make any changes, due to the fact that it is made to fit in place where old timer is removed

Model T1 ... .each,	$1.65
Extra brushes . .. .each,	.50

Never-Fail Timer Units

NEVER-FAIL

A timer brush which operates successfully in pitted, worn shells. Gives constant contact—a fat, hot spark all the time. Doubles the life of a timer shell. All wearing parts of hardened steel. Fits any standard type shell.

Each $0.50

Ford Switch Keys

Fits coil switches on all models Ford car.

No. 5006 Each $0.05

K-W Ford Coil Units

This is the standard K-W Ford Coil Unit to fit in the regular metal coil boxes.

K-W Ford Coil Unit ....each, $2.75

Genuine K-W Contact Points

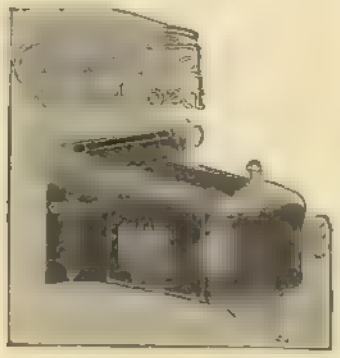
K-W Ford Coil Contact Points and Springs .....per pair, $0.35

K-W Sparkite Contact Points

Give a better spark at slow cranking speed, and a hotter spark at any speed. These points are of a new metal and are larger than the tungsten points.

K-W Sparkite Contact Points and Springs .....per pair, $0.50

Crawford Raincoats for Fords



An apron fastening underneath windshield and extending over hood to keep coil boxes from getting wet. Carried in place at all times ready to use, when not in use may be rolled up with long straps tucked in and held firmly by two snap buttons.

No. 510 Enamel drill $1.00

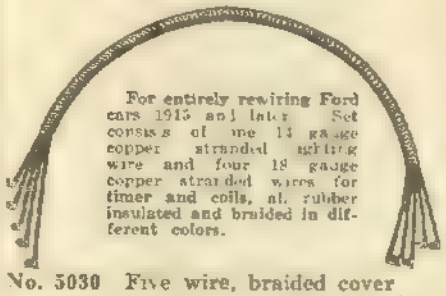
Six Wire Assemblies

This six wire assembly for Ford cars is made of No. 18 gauge copper wire covered with heavy cotton braiding and heavily insulated with the best rubber compound. Each wire has a different colored braid.

Assembly consists of six wires, to use on Ford cars with the self starter.

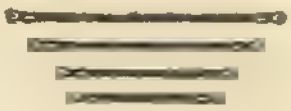
No. 5031 Six wire.....per set, $1.00

Five Wire Assemblies



No. 5030 Five wire, braided cover .....per set, $0.75

Spark Plug Wires



Made of high grade cable, complete with terminals ready for use.

Per set $0.50

Packed One Set in a Box

Goodrich Coil Locks

Goodrich Coil Locks are approved by underwriters for all types of Ford cars, including cars with self starter.

No. 302.....each, $8.00

Goodrich Ford Yale Lock

This lock adapted for all T models of Ford cars, and differs from other Yale locks in that screws which fasten the lock are safely covered when car is at standstill.

A carbon proof, two-piece spark plug with a quarter inch extension that brings the electrodes to their proper location.

Ford Special.....each, $1.25
Extra porcelains with bushings.....each, .75

AC Carbon Proof Spark Plugs

For Ford Cars

The carbon proof porcelain is provided with a number of ribs having saw tooth edges which attain a sufficient high degree of heat to burn away the carbon, thereby keeping the edges free from deposits and breaking up any possible short circuit.

No. 12CPT.. .....each, $1.00

Splitdorf Spark Plugs

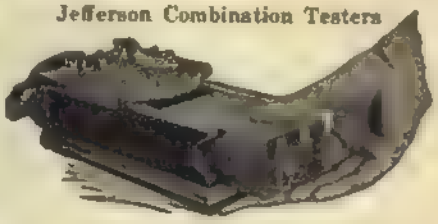
½ Inch Ford

The Plug with the Green Jacket. Imported mica of the highest grade known is used exclusively as insulation, and this enables them to withstand the breaking down effects of high-tension current.

Is the same as the Regular ½ inch, but has a longer body.

½ inch. .....each, $1.25

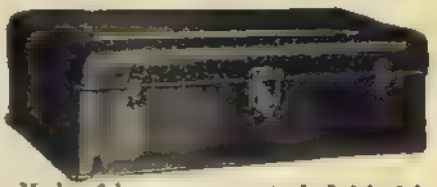
Jefferson Combination Testers



Tests the Ford coil unit under alternating current. Can also be used for testing automobile lamps and spark plugs. Equipped with extension cord and operates on any 100 to 120 volt A. C. lighting circuit.

No. 28 Tester complete.....$11.00

Tool Boxes for Ford Cars



Made of heavy gauge steel, finished in black japan, it has a lock and two suitcase catches. It is long enough to hold a pump and is a very desirable size.

No. 622 22x9x7¼ in.....each, $2.90

One in a Box

Long Life Battery Boxes for Fords

For all models of Ford cars that carry a battery. Fits outside the cradle in which battery is suspended, enveloping the cradle in such a way that it will take care of any irregularities of Ford apparatus. Allows approximately ¾ inch air space on all sides for proper ventilation, which is essential to the life of any battery of this type.

Terminal openings are so arranged that any make of battery can be used. Attaches to the Ford cradle in such a way that it can not be lost. The adaptability and ease in installation are big factors in its favor.

Constructed of heavy sheet steel, 20 gauge; nicely enameled and baked to withstand not only the battery acid, but also all weather conditions, mud, ice and road slush which splash upon it. The Ford battery thus protected maintains greater efficiency and will double or triple the life of the battery.

Each $3.50

Four in a Carton

Electric Head Lamps
Suitable for 1915-1920 Ford Cars

This lamp is adapted to recent models of Ford cars by the special one bracket support. It has a fixed reflector and is focused from the outside. The cord is attached before the parabola shaped and highly polished reflector is inserted, making it dust and rattle proof. Two coats of enamel are baked on the lamp body, which is drawn from a single piece of sheet steel. The bulbs are 15 c. p. Mazdas for 9 volt circuit. Furnished with double wiring only. Has 9 inch round door. Length 13 in.

No. 325 Black .....per pair, $7.50
No. 325BX For new model cars, with double bulb.....per pair, 8.00

Gas Head Lamps
Suitable for Ford Cars

This lamp is substantial in appearance and was designed for the smaller car and light truck. Has a strong penetrating light. Body is drawn from one piece of alloy coated steel with all parts solidly riveted and then given two coats of baked on enamel. Has bezel type reflector attached to door.

SINGLE BARREL TRAP GUNS

L. C. SMITH

SPECIALTY TRAP GRADE

Barrel—Nitro blued steel or Damascus steel, compensating ventilated top rib, automatic ejector, any bore desired, chambered for 2¾, 2⅞ or 3 in. shells.

Stock—Fine quality walnut, full or half pistol or straight grip to order, checkered grip and fore-end.
Frame—Beautifully engraved, hammerless.

SPECIALTY GRADE

The compensating ventilated top rib automatically adjusts itself for the 70 degrees difference between the barrel and rib during constant shooting and so cannot buckle the barrel. The sides of the rib are made parallel to insure quick and accurate sighting.

No. F2ST—12 gauge, 30, 32 or 34 in. barrel, w't 7⅛ to 8¼ lbs.★ .....each **$235.90**

EAGLE GRADE

The decoration, while not elaborate, is of a nature to give the style that classes it far above the usual. On the left lock plate appears a ring-necked pheasant in bold relief against a frosted back ground; and on the right a duck in full flight. The top and bottom of the frame are ornamented with scroll work of artistic design.
No. F3ET—12 gauge, 30, 32 or 34 in. barrel, w't 7⅛ to 8¼ lbs.★ .....each **$321.20**

CROWN GRADE

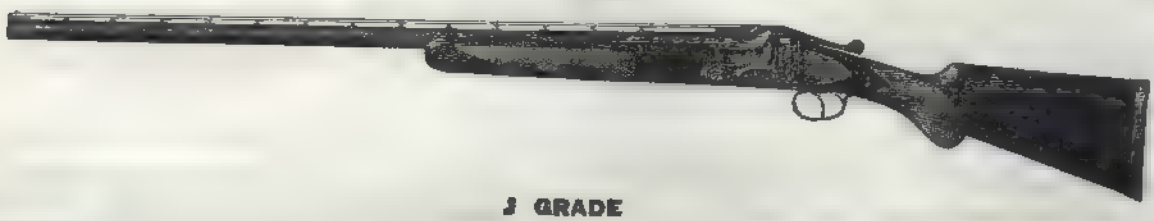
The detail of the gold inlay and engraving is delicate and pleasing to the most critical eye.
No. F4CT—12 gauge, 30, 32 or 34 in. barrel, w't 7⅛ to 8¼ lbs.★ .....each **$443.30**

MONOGRAM GRADE

The engraving, embodying scroll and relief work, is of the utmost distinctiveness both in design and execution.
The barrels are chosen of Monogram steel with a view to strength, service, proper balance and quick handling. The stock is from imported walnut, carefully finished, and is in keeping with the entire gun.

No. F5MT—12 gauge, 30, 32 or 34 in. barrel, w't 7⅛ to 8¼ lbs.★ .....each **$634.70**

FOX



J GRADE

Barrel—Highest grade Chromox Fluid steel; sliding ventilated top rib; automatic ejector.
Frame—Beautifully engraved; heavy tapered steel cross bolt; one-piece nickel steel hammer; Coil springs throughout.
Stock—Fine quality walnut, full or half pistol or straight grip to order, checkered grip and fore-end.

No. FJTE—12 gauge, 30 or 32 in. barrel, w't 7⅛ to 8¼ lbs.★ .....each **$264.50**

A wonderfully, close, even shooting gun with the highest quality of workmanship and finish throughout.

★ Items Marked Thus ★ Are Shipped From Factory Only.

Iver Johnson Double Barrel Hammerless

Shot Guns

Barrels—Special steel, browned, with top-bolt extension and re-enforced drop forged steel breech, finely matted flat-top rib; 30 in. left barrel full choke, right barrel modified choke bored, 32 in. both barrels full choke bored.

Stock—English black walnut, with pistol grip, carefully machined, shaped, checkered and hand finished, 14 inch with about 3 inch drop, genuine hard rubber butt plate.

Frame—Case hardened steel of high tensile strength, the design of the frame which is of the heavy breech type is such that the interior rear portion of the breech wall is re-enforced by a heavy vertical wall of metal, solid with the frame itself. This construction adds unusual strength to the frame at the point of greatest strain. Top snap action with new top-bolt barrel fastening, the bolt has a firm bearing on the entire area of the barrel extension, which, in itself, is a part of the solid steel forged breech of the barrels, and provides an unusually strong and substantial barrel fastening. Has coil mainspring incased within the solid wall of the sides of the frame and completely protected from friction and so mounted as to provide a uniformly strong, smooth and even action when in operation All working parts are drop forged, accurately machined.

No. 65—12 gauge, 30 or 32 in, barrel, weight about 7 lbs. .....each $53.00

NEST EGGS

OPAL

Heavy opal glass; exact size of a real chicken egg.

Per Gross

No. 0G—One gross in a carton. ... $10 20

Auto Fire Engine—11½x5½ in. x 5 in. Dealer No. chassis, blue disc wheels, extra 2 tiny fire or hand guns, extra strong spring

P3265—1 in box ... Each, $1.60

Coupe—11x4½ in., heavy enamel steel, blue body, gilt trim, black roof, nickeled metal fenders, gilt running boards and bumper, red disc wheels, rubber tires, extra wheel, drum head lamps, gilt trim, nickeled radiator, "Speed" signal in front and blue painted chauffeur, gilt steering wheel, green top rider, long action, each in box

P3275—1 in box ... Each, $1.65

Auto Hook and Ladder—18x5 in., white body red stripes, red disc wheels, rubber tires, Hitho fireman rubber covered front bumper "Hi Hi" nickeled radiator, nickeled headlight, when bumper strikes anything it automatically stops

P3266—1 in box ... Each, $1.75

*KEROSENE ENGINES

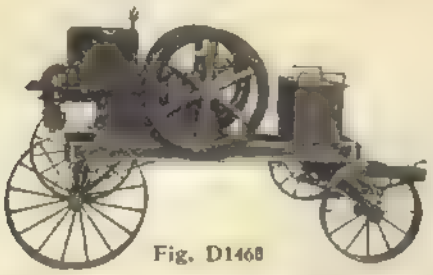

Fig. D1460

FULLER & JOHNSON, MODEL K, PORTABLE

Easy to Start

Consists of a Model K kerosene engine mounted on team truck, made entirely of steel. The seat serves as a battery box and also a tool box. Trucks are very rigid and strong, have solid steel axles, reinforced with I beams, strong circle fifth wheel, four braces to the rear axle.

Regular equipment consists of kerosene tank in base, plain pulley muffler, dry batteries, spark coil, switch, wrenches, crank, except on 12 h.p., cylinder oiler, grease cups, seat tool box, tongue, accessories and instructions.

Horsepower	5	7	9	12
Each	$290.00	380.00	500.00	675.00
Speed, r.p.m.	450	400	385	325
Pulley, inches	12x6	16x8	18x8	18x8
Front wheels, inches	24x4	24x4	24x4	26x4
Rear wheels, inches	32x4	32x4	32x4	36x4
Weight, pounds	1450	1850	2400	3050

Magnetos, Low Tension, Gear Driven; for Model K Portable Kerosene Engine

1½ horsepower—no batteries	extra, $10.00
3 to 5 horsepower—no batteries	extra, 14.00
7 horsepower—no batteries	extra, 15.00
9 to 12 horsepower, with starting batteries	extra, 21.00

*GASOLINE ENGINES

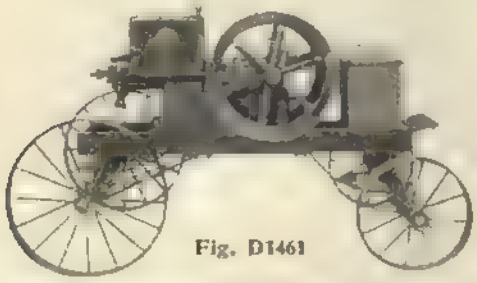

Fig. D1461

FULLER & JOHNSON, MODEL N, PORTABLE

Easy to Start

Consists of Model N gasoline engine mounted on all steel team truck. Seat serves as a battery and tool box. Axles on truck are solid steel reinforced with I beams. Equipment consists of tank, plain pulley, muffler, battery box, batteries, wires, switch, spark coil, wrenches, crank, except 12 h.p. cylinder oiler, grease cups; accessories and instructions; also tongue.

Horsepower	5	7	9	12
Each	$270.00	355.00	470.00	640.00
Speed, r.p.m.	450	500	385	325
Pulley, inches	12x6	16x8	18x8	18x8
Front wheels, inches	24x4	24x4	24x4	26x4
Rear wheels, inches	32x4	32x4	32x4	36x4
Weight, pounds	1400	1800	2350	3000

Magnetos, Low Tension, Gear Driven; for Model N Portable Gasoline Engine

1½ horsepower—no batteries	extra, $10.00
3 to 5 horsepower—no batteries	extra, 14.00
7 horsepower—no batteries	extra, 15.00
9 to 12 horsepower, with starting batteries	extra, 21.00

*Not carried in stock; will ship from factory.

*KEROSENE SAW RIGS

Fig. D1462

FULLER & JOHNSON, MODEL K, PORTABLE

Easy to Start

A Model K kerosene engine. All steel saw outfit, mounted on all steel trucks. Saw is designed for sawing cordwood or polewood into stove wood. Saw can be removed and engine can be used as regular portable. Sawyer feeds saw without touching the wood. Table hooks up for moving.

Regular equipment consists of Model K engine with plain pulley, kerosene tank in base, dry batteries, spark coil, switch, wrenches, crank (except 12 h. p.), cylinder oiler, grease cups, seat, tool box, tongue, saw table, balance wheel, belt, belt tightener and saw mounted on truck; also instructions.

Nos.	755K	775K	795K	7125K
Horsepower	5	7	9	12
Each	$415.00	505.00	630.00	795.00
Speed, r.p.m.	450	400	385	325

*FRICTION CLUTCH PULLEYS

For All Models K and N Gasoline and Kerosene Engines

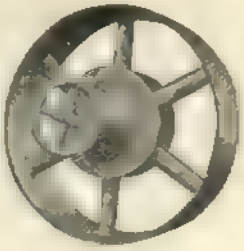

Fig. D1464

These clutch pulleys are the very best, most durable and safest. All mechanism is enclosed. To engage clutch pull out on hand wheel. To disengage push in on hand wheel. Prices below are to be added to price of engine when engine is to be equipped with friction clutch instead of plain pulley. When a friction clutch pulley is supplied as an extra, separate from engine, an additional charge of 10% is made to price given on friction clutch pulleys. If plain pulley is later returned to us credit will be given to equal this advance.

No. 1 Shaft Type, Fits on Crank Shaft. For 1½ and 3 Horsepower, with 4 Inch Face

Diameter, inches	5	6	7	8	10
Each	$15.00	16.50	18.00	19.50	21.00
Weight, pounds	20	25	30	35	40

For 5 and 7 Horsepower, with 6 Inch Face

Diameter, inches	12	14	16	18	20
Each	$23.00	25.50	28.00	30.00	32.50
Weight, pounds	60	70	80	90	100

Fig. D1465

Flywheel type. Bolts to flywheel on engine.

For 9 to 12 and 15 Horsepower, with 8 Inch Face

Diameter, inches	16	18	20	22	24
Each	$47.00	49.50	52.00	54.50	57.00
Weight, pounds	145	160	180	190	210
Diameter, inches		26	28	30	32
Each		$59.50	62.00	64.50	67.00
Weight, pounds		230	250	270	290

For 20 and 25 Horsepower, with 10 Inch Face

Diameter, inches	18	20	22	24	26
Each	$61.00	64.00	67.00	70.00	73.00
Weight, pounds	245	255	280	300	325

Each		$76.00	79.00	82.00	85.00
Weight, pounds		345	360	380	400

NOTE—The above sizes of clutch pulleys are stock sizes; friction clutch pulleys larger in diameter or with wider face than listed above can be furnished at an additional price.

*Not carried in stock; will ship from factory.

*AIR COMPRESSORS

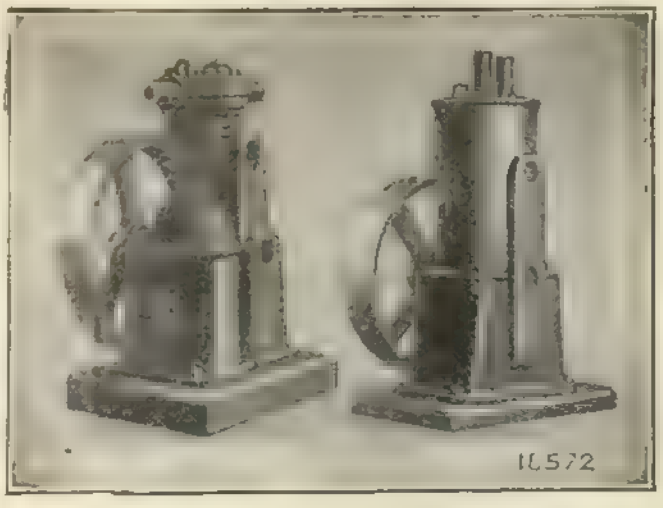

Fig. D1466
Air Cooled Type

Fig. D1467
Water Cooled Type

INGERSOLL-RAND CO.

Imperial Type Fourteen for Belt Drive

An air compressor for either intermittent or continuous service, where air is required in small quantities. For industrial plants, garages, power plants or for operating machines such as the monotype. Easy to install, independent of attendance and economical of power; is of the single stage, single acting, self oiling, enclosed, center crank type. Unit consists of a sturdy main frame wholly enclosing the main bearings, crank shaft and connecting rod and providing a basin for the automatic lubrication system. Air compressing cylinder seats on top of main frame secured by stud bolts. The absence of cross heads and stuffing boxes gives easy access to the valves and an effective oiling system. Special high grade anti-friction metal die cast bearings, carefully fitted, reduce frictional losses. Seats for shaft bearings are cast integral with the main frame, reinforced by ribbed supports and bored to take die castings. Bearings are kept flooded with oil by the automatic splash lubrication system. Crank shaft and connecting rod are drop forged steel. A renewable two piece die casting takes the wear at crank pin end of connecting rod, adjustment by removable shims; long wrist pin bearings in piston eliminate wear at this point. For compressors driven by electric motor, automatic starters are furnished to order at extra cost and built in each case to suit the current and voltage employed. Full information for this equipment when so ordered must be given

Cylinder diameter, in.	2½	3½	4½	6	6

SYSTEME "WEIR" d'Alimentation de Chaudières et de Rechauffage d'Eau d'Alimentation pour Locomotives.

L'accroissement de rendement demande aux locomotives aujourd'hui, ainsi que la necessité de réaliser le maximum d'economie de combustible, ont amene les ingenieurs a accorder une attention spéciale aux problemes de l utilisation de toutes les unités de chaleur perdue. La plus grande proportion de la chaleur inutilisée est perdue dans la vapeur d'echappement, et la moindre partie de cette chaleur que l'on peut arriver a employer represente une economie directe de combustible. De nombreux essais ont ete faits en vue d'appliquer des systemes de rechauffage d'eau d'alimentation aux chaudieres de locomotives, et une analyse de ces diverses tentatives prouve que les echecs ont ete dûs aux modeles peu satisfaisants des rechauffeurs d'eau d'alimentation, et à l'incapacite de l'injecteur, et des types de pompes alimentaires indépendantes employes jusqu'ici pour refouler l eau chaude d'une manière satisfaisante.

Se basant sur leur longue expérience dans les questions de rechauffage d'eau d'alimentation et de construction de pompes, MM. G. & J. Weir, Ltd, ont concentre leurs efforts sur l étude d'un systeme de rechauffage d'eau d'alimentation de locomotives, systeme qui a vaincu toutes les difficultes rencontrees jusqu'a present. Le pourcentage d'economie realise par le systeme "Weir" varie naturellement d apres les conditions, mais les résultats obtenus avec installations en service regulier indiquent une economie directe de 8 a 12 pour cent, a laquelle vient s'ajouter une economie qu'il est difficile de calculer, et qui resulte dans l'amelioration de la production de vapeur et du fonctionnement de la chaudiere.

Les avantages du systeme "Weir" sont les suivants :—En employant de l'eau d'alimentation à une temperature inferieure à 15.5 degres centigrade dans le tender pour tous types de locomotives faisant usage de vapeur saturee ou surchauffee, on obtient, pour le même travail de la locomotive, une économie de combustible de pas moins de 10 pour cent., ou alternativement, pour une consommation egale de combustible, une augmentation de puissance d'evaporation de la chaudiere de 10 pour cent.; la pompe alimentaire procure un degré de flexibilité et de sureté d'alimentation qu aucun injecteur d'alimentation ne peut atteindre, une diminution generale de reparations de chaudiere et de frais d entretien ; et une augmentation tres marquee de rendement des locomotives, surtout pour un service dur.

Les gravures representent la pompe alimentaire verticale "Weir" pour locomotives, et un diagramme du systeme "Weir" appliqué a une locomotive moderne. Si on le desire, il peut être fourni des pompes du modele horizontal.

Le systeme "Weir" a été fourni à 30 des plus importantes compagnies de chemins de fer du monde entier, entre autres : Bombay, Baroda, and Central India Co. ; the Egyptian State Railways ; London, Brighton and South Coast Railway ; Great Indian Peninsula Railway ; Union of South Africa Railway ; Midland Railway ; Great Eastern Railway ; Antofogasta and Bolivia Railway, etc.

Des renseignements et dessins pour toutes installations speciales seront fournis sur demande.

GALVANIZED WELL BUCKETS

RIVOMIC Red banded, well, 26 gauge iron, galvanized.

Full Half-Dozen Bundles

*GASOLINE OUTFITS
NON-MEASURING

This outfit is designed especially to meet the need for a gasoline outfit for the private garage owner. It is durable, efficient and of extraordinary merit.

The pump is of the standard non-measuring, lift handle design. Made largely of brass with valves carefully ground and all parts fitted by expert workmen.

It works easily and discharges almost a steady stream. It stands over two feet high on a substantial base and is fitted with a non-drip faucet, lock and key.

The underground tank to be used in connection with this pump is made of galvanized steel and is fitted with fill pipe having automatic valve, lock, removable strainer and inner tube.

Type 9. Non-measuring pump only without tank or hose, weight 50 pounds ..... each, **$16.00**

Type 9. With 120 gallon tank, weight 150 pounds, each, **61.00**

10 Ft. ¾ Inch Gas Hose with portable nozzle..... each, **17.00**

SELF MEASURING

Standard Inside Outfit

A convenient system for drawing gasoline within the building where it is used, the storage tank being placed on the outside or under the floor.

The pump is of easy action, standard self measuring design, having adjustable stops for gallons, half gallons and quarts

It is built of the best materials and is very sturdy. Is regularly equipped with discharge register counting to ten, non-drip faucet, lock and key

The tank is of the famous Milwaukee "Kant-Leek" construction and is provided with interior suction pipe with outside connections, double foot valves for holding the line full of liquid, fill pipe with inner tube, strainer, fill cap with removable strainer, automatic vent valve, gauge stick and lock. All gasoline tanks bear underwriters' label.

Type 33. Self measuring pump only, without tank or hose, weight 100 pounds..... each, **$112.00**

Type 33. With 60 gallon tank, weight 150 pounds ..... each, **144.00**

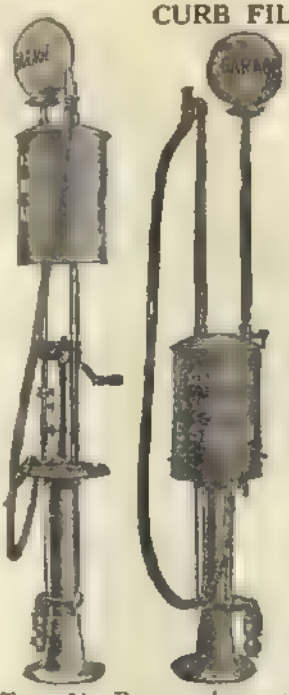
Type 33. With 120 gallon tank, weight 200 pounds.. ..... each, **158.00**

Type 33. With 280 gallon tank, weight 375 pounds. ..... each, **216.00**

10 Ft. Gasoline Hose with nozzle..... **23.00**

*Not carried in stock; will ship from factory.

*GASOLINE OUTFITS
CURB FILLING STATION



With Electrically Illuminated Sign

A speedy, accurate gasoline curb outfit which is very attractive and entirely satisfactory.

The pump is of the standard self measuring design having instantly adjustable stops for one gallon, half gallon and quart. A discharge register is furnished which automatically counts ten.

When pump is in use the cover is held suspended by a spring latch and when not in use the cover can be lowered and securely locked, preventing meddling and enclosing all operating parts, including the filling nozzle on the end of the hose.

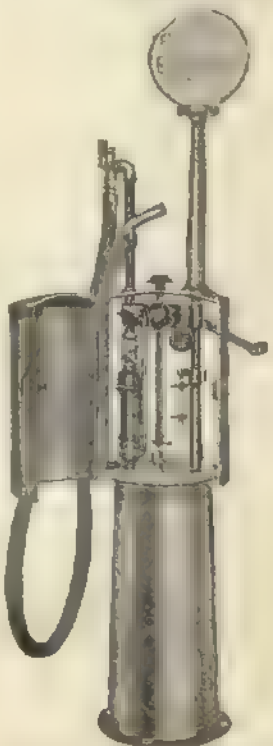
The pump works remarkably easy and delivers a heavy stream.

Ten feet of special gasoline hose with portable fill nozzle is included. A hose draining valve empties the hose instantly after pumping ceases.

The tank is of the Milwaukee "Kant-Leek" construction and has all the desirable conveniences.

Type 34. Pump only, no tank, weight 180 lb....each, **$153.00**
Type 34. With 120 gallon tank, weight 280 lb.. each, **202.00**
Type 34. With 280 gallon tank, weight 390 lb....each, **247.00**
Type 34. With 550 gallon tank, weight 630 lb...each, **363.00**
Gallon Recording Meter.....each, **28.00**
Gasoline Filter **19.00**

ROADWAY FILLING STATION



This is a very speedy and extremely accurate outfit and at the same time an attractive trade getting installation.

The pump is of the standard self measuring design with the usual stops. A gallon recording meter is provided which keeps accurate count of gasoline pumped up to 100,000 gallons and then repeats, but cannot be set back

A discharge register, counting to ten records individual sales. An efficient filter is built into the outfit. Ten feet of special gasoline hose with portable fill nozzle is provided for filling directly into the car.

The tank is of the Milwaukee "Kant-Leek" construction and is equipped with fill pipe having automatic vent valve, lock and key, inner tube and removable strainer. A measuring gauge is included. An interior suction pipe having special foot valve is also furnished.

Electric sign is an extra, priced separately.

Type 37. Pump only, no tank, weight 225 lb. . each, **$262.00**
Type 37. With 120 gallon tank, weight 325 lb . each, **313.00**
Type 37. With 280 gallon tank weight 435 lb each, **403.00**
Type 37. With 550 gallon tank, weight 675 lb...each, **512.00**
Electric Sign. Weight 20 pounds . . each, **15.00**

*Not carried in stock; will ship from factory.

*GASOLINE OUTFITS

ROADWAY FILLING STATION

Rapid Delivery Five Gallon Continuous Motion Speed Pump

This outfit provides the fastest hand operated method of filling motor cars and is the very next thing to an electric pump in speed.

Without any special effort on the part of the operator, a speed of 15 gallons per minute is attained.

The pump is handsomely finished in a hard baked enamel with nickel trimmings. Adjustable measuring stops enable the operator to draw accurately one, two, three, four or five gallons at a single stroke. The measuring stops can be sealed to prevent tampering with the measuring device.

Slightly over twelve turns of the crank delivers five gallons. To return the plunger, only two revolutions of the crank in the same direction are necessary. The crank handle is always turned forward—never backward.

A gallon recording meter keeps an accurate record of every gallon pumped, up to million gallons, then repeats and cannot be set back. It is included without any extra charge.

A very large discharge register indicates each gallon pumped up to 20 and is set back to zero before starting.

A large and efficient filter is provided which removes any particles of water or dirt which may be in the gasoline.

When not in use, the cover is raised and securely locked with the hose nozzle inside. Thus neither the hose nor the mechanism can be tampered with by unauthorized persons

Standard equipment with no extra charge includes the meter, filter, 10 foot 1¼ inch metal hose with portable filling nozzle and electrically illuminated sign.

The tank is built by the "Kant-Leek" process of galvanized Apollo steel and carries the underwriters' label. It is fitted with fill pipe having automatic vent valve, lock, removable strainer and inner tube. A measuring stick is included. The interior suction pipe is provided with special double foot valves which insure the accuracy and continued priming of the pump.

Type 36. Pump only with electric sign, weight 345 pounds .....each, **$386.00**

Type 36. With 280 gallon tank, weight 735 pounds.....each, **508.00**

Type 36. With 550 gallon tank, weight 1150 pounds.....each, **629.00**

Type 36. With 820 gallon tank, weight 1450 pounds.....each, **674.00**

Type 36. With 1075 gallon tank, weight 1720 pounds .....each, **757.00**

NOTE—Type 36 can be furnished with motor drive. Control, fast or slow, is readily accomplished, making a perfect filling pump of accuracy and durability.

*Not carried in stock; will ship from factory.

*LUBRICATING OIL OUTFITS

SELF MEASURING

Designed for storage of lubricating oil in garages, stores or factories, affording a means of accurate measuring both clean and durable.

The pump has adjustable stops for quarts, pints or half pints. Is equipped with a non-drip faucet and is handsomely finished in black enamel.

The tank is of heavy metal solidly welded into one seamless piece avoiding all leakage. It is very durable under rough usage.

A float measuring gauge is provided. The filling basin is fitted with removable strainer, grate and dust proof cover. The tank is green enameled.

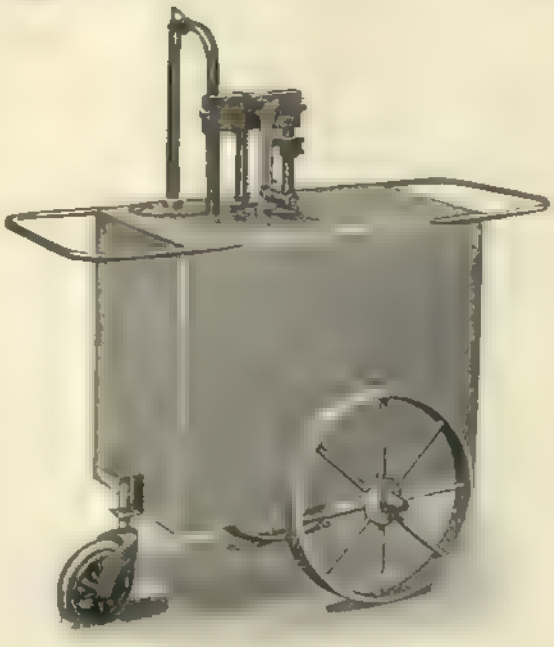
A detachable portable wheel base is furnished as an extra only.

The tank measures 35 x 24 inches.
Capacity 55 gallons.
Shipping weight 125 pounds.

Type 12. As described....each, **$51.00**

PORTABLE TANK BASES

For style 12 tanks.....each, **$10.00**



*PORTABLE WHEEL OIL TANKS

An economical and absolutely safe method of handling oil at various parts of a building or at the curb. Designed for use in garages, factories and railroad shops. The wheels are large and it is easily moved about. There is a brake supplied to hold it stationary.

The tank is a one piece seamless "Kant-Leek" and is equipped with a fill basin and magnetic gauge. Finished in olive green enamel.

The pump is self measuring with usual stops. Complete with non-drip faucet, lock and key.

Type 62. Holds 60 gallons, weight 375 pounds..each, **$140.00**

*Not carried in stock; will ship from factory.

GEO. KENT, Ltd., 119, HIGH HOLBORN, LONDON, W.C. 1.

Codes: Lieber, Engineering, A.B.C. (5th Edition).
Telegrams: "Kentobin, London."
Telephone: Museum, 4262.
Works: LUTON, BEDS., ENGLAND.

The Centrifugal CLEAR VIEW SCREEN.

FIG. 1.

This apparatus provides a look-out window through which a PERMANENTLY CLEAR VIEW may be obtained either with the naked eye or with binoculars IN SPITE OF RAIN, SNOW OR FLYING SPRAY.

In the ordinary way using binoculars in bad weather is unsatisfactory; in the open they are soon put out of action by the lenses becoming blurred; behind a window they are useless on account of rain or spray streaming down the glass.

By means of a rapidly revolving glass disc driven by a small electric motor, rain, snow or spray is instantly thrown off, and perfect transparency is maintained.

Made in two patterns—the Hood Pattern, as illustrated in Fig. 1, and the Window Pattern, as shown in Fig. 2.

The Hood Pattern is self-contained and forms a revolving shelter. This pattern can be fixed in any convenient position aboard ship, and commands an all-round view.

The Window Pattern, fixed in a suitable frame, is mounted in a window of the Wheel House, or other suitable position.

In use on largest steamship lines.

FIG. 2.

PRICE of the HOOD PATTERN, complete with electric motor, which is fixed inside the pillar - £48 10s. f.o.b English Port. All that is necessary to install this type is to run the wires to the motor and fix the standard by means of ordinary coach-screws.

WINDOW PATTERN. Complete with electric motor - £32 f.o.b. English Port.

PARAVENT CENTRIFUGE A VUE CLAIRE

Cet appareil consiste en une fenêtre extérieure à travers laquelle on obtient une vue toujours distincte, soit à l'œil nu, soit au moyen de jumelles EN DÉPIT DE LA PLUIE NEIGE OU DES EMBRUNS.

L'usage de jumelles par mauvais temps ne donne pas satisfaction. A l'extérieur, les verres sont très rapidement recouverts de buée, et cette dernière intercepte la vue, lorsqu'on est protégé par une fenêtre ordinaire les jumelles ne servent plus à rien à cause de la pluie ou des embruns qui coulent le long des verres.

A l'aide d'un disque en verre tournant rapidement sous l'action d'un petit moteur électrique la pluie la neige ou les embruns sont immédiatement rejetés, et l'on conserve une transparence parfaite.

Se fait en 2 modèles: le modèle à capote, représenté par la gravure 1 et le modèle pour fenêtre représenté par la gravure No 2.

Le modèle à capote forme un dispositif indépendant et constitue un abri pivotant. Ce modèle peut être fixé à n'importe quel endroit d'un bateau et permet de regarder dans toutes les directions.

Le modèle pour fenêtre, fixé dans un cadre approprié, peut être monté dans une des fenêtres de la timonerie ou à tout autre position convenable.

En usage sur les plus grandes lignes de navigation.

Prix du modèle à capote complet, avec moteur électrique fixé dans le pilier: Frs 1212,50 f.o.b. port anglais.

Pour installer ce type, il suffit de relier les fils au moteur et de fixer le pied au moyen de tire-fonds ordinaires.

Prix de modèle pour fenêtre complet avec moteur électrique: Frs 800 f.o.b. port anglais.

PARAVIENTOS DE VISTA CLARA CENTRÍFUGOS.

Este aparato constituye una ventana ó vidriera que proporciona una vista clara permanente bien á simple vista ó valiéndose de anteojos ó binoculares á pesar de la lluvia de la nieve ó espuma del mar.

En el uso general el empleo de binoculares en mal tiempo dá poca satisfacción, al aire libre, pues á menudo no funcionan á la perfección por empañarse las lentes. Detrás de una vidriera ó ventana son generalmente inútiles á causa de la lluvia ó del rocío que corre por el cristal.

Por medio de un disco de cristal que gira rápidamente y que está accionado por un motor eléctrico desaparece instantáneamente la lluvia la nieve ó el rocío quedando siempre el cristal mantenido así una transparencia perfecta.

Se construye en dos modelos, el tipo "Hood" ó de capota como se muestra en la figura 1 y el tipo ventana, ilustrado en la Fig. No. 2.

El modelo de capota "Hood" es autocontenido y forma un refugio giratorio. Este modelo puede colocarse en cualquier posición que se desee abordo del navío y contiene una vista clara en todo al rededor.

El modelo de vidriera o ventana fijo en un bastidor apropiado va montado en una vidriera de la timonera ó en otra posición conveniente.

En uso en los mas grandes líneas de navegación.

Precio del modelo de capota o "Hood" completo, con motor eléctrico que se suministra fijo en el interior del pilar £48 10s. f.a.b. en puerto inglés.

Todo lo que es preciso para instalar este modelo es hacer los alambres al motor y fijar el pedestal por medio de tirafondos ordinarios.

Modelo de vidriera o ventana. Completo con motor eléctrico £32 f.a.b. puerto inglés.

"CUM-BACK" TOY

F2976—2¼x2¼ in. tin ends, litho cardboard body; when rolled on floor or down incline it returns. 1 doz. in box..... Doz **78c**

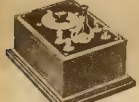
Radio Sets

Audiola Crystal Detector Receiving Set



N27205

N27205—The Audiola Crystal Detector Receiving Set is a compact and sturdy little outfit. The 2½-plate variable condenser permits of sharp and accurate tuning. Has a phosphor-bronze perfect contact adjusting wave whisker, and a crystal detector of the finest grade of galena. Has binding posts securely held in place. A tap switch is provided. Fittings are nickel plated, and the panel is finished in black. Head phones are not furnished with this set. It may, however, be used with any pair of phones having the usual 2000-ohm resistance windings. Size 6¾ inches long, 4¾ inches wide, 4¾ inches high. Shipping weight, 2 pounds. Each **2.00**

Gilbert Crystal Detector Set

N27200

N27200—GILBERT CRYSTAL DETECTOR SET—Exceedingly well adapted to the use of all beginners in radio work. The only equipment necessary to operate it is sufficient wire and insulators to erect an aerial. The outfit consists of a tuning coil, crystal detector, and a pair of sensitive radio telephones with head bands. No batteries are required. It will receive waves varying in length from 200 to 600 meters. The receivers range is approximately 15 or 20 miles for stations using spark transmitters, but with telephonic transmitters the range is much greater. Enclosed in a handsome solid mahogany cabinet. Size 6¾ x 7¾ x 6¾ inches. Each **20.00**

Professional Receiving Set

N27201

N27201—GILBERT'S PROFESSIONAL RECEIVING SET—With the outfit of telephone messages can be received from a considerable distance. It is an extremely simple outfit to operate, resulting as little mechanical knowledge as any set on the market. The set is a very sensitive receiving set. Has a condenser of ample capacity and is provided with tuning coil augmented with variometer. Wave length may be varied from 200 to 600 meters. Two coils are included. The telephone type of tuning coil is used in this set. The coils are wound in a strong formwork and braced. They fit into a fine position on two brass rods. The set is mounted on a wood base 14x8½ inches. All wood parts are finished with an attractive rich mahogany finish. Binding posts are of nickel plated black composition and the binding posts, switch lever, screws and nuts are of the finest. The wiring on the bottom of the set is carefully protected by a board which may be easily removed. The price does not include the detector tube shown in the cut, but this is necessary to operate as well as a battery, all of which must be added. A pair of head phones, as at right, are also extra. Each **33.50**

Gilbert Amplifier

N27203

N27203—GILBERT AMPLIFIER—The amplifier is designed to be used in conjunction with the Receiving outfit when the signals being received are weak and hard to hear. The Gilbert amplifier is the Audiola Frequency type, will work effectively with any receiving set. Has a Navarre-type transformer, standard ratio. The set is made of highly polished oak cabinet, size 6¾x7¼x6¾ inches. The panel is hard composition finished in black and fitting are superb. Each **16.50**

AMPLIFIER is furnished without tubes.

Gilbert 2000-Ohm Head Phones

N27202

N27202—GILBERT 2000 OHM HEAD PHONES—Sensitive telephone receivers play an important part in successful operation with a long range receiving set. The Gilbert phones are especially constructed for radio work. Part of the sensitiveness of this head phone is due to the special magnet steel which is used in the permanent magnets, and to the fine grade of soft iron which makes up the pole pieces. The shell is aluminum and the ear pieces of insulating compound. The latest designed head band light and comfortable, and easily adjusted. Each **9.00**

These Head Phones can be used with any set shown on this page.

Gilbert 2-Step Amplifier

N27204

N27204—GILBERT 2-STEP AMPLIFIER—The Gilbert 2-step amplifier is designed to be used in conjunction with the Receiving outfit when the signals being received are weak and hard to hear. The 2-step amplifier is the Audiola Frequency type, will work effectively with any receiving set. Has a Navarre-type transformer, standard ratio. The set is made of highly polished oak cabinet, size 6¾x7¼x6¾ inches. The panel is hard composition finished in black and all fittings are superb. Each **16.50**

AMPLIFIER is furnished without tubes.

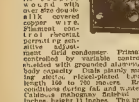
Showing Gilbert Crystal Detector Receiving Set N27200 connected to a Navarre Vacuum Tube Detector and 2-Volt storage battery and a B battery.

Showing N27201 Professional Receiving Set complete with head phones, 6-Volt storage battery and detector tubes.

Monroe Regenerative Receiving Set

N27206

N27206—MONROE REGENERATIVE RECEIVING SET—Single circuit tuner consists of an 11 plate rotary vernier condenser variable from .0001 to .0011 mfd. and a fine double silk covered copper wire. Filament control permits regulation of the



N27206

primative. Grid condenser Primary inductance tank controlled by variable control switch. Secondary shielded with grounded aluminum plate to prevent body capacity. Dials plainly marked. Inductance switch, nickel-plated binding posts. Wave length range of the set is from 150 to 1,000 meters, controlling wave lengths from 150 to 1,000 meters. Has a panel of mahogany finished. The size is 7x7½ inches, height 11 inches. The price does not include detector tube A or B batteries and head set. **49.00**

SPECIAL NOTICE: N27206 Monroe Receiving set needs to make it complete for operation one only Detector Tube, one B Battery, 22½ Volts, one 6-Volt storage battery, one pair of head phones, and sufficient wire and insulators to erect aerial.

The illustration shows interior of N27206 set.

Monroe Radio Sets

Monroe Receivers use the well known Armstrong Regenerative Circuit and are licensed under the Armstrong Patents. The utmost care is exercised in their construction and they represent that excellence in craftsmanship and Radio Engineering that has made the "Monroe" the recognized leader in moderate priced receiving sets. They have conclusively demonstrated a daylight range of 170 miles with 100 watt station transmitting, and a night range of 1,000 miles. These sets are exceptionally low priced considering their range, efficiency and satisfactory operation

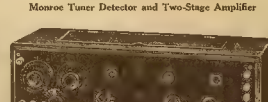
Monroe Two-Stage Amplifier

Each

N27207

N27207 MONROE TYPE TWO-STAGE AMPLIFIER is designed to be used in conjunction with N27206 Tuner Detector Receiving Set. This instrument consists of two high grade Audio amplifying transformers, two sockets mounted on a bakelite base and two filament control rheostats permitting resistive adjustments of the vacuum tubes. In addition to the extras needed for N27206 Receiving Sets, it must have two amplifying tubes and a B 45-Volt battery, which are not included in the price **49.00**

Monroe Tuner Detector and Two-Stage Amplifier



Each

N27206—MONROE TUNER DETECTOR AND TWO-STAGE AMPLIFIER—The tuner detector has for its base N27206 receiving set, and in addition an amplifier consisting of 2 high-grade Audio Frequency transformers, 2 sockets mounted on a bakelite base, 2 filament control rheostats which permit resistive adjustment of the vacuum tubes. This instrument is entirely independent of the cabinet and may be easily taken out by removing 4 small screws. Wave length from 150 to 700 meters. Normal range under favorable conditions during fall and winter 150 to 1,000 miles. The instrument is put up in a mahogany finished, well constructed cabinet, size 21¾x7¾x7 inches. The cabinet with its two-stabilized control is easily operated, and with the addition of a loud speaking horn, will receive telephone messages and music from broadcasting stations and can be heard throughout an average size room. The set needs to make it complete for operation one detector tube, two amplifying tubes, one B battery 22½ volts, one B battery 67½ volts, one 6-Volt storage battery, one head set.

Each

Note. N27202 Head Phones can be used on any of these Radio Receiving Sets.

The Gilbert Thinlarm

A Trade Winner

This new Gilbert creation — the only thin model alarm clock made — has jumped into favor from the start.

Remember how quickly the old high-wheel bicycle disappeared when the "safety" came in? How many high-wheel bikes do you see today?

The Gilbert THINLARM is far more saleable than the old-fashioned, bulky alarm clock. Whether it's claw-hammers or clocks, your trade wants the latest, especially when it's the *best.*

The Gilbert THINLARM is up-to-the-minute in looks, workmanship and dependable timekeeping. There is no other alarm clock like it — or *nearly* like it.

The slender Gilbert THINLARM embodies many new and exclusive features, to win new trade for you. Ask your jobber to show you a sample, and to tell you about the Gilbert Sales Plan, Gilbert Selling Helps and Gilbert Advertising.

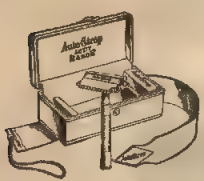
AUTO-STROP SAFETY RAZORS

Prices on Application

The razor that has revolutionized the safety razor business. Not an old razor rebuilt nor a "cheap" new set, but a real value accomplished by economical manufacture. The razor frame, blades and strop are the same as those furnished in the regular $5.00 sets excepting that the frame is nickel plated instead of gold or silver plated, and has a new model adjustable guard.

Model C—Valet, Auto Strop Razor, consists of nickel plated self stropping razor, three genuine Valet Auto Strop blades and one horsehide strop. The razor and blades are packed in an attractive metal case, beautifully finished in black, and velvet lined. The strop is packed in an individual carton, and the entire outfit is contained in a handsomely lithographed carton, per dozen *$18.00*



STANDARD OUTFIT

Cases of black, maroon, blue, green or red leather plush and satin lined. Size 1¾×4½ inches.

No. 600—Silver plated self-stropping razor, 12 blades, shell horsehide strop .....per dozen sets *$60.00*

ONE IN A BOX
ONE DOZEN IN A CARTON

FLAT METAL SET

These gold plated sets are especially designed and are an exceptionally good value. They are very attractive and desirable—take up but little space—making same especially attractive to the traveling salesman, tourist or camper. Strong and substantial.

Gold plated case, highly polished, gold plated blade box with **one extra auto-strop blade,** gold plated auto-strop safety razor with blade, selected leather strop, case is lined with purple velvet and satin, measures 3¼×3 1⁹⁄₁₆×1⅝ in. when closed. Each set in a purple flannel bag.

No. 350Q—Plain polished dome top case .....per dozen *$60.00*

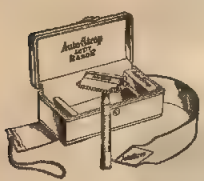
AUTO-STROP SAFETY RAZORS

Prices on Application

The razor that has revolutionized the safety razor business. Not an old razor rebuilt nor a "cheap" new set, but a real value accomplished by economical manufacture. The razor frame, blades and strop are the same as those furnished in the regular $5.00 sets excepting that the frame is nickel plated instead of gold or silver plated, and has a new model adjustable guard.

Model C—Valet, Auto Strop Razor, consists of nickel plated self stropping razor, three genuine Valet Auto Strop blades and one horsehide strop. The razor and blades are packed in an attractive metal case, beautifully finished in black, and velvet lined. The strop is packed in an individual carton, and the entire outfit is contained in a handsomely lithographed carton, per dozen *$18.00*



STANDARD OUTFIT

Cases of black, maroon, blue, green or red leather plush and satin lined. Size 1¾×4½ inches.

No. 600—Silver plated self-stropping razor, 12 blades, shell horsehide strop .....per dozen sets *$60.00*

ONE IN A BOX
ONE DOZEN IN A CARTON

FLAT METAL SET

These gold plated sets are especially designed and are an exceptionally good value. They are very attractive and desirable—take up but little space—making same especially attractive to the traveling salesman, tourist or camper. Strong and substantial.

Gold plated case, highly polished, gold plated blade box with **one extra auto-strop blade,** gold plated auto-strop safety razor with blade, selected leather strop, case is lined with purple velvet and satin, measures 3¼×3 1⁹⁄₁₆×1⅝ in. when closed. Each set in a purple flannel bag.

No. 350Q—Plain polished dome top case .....per dozen *$60.00*

No. 351Q—Diamond design embossed top case with name plate for engraving .....per dozen *$60.00*

WATER COOLERS

SANITARY WATER BAGS

Constructed with steel wire holder and sliding clamp which securely fastens the spout and completely seals the open end of the bag.

These bags are made of material having the peculiar property of holding water and yet exuding enough moisture to prevent the sun from having any effect on the water inside.

First and second time filling, water will evaporate quite rapidly, after which bag is in condition to hold water indefinitely.

Guaranteed to keep water cool for forty-eight hours.

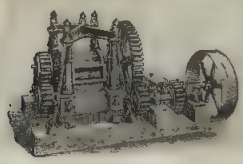
CANE MILLS

GLOBE—Steam Power.

With Double Back Gearing, Rubber Springs Steel Shaft and Brass Boxes.



These mills are capable of grinding the largest of tropical cane. They are light running and are of extra strength in proportion to their capacity.

The rolls are adjustable to any size cane by means of set screws.

The main roll is flanged and serrated, making the entire length of roll available, and rendering choking impossible.

All necessary bolts, washers, monkey wrench and oil can are furnished with each mill.

Pulley 24x6 inches. Speed 80 to 100 revolutions per minute.

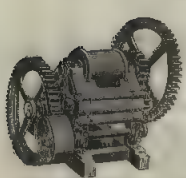
JUMBO



With Double Back Gearing.

Designed to meet the demand for a small power mill. The large roll is flanged so as to give full width of rolls for pressing. The rolls are grooved which insures regular and positive feed. By means of set screws the rolls are adjusted for large or small canes. High grade babbitt is used in the boxes. Roll boxes and counter shaft boxes are very strong.

Pulley 18x6 inches; speed 240 revolutions per minute; diameter large roll 8 in.; diameter small roll 6 in.; length roll 8 in.; diameter large roll shaft 2 7/16 in.; diameter small roll shaft 1 15/16 inches. The mill requires 3 to 5 horse power to operate.

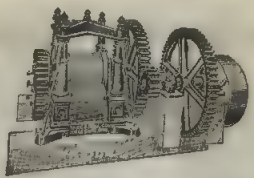
CANE MILLS

GLOBE—For Gasoline Engine Power.



Fitted to gearing of extremely high ratio, thus adapting the mill to driving by means of the ordinary fast running gasoline engine or other high speed motive power. Housings are firmly seated in the bedplate; crushing strains are carried wholly by wrought iron stay bolts running between housings and bedplate, leaving to the cast iron parts only the duty of keeping the various parts in position and alignment. Heavy and substantial bridge plate joining housings at their top, prevents any lateral movement and insures ample strength.

Gears are heavily shrouded to near their pitch line; gears are proportioned for minimum friction with maximum durability.

Roll shafts are of large diameter and run in accurately boxed gun metal boxes, which may be oiled conveniently without interruption of operation.

Rolls are of hard and close grained iron insuring the best possible crushing and grinding surface. Roll pressure is regulated by means of heavy set screws, permitting proper adjustment to any size of cane. Main roll has ample flange, certain prevention from choking.

F8435—(Mfrs 0 1 [illegible] cover- ed [illegible] in telescope [illegible] ½ doz. in [illegible] **$1.75**

BOOK CASES

—BLUE GRASS— SECTIONAL

Consists of four solid, set up sections of different heights to take different sized books, one O. G. crown and one scroll Colonial base. Each case contains the following book sections:

Two sections, height 9 inches; one section, height 11 inches, and one section, height 13 inches. All sections are 34 inches wide over all and 11 inches deep. This case is interchangeable with other standard makes. The outside of the case is made of the best selected stock. The interior is of hard maple, built up stock, to prevent warping and twisting. The finish is of heavy three-coat work, rubbed and polished. The workmanship and material throughout are the best. A perfect working door is one of the most important points to be considered in a sectional bookcase. The ball-bearing door used cannot bind, stick or draw hard. The intermembering of the top rail of one section with the bottom rail of the section above forces into perfect perpendicular alignment and also makes the case air-tight and dust proof.

CASES COMPLETE

Each

No. BG1S4SGO—Quarter sawed oak, golden oak finish; case complete $90 75

No. BG1S4SFO—Quarter sawed oak, fumed finish; case complete 90 75

Size 2¾ in. x 4½ ft. Weight per dozen, 65 lb. per dozen, **24.00**

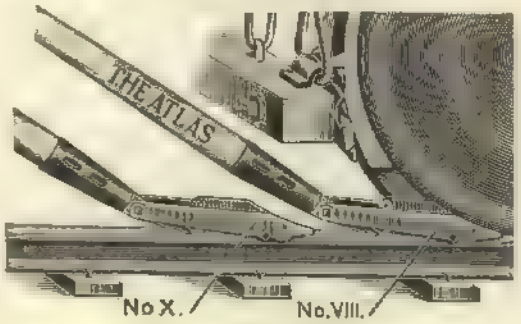
CAR MOVERS



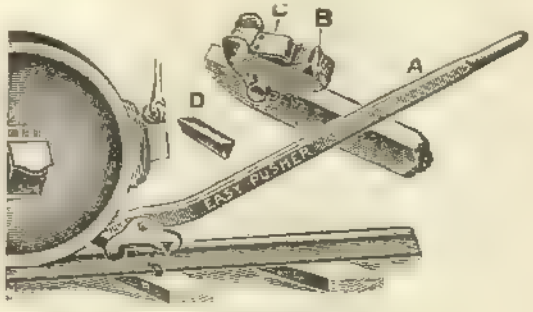
ATLAS

This compound lever arrangement acts on the car wheel so far from its contact with the rail that the moving force is utilized to roll it forward, instead of wasted in an effort to raise it from the track.

The metal parts are malleable iron and steel, and are guaranteed. The handle is of the best selected hard or sugar maple. It can be turned and all four corners used. One extra spur with each mover.

Will move a car farther at a stroke, and with less effort than any other car mover. Gets under the lowest brakes.

Atlas Car Mover. Fine tool steel spur, with extra spur. Weight about 18 lb.....each, **$11.50**
Extra Spurs.....each, **.60**



THE EASY

The "Easy" is of best material. The bar is steel; the shoe malleable; the bit is the finest tool steel; also the spring.

The heel has lugs extending downward on both sides of the rail so as to hold it firmly in position and prevents its slipping sideways. The triangular bit or steel cuts into the rail when pressure is applied and prevents slipping backward even though the rail is icy, greasy or wet.

This bit can be inverted. Each one has three sharpened edges. When the pressure is released, the steel spring lifts the steel bit from the rail, thus preventing it from being dulled by sliding over the rail when following the wheel. Two triangular steels with each pusher.

Easy Car Mover. Length 5½ feet. Weight each 20 lb. .....each **$9.00**
Extra Steel Bits . . . . . **.50**

HAND POWER ELEVATORS

With three Cables, two for Hoisting and the third for Counter Balance. This cable is of the higest grade of "Standard Hoisting Cable" and is composed of 6 strands with 19 wires per strand. The Hand Rope is Manila and of large diameter. The Platform is equipped with Safety Dogs which prevent the descent of car in case of breakage of Hoisting Cables.

One Cast Iron Hand Rope Wheel with Brake Pulley cast integral; One Cast Iron Gear and Pinion, each accurately lathe bored on Anti-Friction Roller Bearings. The Winding Drums are constructed of high grade Maple Staves (carefully turned and grooved for proper travel of cable) securely fastened between cast iron heads. The Brake is Positive in action and can be operated from the Platform or any floor within the travel of the elevator. The machinery is fitted in a wood frame constructed of 3x12 in. timbers.

The Platform is constructed of hardwood throughout and thoroughly braced with Wrought Iron Braces.

Prices include suitable counterweight and are for Complete Outfits, except for Timbers. These can be purchased from your local lumber dealer thus saving freight. Each elevator is furnished with a complete blue-print and directions for the installation of the elevator.

Prices are for One Story Travel; for each Additional Story add $20.00. In ordering give Size of Platform, Capacity, and total travel distance of Platform.

F. O. B. Minneapolis

Directions for Measurements—Send Sketch showing height of each story from floor to floor travel of Elevator, and in top story the height from floor to ceiling, where Overhead Machinery is located; the floor opening must be 12 in. wider postway than you want the car in the clear and 2 in larger front and back. The minimum head room required for Overhead Machinery of Hand Power Elevator is 11 feet.

DUMB WAITER OUTFITS

+SEDGWICK AUTOMATIC BRAKE

Outfit includes Machine Mounted on Platform ready to erect, with necessary Rope Guards; Car with Guide Shoes and Thimble and Staple for Rope; Adjustable Counter Weight to balance Car properly; Guide Runs for both Car and Counterweight, for total height of 20 feet or less; all Ropes and Flexible Wire Rope Cables.

For heavier service than ordinary, for Hospitals, Hotels, Restaurants, etc., will give good service up to 200 Lbs., One Pound Pull on the Geared Outfit raises from 4 to 10 Lbs. of load; Steel Shafting; Roller Bearings; Seasoned Ash Car; Automatic Brake does not lock fast, but is applied and regulated by load, holding at any point.

Our reputation founded on over sixty-seven years' business stands back of the OVB brand.

All goods branded OVB are guaranteed to be of highest quality material and workmanship and free from imperfections.

In selling OVB articles there is a profit for you and satisfaction to your customers.

WHITE MASONS' TAPE

Rubberized Fabric, ¾ in. Wide, Similar to Tire Tape.

White Mason tape is used for wrapping the fingers and hands of stone masons, bricklayers, mechanics and kindred trades. Is also used for wrapping tool handles, baseball bats, etc.

The strong friction, wearing and insulating qualities of this tape, together with its light color, makes its particularly adapted for interior work in the electrical line.

No. 2½—½ lb. roll, w't per doz. 3 lbs.,
per dozen $3.60

ONE ROLL IN A CARTON; 100 LBS. IN A CASE

AXE RACKS

Can be used on the counter or on the wall by supporting with brackets. For counter use a fine display can be made by placing two racks back to back. The rack is ornamental and attractive, and will save its cost by keeping axes off the floor, away from the dirt and sprinkler.

No. F15 Briggs—Semi-circular, hard wood, painted red, base 22½x11½ in., height 13 in., holds up to sixteen handled and sixteen unhandled axes, w't each 16 lbs.,
each★ $7.50

ONE IN A FIBRE SHIPPING CARTON

NOTE—We do not give away Axe Racks as premiums.

★ Items Marked Thus ★ Are Shipped From Factory Only.

WESTERN CHIEF POWER BLOWERS

Heavy steel case; steel pressure blast wheel, mounted on heavy shaft of highest grade hammer cast steel, and has long one-piece solid journal bearing equipped with oil cup (larger sizes have grease cup in addition). This machine is especially adapted for foundry cupolas, furnaces, machine shops, forge fires, or any work requiring the forcing of air currents for long distances, high pressure or strong blasts. Blowers should be placed as near the cupola as possible, and right angles or abrupt turns in blast pipe should be avoided. Constructed throughout in the best possible manner and of the best grade of materials. Built for hard usage and service.

Henshall Bass.

	Each
No. 11C—Celluloid wound handle; length 8½ ft.; length of joints 32 in.; weight each 10 ozs	$6 00
	13 20

One in a canvas bag.

Bait Casting.

Three joints and butt, cork grip, with solid metal reel seat above hand, and patent detachable finger hook, locking reel band; large polished nickel silver improved casting guides, and agate tip, with extra large opening.

No. 25—Length ft.	4½	5	5½
Weight each, about, ozs	8	8¾	8½
Each	$8 00	17 70	

Three joints and butt, same as No. 25, except it has 14 inch handle, with double cork grips, and agate mountings throughout.

No. 27—Length, feet	4½	5	5½
Weight each, about, ozs	9	9¾	9¾
Each	$12 00	26 40	

One in a canvas bag.

STEEL FISHING RODS

GENUINE BRISTOL JOINTED FLY RODS

Three joints. Tubular steel; handle mountings nickel silver; reel seat below the hand; nickel silver snake guides and one ring fly top.

	Each
No. 9—Length 9 ft. 6 inches	$16 50

One in a partitioned bag; weight each 8 ozs.

HOLLAND TELESCOPIC

Made from the highest grade imported English seamless steel tubing.

Each joint slides into the one below it, and all telescope into the handle joint. The rod is extended to full length simply by drawing out the joints, first the tip and then the others, in order. A patent spring device at the foot of each joint on the inside of the rod, locks the joints automatically at any length extended.

Casting.

Four joints; 3 ft. 6 in. long when fully extended; telescopes to 15½ inches.

Trimmed with rear agate, offset stirrup agate tip, balance German silver ring guides.

	Each
No. 1CH—Weight each 8 ounces	$12 75

One in a canvas case.

LUCKIE

Manufactured by Horton Mfg. Co.

Bait.

Tubular steel, brown enameled; three joints and butt; detachable handle, with cork grip; nickel plated mountings; solid metal reel seat above handle; two ring nickeled silver guides and three ring nickeled silver tip.

No. 173. Capacity 10 quarts, weight about 2 pounds.....each. **$2.25**

HIBBARD, SPENCER, BARTLETT & CO.

THE NEW
HERCULES
SPARK PLUGS

Strictly a Quality Product

[OVER]

HERCULES *Spark Plugs*

MOGUL TYPE

THE new HERCULES MOGUL type of spark plug represents a tremendous advance from an engineering standpoint, and sets a new mark of efficiency in spark plug construction. This type is absolutely adapted to tractor, marine or stationary engine work as well as for the truck and passenger car. Dealer profit margin is ample.

The HERCULES is not new on the market, but is one of the "old line" standards with a reputation for maximum dependability and durability under every condition of service.

7/8-inch S. A. E.

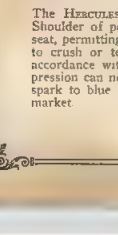
A heavy duty model recommended for Cadillac, Chalmers, Dodge, Hudson (prior to 1921), Hupmobile, Lexington, Packard, Studebaker and others. Also for trucks or tractors using ⅞" thread. Absolutely dependable under the most extreme of operating conditions.

No. 5316. Per box of 10, $12.00

Buick 7/8-inch Extension

This type is a short, stocky model especially designed to fit the Buick motor. Also adapted for use in such cars as the Dodge, Winton, Franklin and trucks, cars or tractors where a slightly increased cylinder projection is desirable or necessary

No. 5317.
Per box of 10, $12.00



7/8-inch Long

This plug carries a long shank or shell to take care of deep-ported cylinders, and is especially desirable in such cars as the Chandler, Oakland, Oldsmobile 6, Premier, Stearns, Willys Knight and others. Also efficient for trucks, tractors or marine service.

No. 5319 Per box of 10, $12.00

Ford—7/8-inch Standard

This plug will be found particularly serviceable in Ford car, truck or tractor, both porcelain breakage and fouling having been practically eliminated. Base of plug is baffled to hold back oil and prevent compression pound against insulator. Also recommended for Overland, old Studebaker and other motors using ⅞" standard thread.

No. 5315. Per box of 10, $12.00

⅞-inch Extension

For Reo and many types of tractor. The slight extension will give added power and efficiency in Ford car. Particularly recommended for Fordson tractor

No. 5314. Per box of 10, $12.00

Metric

Built to standard metric specifications and especially designed to take care of Essex, Hudson, old Packard, Pierce and of foreign-built cars. May also be used in motorcycle calling for metric thread. The most efficient plug built for high speed and high compression motors.

No. 5313
Per box of 10, $12.00

Porcelains

Insulators are of maximum size with extra heavy shoulder lathe turned to perfect accuracy with heavy glaze. Special design of gland and gasket seat protect insulator from heat and absolutely eliminate compression leakage or breaks due to compression pound, even under most extreme conditions. Highest tensile and dielectric strength known in any insulator. Heat and break proof. One size interchangeable in all models

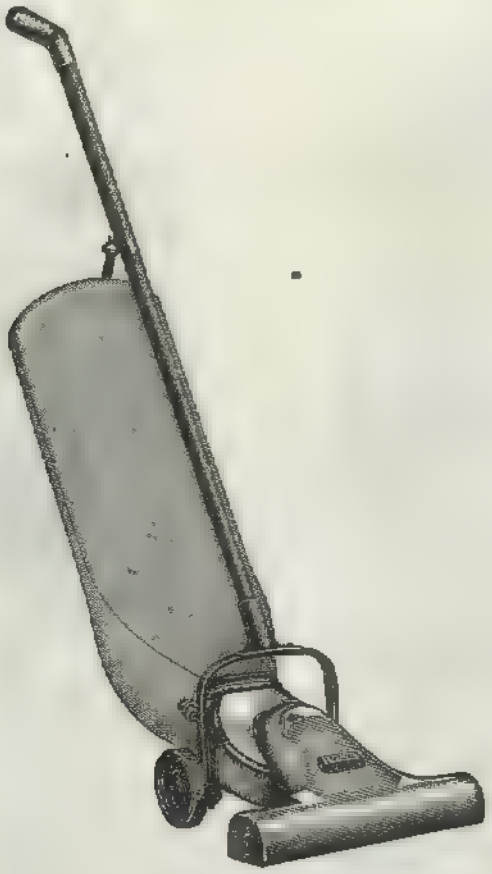
No. 5318. Per box of 10, $6.00

SPECIAL FEATURES

The HERCULES MOGUL is greatly reduced in size and weight but retains maximum strength and durability. Shoulder of porcelain is greatly enlarged and soft copper gasket provided with improved type of spring gland seat, permitting flexibility against expansion and contraction. Absolutely leak proof compression seat—impossible to crush or tear compression gasket by tightening gland or lock nut—base of plug baffled or choked bore in accordance with latest airplane practice to hold back oil and carbon, keeping base of plug entirely clean. Compression can not pound against insulator in base of plug. Electrodes swedged to knife edge, which concentrates spark to blue flame, burning away soot or carbon. The most highly efficient plug for universal service on the market

Shipping weight approximately three pounds per package of ten.

HIBBARD EVER-READY NON-ELECTRIC VACUUM CLEANERS



The new Hibbard Ever-Ready affords a new method of vacuum cleaning, it is what its name implies—always ready—just carry or roll it to the rug and begin. The job can be finished while the average woman is getting ready to start. With the Hibbard Ever-Ready it is so easy and practical to vacuum clean every day that every woman who owns one will forget about the untidy, dust-raising broom and carpet sweeper. She will keep her rugs 100% vacuum cleaned which is a big advantage from view point of clean floors and sanitation.

For homes that are not wired, there is nothing else available and they are fortunate as Hibbard Ever-Ready gives them the best and most efficient service money can buy at any price. Because the Ever-Ready is always ready it is a logical seller in the home that is wired.

Many users of high priced electric vacuum cleaners have discarded them for the Ever-Ready Non-Electric Vacuum Cleaner—no complicated mechanism, no wires, no cost for current or installation. The first is the only cost.

The drive mechanism consists of non-gran bronze worm gear, with quick releasing, instant gripping clutch—case hardened.

Worm cut shaft of hardened special steel—ball bearings. The gears run in oil, gear box containing enough lubricant to last for three years of ordinary use. The body of cleaner is one-piece aluminum casting. Bag is made from chemically treated special fabric, designed to afford maximum filtering capacity. Brush specially made for this machine with soft bristles.

The mechanism is simple, sturdy and the materials high grade, the Hibbard Ever-Ready will last for many years. The cleaner carries the one year guarantee which is standard in all vacuum cleaner lines.

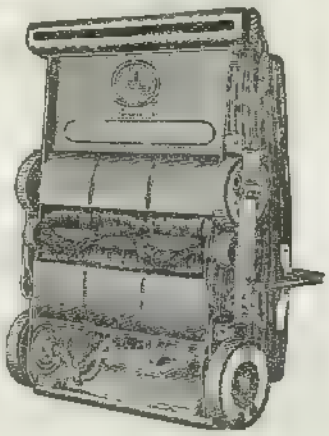
A very complete instruction card comes with each cleaner. W't each 7½ lbs.

No. E66—Full quarter dozen lots ..... each $39.00
No. 66—Less than quarter dozen lots ..... each 39.00

ONE IN A CARTON: THREE IN A CASE

COMBINATION VACUUM CLEANERS

REVONOC



It has the exclusive automatic brush adjustment for carpets and rugs of all length of nap, and the famous fibre roller nozzle support for utmost ease of operation. No lifting onto rugs and over thresholds, no scratching of the finest floors.

This model is of all-steel construction, and is the finest of the hand-power vacuum sweepers.

Built for service; equipped with light running ball bearings. Only six inches high; the design is patented. It goes under things and sweeps a path twelve inches wide. Triplet bellows for steady, strong suction, and nine-inch sweeping brush of real hair bristles.

All-steel seamless, no warp, non-leak, vacuum box. Dust-proof, wide mouth dust bag built on strong steel frame, with heavy rubber gasket, easy to clean.

Original special hinged dust nozzle is easily detached. Simple action nozzle clamp, and pressed steel plated nozzle shoe, with braided pad safety cushion, reinforced at corners with molded rubber bumpers.

The extra wide and deep dust pans, operate in unison. Finished in the finest permanent mahogany enamel, with all exposed parts heavily nickled. Heavy rubber tires on flanged wheels. Cannot come off. Forty-eight inch hardwood handle. The special knob grip on end makes sweeping easy on your hands.

No. E200—Length 17 in., w't each 18 lbs. ....each $11.00

CRUSO

A wonder of simplicity, only twelve working parts. It also has front fibre roller support for perfect dust nozzle adjustment and light running. This exclusive feature prevents scratching of the floor, and lifting on and off rugs is unnecessary.

The seamless steel vacuum chamber and the powerful triplet bellows give a suction pull that can't be beat for volume and constancy.

The 9-inch brush is real bristle and correctly designed for the most effective work. It can easily be taken out for cleaning, and as easily replaced.

The nozzel drops when the bail is lifted, and the dust sack is handy for removal and cleaning. It can be replaced without fuss, and the nozzle swings back into place under bail. Lift one lever to dump both dust pans.

The nozzle shoe is of nickeled steel and hard to dent. Over the front of the nozzle a substantial braid acts as a cushion when furniture is bumped.

The bearings are of the steel ball type.

Only six inches high and goes under all modern furniture.

Finished in mahogany and the exposed metal parts are nicely nickeled.—48-inch hardwood handle. The special knob grip on end makes sweeping easy on your hands.

Heavy rubber tires set in flanges of steel. Cannot come off and easy to replace.

No. E150—Length 17 in., w't each 17 lbs. ....each $10.00

For Electric Vacuum Cleaners see page 2547.

MILBRADT ROLLING STORE LADDERS

Showing No. 1 bent ladder, which runs on a track fastened to shelving near the top and runs close to wide base shelf.

The Milbradt Rolling Stepladders are all made to order, and to fit each particular place, of good oak lumber, in the most artistic and neatest style, handsomely finished, are durable and perfectly safe, as they cannot jump the track. They take up the least possible space, run noiselessly and so easily, either empty or with operator upon them, that a slight push will propel a ladder the length of an ordinary store. These ladders have an extra wide shelf at the top, which affords great convenience in handling stock. All iron work on ladders, as well as the brackets to hold up steel track, is malleable, artistic and strong and aluminum finished.

No. F1—Suitable fixtures at the top to run on steel track and rubber covered rollers attached near the lower end to run against the edge of base shelf. Best for all around purposes where shelving is reasonably strong. With fixtures★ .....each $36.00

No. F2—For shelving that is not strongly built. Most of the weight of ladder and operator rests on the floor. Runs on a hardwood track at the top and has cushion tired wheels to run on the floor. No track required. Wit fixtures★ ....each $36.00

No. F10—Bent ladder that runs on a flat hard wood track screwed on top of original low shelving. When top of shelving is reasonably strong this is the most convenient way to apply a ladder to this style of shelving. Wit fixtures★ .....each $36.00

No. F15—Trolley or ceiling ladder that suspends from a track fastened to ceiling. Has at the top, suitable iron in which paper filled wheels run noiselessly on the steel track and also has cushion tired wheels that run on the floor. Very strongly built and specially adapted for hardware stores or any place of business where heavy goods are handled. With fixtures, each★ $38.00

Showing No. 2 bent ladder, which runs on floor.

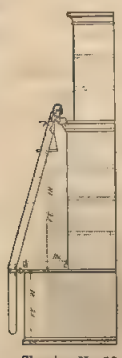
Approximate W't Ladder Crated 50 Lbs.

No, F11—Steel Track—For No. 1, regular strength★ per ft. $0.70
No, F150—Steel Track—For No. 15★ .....per ft. .70

Approximate W't Steel Track 1 lb. per Foot.

No, F20—Hardwood Track—For No. 2, complete★ per ft. $0.50
No, F200—Hardwood Track—For No. 10, complete★ per ft. .50

Approximate W't Steel Track 1 lb. Per Foot.



Showing No. 10 bent ladder, which runs on track screwed on top of original low shelving.

HOW TO ORDER

Ladders as Nos. 1 and 2 give the exact height from floor to top of base shelf; the exact width or projection of base shelf and then the exact height from top of base shelf to top of shelf to which track is to be fastened and the track shell be fastened to a shelf that is about 3 feet from the top.

Steel track for ladders No. 1, both regular and extra strong, is 1 inch in diameter and therefore does not block up any space when fastened up opposite the edge of shelf. When ordering steel track give the total length of each line of shelving; second, give distance from center to center of uprights and state how many brackets are required to hold up the steel track. For regular steel track the brackets cannot be more than 4 ft. apart. When the uprights to which brackets are to be fastened are more than 4 ft. apart, it is necessaary to use extra strong steel track.

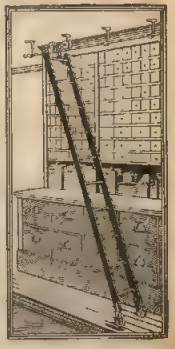
Ladder No. 10, give the exact height from floor to top of base; the width or projection of base and then the exact height from base to the top of shelving or cornice on top of which track is to be fastened. Also state how much the cornice or moulding on top of which track is to be fastened, projects out over lower part of shelving.

Trolley ladder No. 15, is only necessary to give the exact height from floor to ceiling and the exact length of each line of track wanted.

To order wood track for ladders Nos. 2 and 10, it is only necessary to state the number of feet required.

For further information write for special Rolling Ladder Catalogue.

★ **Items Marked Thus ★ Are Shipped From Factory Only.**



Showing No. 15 trolley or ceiling ladder, which suspends from a track fastened to celing.

MILBRADT ROLLING STORE LADDERS

Showing No. 1 bent ladder, which runs on a track fastened to shelving near the top and runs close to wide base shelf.

The Milbradt Rolling Stepladders are all made to order, and to fit each particular place, of good oak lumber, in the most artistic and neatest style, handsomely finished, are durable and perfectly safe, as they cannot jump the track. They take up the least possible space, run noiselessly and so easily, either empty or with operator upon them, that a slight push will propel a ladder the length of an ordinary store. These ladders have an extra wide shelf at the top, which affords great convenience in handling stock. All iron work on ladders, as well as the brackets to hold up steel track, is malleable, artistic and strong and aluminum finished.

No. F1—Suitable fixtures at the top to run on steel track and rubber covered rollers attached near the lower end to run against the edge of base shelf. Best for all around purposes where shelving is reasonably strong. With fixtures★ .....each $36.00

No. F2—For shelving that is not strongly built. Most of the weight of ladder and operator rests on the floor. Runs on a hardwood track at the top and has cushion tired wheels to run on the floor. No track required. Wit fixtures★ ....each $36.00

No. F10—Bent ladder that runs on a flat hard wood track screwed on top of original low shelving. When top of shelving is reasonably strong this is the most convenient way to apply a ladder to this style of shelving. Wit fixtures★ .....each $36.00

No. F15—Trolley or ceiling ladder that suspends from a track fastened to ceiling. Has at the top, suitable iron in which paper filled wheels run noiselessly on the steel track and also has cushion tired wheels that run on the floor. Very strongly built and specially adapted for hardware stores or any place of business where heavy goods are handled. With fixtures, each★ $38.00

Showing No. 2 bent ladder, which runs on floor.

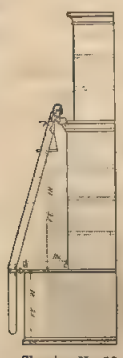
Approximate W't Ladder Crated 50 Lbs.

No, F11—Steel Track—For No. 1, regular strength★ per ft. $0.70
No, F150—Steel Track—For No. 15★ .....per ft. .70

Approximate W't Steel Track 1 lb. per Foot.

No, F20—Hardwood Track—For No. 2, complete★ per ft. $0.50
No, F200—Hardwood Track—For No. 10, complete★ per ft. .50

Approximate W't Steel Track 1 lb. Per Foot.



Showing No. 10 bent ladder, which runs on track screwed on top of original low shelving.

HOW TO ORDER

Ladders as Nos. 1 and 2 give the exact height from floor to top of base shelf; the exact width or projection of base shelf and then the exact height from top of base shelf to top of shelf to which track is to be fastened and the track shell be fastened to a shelf that is about 3 feet from the top.

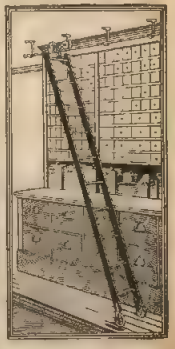
Steel track for ladders No. 1, both regular and extra strong, is 1 inch in diameter and therefore does not block up any space when fastened up opposite the edge of shelf. When ordering steel track give the total length of each line of shelving; second, give distance from center to center of uprights and state how many brackets are required to hold up the steel track. For regular steel track the brackets cannot be more than 4 ft. apart. When the uprights to which brackets are to be fastened are more than 4 ft. apart, it is necessaary to use extra strong steel track.

Ladder No. 10, give the exact height from floor to top of base; the width or projection of base and then the exact height from base to the top of shelving or cornice on top of which track is to be fastened. Also state how much the cornice or moulding on top of which track is to be fastened, projects out over lower part of shelving.

Trolley ladder No. 15, is only necessary to give the exact height from floor to ceiling and the exact length of each line of track wanted.

To order wood track for ladders Nos. 2 and 10, it is only necessary to state the number of feet required.

For further information write for special Rolling Ladder Catalogue.



Showing No. 15 trolley or ceiling ladder, which suspends from a track fastened to celing.

All Saws fitted, ready for use.

Drag Saws Taper ground, add 5% to the List for Each Gauge Taper grinding.

+For Factory Shipment Only

DRAG SAW MACHINES

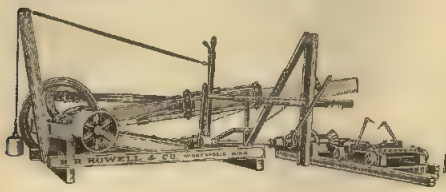
HOWELL PORTABLE

These Machines are equipped as illustrated, but without Pulleys, or Tumbling Rods. We can furnish any size Pulley desired, or Tumbling Rod, at market price.

The Driving Shaft has a Square End to connect direct with Rod Coupling; Main Shaft is made long enough to provide for one 6 in. face Pulley when Belt Drive is desired. In ordering for **Belt Power, state Diameter and Speed of Engine Pulley.**

In ordering for **Horse Power,** advise Make and Style of Power, Number of Revolutions of Tumbling Rod to one Round of Horses, and whether Tumbling Rod turns over with Horses or under and against them.

Where customer has Engine with wide, flat face, and wishes to use Tight and Loose Pulleys on Saw, we will furnish, on request, without extra charge, Main Shaft 6 in. over length.



+SELF FEED

+HAND FEED

Heavy substantial Frame; Large Driving Shaft running in Babbitted Boxes; Heavy Fly Wheel, weighted to balance weight of Saw Pitman; Babbitted Cross Head running on Steel Slide Bars

Simple Power Attachment for feeding Logs forward after each cut, with adjustable Iron Feed Rolls and Truck for rear end of Log; One man attends to raising Saw, drawing Log forward and holding it in place.

Pitman is connected directly to Saw and slides radiate from Crank Shaft, permitting end of Slides farthest from Crank Shaft to be raised or lowered for Logs of different sizes.

Stroke is adjustable to suit Power used.

Can be equipped with **Special Power Attachment** for reversing Log Carriage at extra cost. **Pulley not included in price.**

Same general design as the Self Feed, but of lighter construction and for less power; for farmers and others who want a Machine for few Hands and small Power.

The Saw can be run rapidly without bounding; Logs are held in place by Adjustable Corrugated Rolls; the Log can be moved in either direction after each cut, and the Saw can be raised and pressure regulated when cut is finished, by means of one Lever; Furnished with Main Dog and Dogs on Truck for holding the Log to prevent rolling under the Saw; a Guide prevents Saw from whipping when out of the Log; Babbitted Cross Head running in Steel Slide Bars. **Two Power adjustments**

Each

+No. F331C—Two to Four Horse Power; Capacity 30 Cords per day; 5 ft. Drag Saw; Speed 125 Strokes per Minute; 16 and 20 in. Stroke; 14 ft. Track; Weight 900 Lbs. $187.50

+No. F331D—Four to Six Horse Power; Capacity 40 Cords per day; 5½ ft. Drag Saw; Speed 150 Strokes per Minute; 16, 20 and 24 in. Stroke; 16 ft. Track; Weight 1,150 Lbs. ... 225.00

Two to Four Horse Power; Capacity 20 to 30 Cords per day; 5 ft. Drag Saw; Speed 125 Strokes per Minute; 16 and 20 in. Stroke; 14 ft. Track.

Each

+No. F331E—Without Gearing Attachment; for Belt Power or Horse Power when speed of Tumbling Rod is about 125 Revolutions per Minute; Weight 650 Lbs. Each $137.50

+No. F331F—With Gearing Attachment, Ratio 3 to 1; for Slow Speed Horse Power; Main Shaft long enough so Machine can be changed to Belt Drive if desired; Weight 700 Lbs. Each 150.00

+For Factory Shipment Only; F. O. B. Minneapolis

SHINGLE BANDS

Rolled from high quality Steel Wire; Round, smooth edges; Uniform thickness; Cut to proper Length and Punched

No. P331H—OILED BLACK

Size, In.	½x10	½x11	½x12	½x13
Per 100 Lbs.	$21.00	21.00	21.00	21.00

Weight 25 Lbs. per 1000

No. P331J—GALVANIZED

Size, In.	½x10	½x11	½x12	½x13
Per 100 Lbs	$23.00	23.00	23.00	23.00

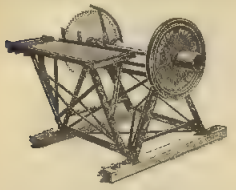
Weight 25 Lbs. per 1000

40 to 46 Bands per Pound; 400 to 500 Lbs. in Barrel

WOOD SAWING MACHINES

Sold without Saw; Shaft is 4 ft. 4 in. Long by 1⅛ in. Diam., turned down to 1⅝ in. for 20 to 30 in. Saws, and to 1⅛ in. for Balance Wheel, Pulley and Boxes.

No rigid Boxes; Nos. 1, 2, 3, 5 and 6 have Ball and Socket Type Boxes; No. 7 has Swivel Boxes; All with compensating features for wear, well Babbitted, and with large Oil Chambers; Horsepower required on Nos. 1, 2, 3 and 7 Machines is 2 to 6, depending on the Size of Saw Blade used; Nos. 5 and 6 require 6 horsepower.



+TILTING TABLE

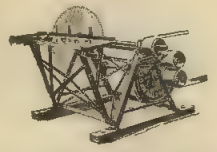
For sawing poles and cordwood into stove lengths; Table has Roller at one end; Balance Wheel and Pulley are interchangeable; Blade regularly to left of operator; Specify if wanted to right; Complete with Saw Guard, 72 Lb. Balance Wheel and 5 in. Diam. by 6 in. Face Pulley; Speed required, 1000 to 1600 revolutions per minute.

+Nos.	F334A	F334A4
Frame	Steel	Wood
Weight Each, Lbs.	265	274
Each	$55.60	58.80

+EXTENSION TILTING TABLE

More especially for long poles; Identical in construction and equipment with No. F334A with addition of 67 in. Tilting Table, so arranged as to extend nearly 5 ft. beyond Saw Blade; Table has Roller at one end; Will handle long poles about as easily as cordwood

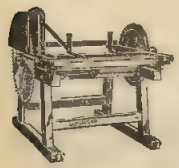
+No.	F334B
Frame	Steel
Weight Each, Lbs.	315
Each	$65.00



+NEW STYLE TILTING TABLE

For any size wood; Balance Wheel is under Frame, where it cannot interfere with the longest pole; Saw can also be stopped more quickly; Otherwise similar in construction and equipment with Nos. F334A and F334A4, 6 in. Diam by 6 in. Face Pulley; Speed required, 1200 to 1800 revolutions per minute.

+Nos.	F334C	F334D
Frame	Steel	Wood
Weight Each, Lbs.	342	382
Each	$77.50	81.30



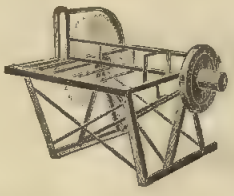
SLIDING TABLE

For poles or cordwood; Table has Anti-Friction Iron Roller which permits it to slide with minimum friction over Metal Track bolted to Frame; Roller at one end of Table; 5 in. Diam. by 6 in. Face Pulley; Speed required, 1000 to 1500 revolutions per minute.

Each

+No. F334E—Wood Frame $77 50

Weight 350 Lbs. Each



SUPERIOR

Sold without Saw; Heavy Angle Steel Frame, securely bolted; 1½ in. Cold Rolled Shafting; For Saw with 1⅝ in. Hole; 5½ in. Diam. by 6 in. Face Pulley; Boxes built on Ball and Socket Joint principle, are perfectly self aligning; Complete with 60 Lb. Balance Wheel and Tilting Table. Speed required, 1000 to 1300 revolutions per minute; Neatly finished in Red and Striped.

Each

No. P334F—For Saws up to 30 in. Diameter $46.50

Shipped Knocked Down; Weight 230 Lbs. Each

+All above, except No. P334F, for Factory Shipment only; F. O. B. Minneapolis; Shipped Knocked Down

BAND SAW MACHINES

One piece Cast Iron Frame, cored out hollow; Upper Shaft Bearing 1½x12 in.; Lower Bearing 1½x15 in.; Belt Shifter Handle on front; Oil Chamber provided for Loose Pulley; Table tilts to 45 degrees; Has quick-acting Lock and accurate Scale; Spring Tension for Saw; Counterbalanced Guide Bar.

Wheel, 36x2 in., 36 in. clear from Saw to Frame; Height clear under Guide, when raised, 36 in.; 28x32 in. Iron Table; 12x4 in. Tight and Loose Pulleys; Speed, 400 to 450 R. P. M.; Length of Saw Blade, 18½ ft.; Height of Table from floor, 40 in.; Height Over-all 92 in.; Floor space required, 39x57 in. Over-all; Power required, 2 to 3 Horsepower.

36 INCH; STANDARD

For all regular work in Factories, Planing Mills, Pattern Shops and other Woodworking establishments. Regularly furnished with ¾ in. Saw Blade, but any other Size, up to 1 in., may be selected without extra charge

Each

+No. F334M—Complete with Anti-Friction Guide above Table, Plain Guide below, Brazing Tongs, Brazing Clamp and Saw Blade $500.00

Weight 1200 Lbs. Each

One piece Cast Iron Frame, cored out hollow; Upper Shaft Bearing, 1x7 in.; Lower Bearing, 1x10¼ in.; Belt Shifter on side of machine under Table; Table tilts to 45 degrees; Has quick-acting Lock and accurate Scale; Spring Tension for Saw; Hexagon Steel Guide Bar.

Wheels, 20x1¼ in.; 20 in. clear from Saw to Frame; Height clear under Guide when raised 7 in.; 18x22 in. Iron Table; 7x3 in. Tight and Loose Pulleys; Speed, 400 to 450 R. P. M.; Length of Saw Blade, 10 ft. 1 in.; Height of Table from floor, 40 in; Height Over-all, 87 in.

With Plain Guides above and below Table, Brazing Tongs, Brazing Clamp and Saw Blade.

20 INCH; FOR LIGHT WORK

Each

+No. F334P—Belt Power; Floor Space Over-all, 20x30 in.; Weight 335 Lbs. Each $150.00

+No. F334R—Foot Power; Floor Space Over-all, 24x40 in.; Weight 415 Lbs. Each 170.00

+No. F334T—Foot and Belt Power; Floor Space Over-all, 30x40 in.; Weight 440 Lbs. Each 180.00

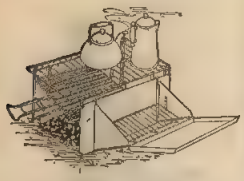
NUGGET FOLDING CAMP STOVES

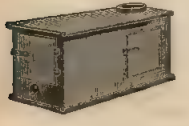


Size 13x21½ in. Frame and all bars made of selected heavy steel wire. Wind shields made from best polished steel sheets. All cross bars reinforced with a bar which is attached at right angle. All joints are securely welded together. Legs extend below sides and are sharpened so that they can easily be shoved into the ground to hold the stove in position. Has detachable oven made of polished steel sheets.

No. 4—Size 13x21½ in., outfit complete consisting of camp stove, broiler and toaster, detachable oven, extension handle, frying pan 10x2 in., and canvas kit bag, size stove folded 23x13x4 in. .....each $8.50

ONE IN A CRATE, WT 12 LBS.

OUTING STOVES



No. T60C—Outing, sheet steel, folding, with hinged doors, sliding circular joints, size 26x10x11½ in., oven 8x10x6 in., takes 5 in. pipe, w't 12½ lbs. .....each $9.20

ONE IN SHIPPING CASE

FOLDING CAMP STOVE

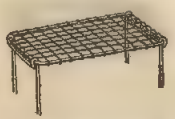
AMERICAN

Open, Ready for Use

To operate, remove cover, place the tank in position and the stove is ready to light. No loose parts to become lost. Nothing to screw together or assemble. No alcohol or torch required to light it. It produces an intensely hot flame when burning at full capacity, although the burners can be regulated to a low fire if desired. It is only necessary to generate one burner, this produces the gas for the second burner which may be turned on or off at will.

No. T3—"Kamp-Kook," two burner enclosed in a neat black enameled steel case with handle. Size of stove folded 14½ in. long, 8 in. wide, 3½ in. high. Burns gasoline, w't 8 lbs., each $10.00

CAMP GRATES

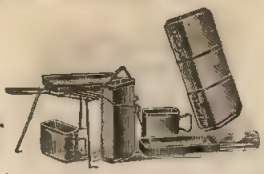


REVERSIBLE standing or folding broiler.

No. 129—One piece, 9x14 in., w't per doz. 18 lbs. .....per dozen $15.00

No. 130—Double, 14x18 in., w't per doz. 36 lbs. .....per dozen $21.50

POCKET KOOK-KITS

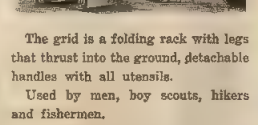


Can be easily put together and taken apart. The two pans are designed for use as separate frying pans or roasting pans, by simply placing both bottoms together, one on top of other. The rims are seamed to form close fitting vessels. Will fit any coat pocket.

No. 2R—Consists of two 9x4x1 in. pans, two 4½x2½x3 in. drinking cups, one 4½x2½x3½ in. coffee, soup and water boilers, all made of heavy tin with detachable heavy wire handles, a collapsible fire grate 7x8 in. with four heavy wire legs, 7½ in. long, all parts on grate electric welded, w't 2 lbs. .....per dozen $56.00

TWO DOZEN IN A CARTON

UPTON'S SCOUT MESS KITS



The grid is a folding rack with legs that thrust into the ground, detachable handles with all utensils.

Used by men, boy scouts, hikers and fishermen.

THE HUSUN YACHT COMPASS.

LA BRUJULA "HUSUN" PARA YATES. *BOUSSOLE DE YACHT "HUSUN."*

(AC)

The best compass yet designed for yachts, and an instrument of proved efficiency and design. Of the liquid type it consists of a 5½-inch compass bowl fitted with efficient expansion chamber, and a 4-inch floating card made of special celluloid with black markings on white. The bowl swings in gimballs of approved pattern, making navigation possible in the heaviest roll. The window is thoroughly watertight and the compass has a storm-proof lamp fitted at the side.

Particulars and Prices on application.

C'est la meilleure boussole qui existe pour yachts; instrument de précision et de construction éprouvée. Elle est du type à liquide et consiste en une boussole montée sur cuvette de 140 mm. de diamètre avec chambre d'expansion et carte flottante de 102 mm. de diamètre, faite en celluloïde spécial avec graduation en noir sur blanc. La cuvette oscille sur balanciers d'un modèle perfectionné, rendant la navigation possible même par les plus gros roulis. La fenêtre est absolument hermétique à l'eau et la boussole est munie d'une lampe latérale, résistant à toutes les tempêtes.
Renseignements et prix sur demande.

Esta es la mejor brujula diseñada hasta ahora para yates, y es un instrumento de eficiencia y diseño bien probados. Es del tipo liquido y consiste en una caja de brújula de 140 mm. provista de una cámara eficiente de expansión y de una rosa flotante de 102 mm. fabricada de celuloide especial con graduaciones negras sobre un fondo blanco. La caja oscila entre balancines de un modelo acreditado, lo que hace posible la navegación por fuerte que sea el balanceo. La ventanilla es completamente estanca y la brújula va provista de un farol á prueba de tormentas fijado al lado.
Precios é informes detallados á solicitud.

Cheapest, lightest and most compact decoy made. Easily carried in a hunting coat.

No. 25—Folding decoys, life size, drakes and hens assorted. A good photographic reproduction of the Mallard duck is printed in natural colors on tough jute fibre board similar to stock used in manufacture of high grade shot gun shells, and so thoroughly waterproofed they last indefinitely when properly cared for. Decoy is composed of fiber-board body which folds flat, with full instructions printed on bottom of each decoy. Thin cedar float, also thoroughly waterproofed, slides snugly inside body to spread decoy and float it. The balancing device attached to the float makes tipping impossible. No more effective decoy made and none to be compared for convenience, w't complete 8 oz., per dozen $8.80

ONE DOZEN IN TWO COMPACT CANVAS BAGS WHICH CAN BE CARRIED IN HUNTING COAT

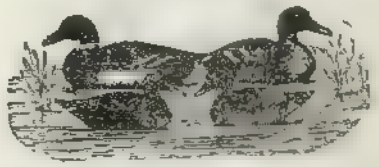
Carry a line of goods upon which you can rely.

The dealer who carries H. S. B. & Co. Brands marks his store as a place where the better goods are sold.

A house with over sixty-seven years' experience stands back of our brands.

MASON'S DECOY DUCKS

SOLID



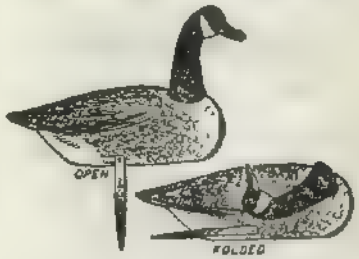
Flat bottomed, float evenly on water, well balanced, assorted, one-third female, two-thirds male.

Glass eye, cedar decoys, good quality from selected white cedar. Painted in natural colors true to life. **Mallard, Blue Bill, Red Head, Sprig Tail, Blue Winged Teal** and **Canvas Back.**

No. T1—Full one dozen box, per dozen $22.00
No. 1—Less than box ...dozen 22.00

ONE DOZEN IN A BOX, AVERAGE W'T PER DOZ. 30 BS.

FOLDING CANADA GEESE



No. 12—Canada geese decoys for land shooting, profile wooden bodies, folding wooden heads and folding wooden sticks which may be pressed into the ground, natural appearing, w't per doz. 6 lbs., per dozen $18.20

ONE DOZEN IN A NEAT CARRYING BOX

LIVE DECOY FASTENERS

Fastens around neck and has many advantages over leg fastening. Ducks can remain in water longer, as they have better use of their feet. Don't splash water all over you when taking them up.

No. 17—Samuell, flat brass collar, hinged to admit of fastening, riveted ring for cord, w't per doz. 3 oz. per dozen $4.00

FOLDING WOOD DUCKS

ILLINOIS RIVER PROFILE DECOYS, 3 in group, 2 male and 1 female, painted in natural colors to represent male and female, w't per doz. 10 lbs.

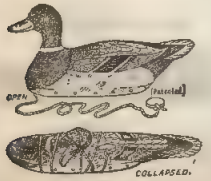
Four floats take one dozen decoys. One cord and anchor for three decoys.

No. 6—Mallards, w't per doz. 9½ lbs., per dozen $14.70

No. P6—Canvas Backs, Blue Bills, Black Mallards, Whistlers, Red Heads, Teal, Widgeons, w't per doz. 10 lbs. .....per dozen $14.70

ONE DOZEN IN A STRONG SHIPPING CARTON

AUTOMATIC CANVAS DUCKS

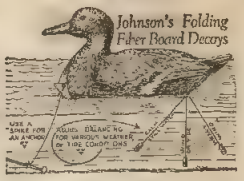


Open up automatically, no lever, no cranks, no air pressure, expand by means of spring when cord is unwound. Light in weight, pack in small space, can be collapsed quicker than any other decoy made, give good service and are hand painted, true to life.

No. 14—Collapsible decoys, mallard only, canvas body, wooden float and head block, one wire spring head support, one wire tail support, complete with anchor and cords, assorted 8 males and 4 females to the dozen .....per dozen $18.20

ONE DOZEN IN A NEAT CARRYING BOX, WITH HANDLE; WT PER DOZEN ABOUT 13½ LBS.

JOHNSON'S FOLDING FIBRE-BOARD DUCKS



MALLARD

Cheapest, lightest and most compact decoy made. Easily carried in a hunting coat.

No. 25—Folding decoys, life size, drakes and hens assorted. A good photographic reproduction of the Mallard duck is printed in natural colors on tough jute fibre board similar to stock used in manufacture of high grade shot gun shells, and so thoroughly waterproofed they last indefinitely when properly cared for. Decoy is composed of fiber-board body which folds flat, with full instructions printed on bottom of each decoy. LIVE DECOY FASTENERS

Fastens around neck and has many advantages over leg fastening. Ducks can remain in water longer, as they have better use of their feet. Don't splash water all over you when taking them up.

No. 17—Samuell, flat brass collar, hinged to admit of fastening, rivveted ring for cord, w't per doz. 3 oz. per dozen $4.00

DECOY ANCHORS

No. 15—Made from galvanized, malleable iron, with large loop wide enough to go over the head of the decoys and small loop for anchor cord, w't per doz. 5½ lbs., per dozen $2.90

No. 16—Made from iron, japanned. W't about 1½ lbs. each. Is heavy enough to securely hold live, as well as wood, decoys, is not easily fouled in snags and very convenient for winding the anchor cord when not in use, per dozen $3.70

BALANCE WEIGHTS

FOR WOOD DECOYS

No. 18—Made of cast iron. Have eyelets for anchor cord and two nail holes for fastening the weight to the decoy. These weights are easily attached, will balance the decoys so that it sets upright properly in the water, also are cheaper than lead strips, w't per doz. 8½ lbs., per dozen $1.80

GAME CARRIER

No. 0—Barnum, 2 tinned steel loops, stitched tan duck connecting strap, length folded 8 in., w't per doz. 2½ lbs. .....per dozen $3.00

LOOSE

CALLS

No. 760—Duck, cocobola wood, nickel tip .....per dozen $8.40

ONE DOZEN IN A BOX

No. 768—Allen's, duck, wood shell, nickel plated end, per dozen $14.00

The Allen Cal is as near perfection as can be attained being tuned by Mr. F. A. Allen, who is one of the oldest and most expert duck hunters in the country.

HALF DOZEN IN A BOX

THE BROADBILL DUCK CALL will reproduce, with perfect accuracy, any call of our native ducks; will not break in tone by loud calling, operates with less effort than any other call on the market and has excellent tone quality.

It is made in two pieces, allowing the reed to be fastened securely to one side by the use of a metal clamp. Reed is made of the very best hard rubber and for durability cannot be improved upon.

The duck bill shape of the mouth piece gives the user a chance to manipulate this call much more freely than other calls, thus to obtain better results.

No. 767—W't per doz. 1⅞ lbs., per dozen $12.60

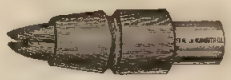
ONE IN A CARDBOARD BOX WITH FULL INSTRUCTIONS. ONE DOZEN IN A CARTON. SIX DOZEN IN A SHIPPING CARTON

Non-corrosive and is easily adjusted to suit the different voices of Mallard, Pintail, Widgeon and other ducks without effecting the reed.

No. 769—Ditto's, duck, fitted with hand made rubber reed, rubber and cork inner parts, outside part of hard maple wood and spun brass, per dozen $21.50

ONE DOZEN IN A BOX

CALLS



This Call is the most natural toned, easiest blowing Crow Call on the market. Is always ready for use. Any inexperienced hunter can successfully call Crows. The Crow is one of the worst destroyers of our game birds and their nests. Every sportsman should help rid the country of these pests, who are busy from early dawn until dark, traveling in flocks over fields, prairies, woodlands and lakes, destroying the nests and young birds. In closed season the hunter enjoys this pastime of hunting Crows.

No. 780—Allen's Crow, wood shell, nickel plated end, w't per doz. 1½ lbs., per dozen $11.90

ONE DOZEN IN A BOX

OLTS FAMOUS CALLS

DUCK

A high grade call with a natural sound. It is constructed of hard rubber throughout. The reed is made of a specially prepared hard sheet rubber. This construction insures the calls against damage by climatic conditions.

No. 766—W't per doz. 1½ lbs., per dozen $11.20

ONE DOZEN IN A BOX

CROW

Easy to operate and will imitate a crow perfectly. It is made of fine hard polished rubber. The reed is also rubber. This construction insures the call against climatic conditions.

No. 764—W't per doz. 11 ozs., per dozen $11.20

ONE DOZEN IN A BOX

SINGLE BARREL TRAP GUNS

ITHACA

NO. 4E GRADE

Barrel—Very high grade of fluid steel, exceedingly tough, hard and strong, especially adapted for nitro powder, ventilated rib, automatic ejector.

Stock—Well finished walnut, full or half pistol or straight grip, carefully hand checkered and figured gold shield in stock, beaver tail fore-end, hard rubber butt plate.

Frame—Engraved with trap shooting scene on one side and American Eagle design on the other, hardened and polished trigger, equipped with lightning lock, bolted at three points, will stand the continuous strain of heavy trap loads, hammerless.

No. F4E—12 gauge, 30, 32 or 34 in. barrel, w't 7¾ to 8¾ lbs.★ .....each $211.55

NO. 5E GRADE

Frame, top lever, fore-end iron, guard and trigger plate elaborately engraved by hand. Beautiful leaf and flower design on sides of frame and trigger plate; quail inlaid in silver on right side of frame; pheasant inlaid in silver on left side. American Eagle design on trigger plate. Triple gold plated or hardened, polished trigger. Gold shield in stock.
No. F5E—12 gauge, 30, 32 and 34 in barrel, w't 7¾ to 8¾ lbs ★ .....each $296.15

NO. 6E GRADE

Frame, top lever, fore-end iron, guard and trigger plate very elaborately hand engraved. The first American shooter was the Indian with his bow and arrow. This original design is most skillfully inlaid in green and yellow gold and silver on one side of frame. The very latest American shooter is the trapshooter. The down-to-date trap gun is the "one-barrel" built for this special purpose. This down-to-date man and his gun were also designed especially for us and are inlaid in the most artistic manner on the other side of the frame. An American Eagle of special design is engraved on trigger plate. Triple gold plated or hardened, polished trigger. Gold shield in stock.

No. F6E—12 gauge, 30, 32 or 34 in. barrel, w't 7¾ to 8¾ lbs ★ .....each $440.00

"VICTORY GRADE"

The Ithaca Victory Grade single barrel trap gun is a gun the shooters have been looking for—a thoroughbred single barrel trap gun at a popular price. While it is not as elaborately finished as the higher priced guns it has very good lines and is built to "stand the racket" of trap shooting. The Victory Grade gun comes only in the following standard dimensions and absolutely cannot be built to order.

Barrel is 12 gauge, 34 in., fitted with matted, ventilated top rib, brass front and rear sights, stock, straight, grip, hand checkered, 14⅛ in. long, 1⅝ in. drop at heel, 1⅛ in. drop at cone, fitted with recoil pad. "Beaver-Tail" hand-checkered fore-end.

Frame, top lever, trigger plate, fore-end iron and guard, line engraved.

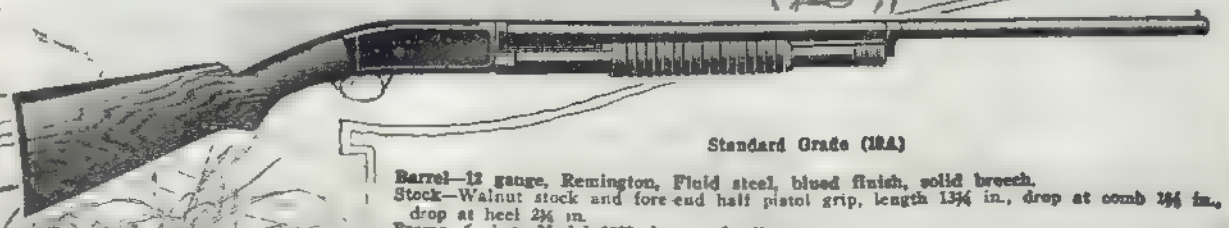
Center position trigger, non-ejector.

No. F8—12 gauge, 34 in. barrel, w't 8 to 8¾ lbs.★ .....each $126.90

★ Items Marked Thus ★ Are Shipped from Factory Only.

REMINGTON

REPEATING HAMMERLESS



Standard Grade (18A)

Will furnish made to order without additional charge, straight or pistol grip stock in any dimensions desired.
No. F180R—Raised matted rib, w't about 7¾ lbs★ .....each $178.60

★ Items Marked Thus ★ Are Shipped From Factory Only.

SINGLE BARREL TRAP GUNS

L. C. SMITH

SPECIALTY TRAP GRADE

Barrel—Nitro blued steel or Damascus steel, compensating ventilated top rib, automatic ejector, any bore desired, chambered for 2¾, 2⅞ or 3 in. shells.

Stock—Fine quality walnut, full or half pistol or straight grip to order, checkered grip and fore-end.
Frame—Beautifully engraved, hammerless.

SPECIALTY GRADE

The compensating ventilated top rib automatically adjusts itself for the 70 degrees difference between the barrel and rib during constant shooting and so cannot buckle the barrel. The sides of the rib are made parallel to insure quick and accurate sighting.

No. F2ST—12 gauge, 30, 32 or 34 in. barrel, w't 7½ to 8¼ lbs.★ ..... each **$235.90**

EAGLE GRADE

The decoration, while not elaborate, is of a nature to give the style that classes it far above the usual. On the left lock plate appears a ring-necked pheasant in bold relief against a frosted back ground; and on the right a duck in full flight. The top and bottom of the frame are ornamented with scroll work of artistic design.

No. F3ET—12 gauge, 30, 32 or 34 in. barrel, w't 7½ to 8¼ lbs.★ ..... each **$321.20**

CROWN GRADE

The detail of the gold inlay and engraving is delicate and pleasing to the most critical eye.

No. F4CT—12 gauge, 30, 32 or 34 in. barrel, w't 7½ to 8¼ lbs.★ ..... each **$443.30**

MONOGRAM GRADE

The engraving, embodying scroll and relief work, is of the utmost distinctiveness both in design and execution. The barrels are chosen of Monogram steel with a view to strength, service, proper balance and quick handling. The stock is from imported walnut, carefully finished, and is in keeping with the entire gun.

No. F5MT—12 gauge, 30, 32 or 34 in. barrel, w't 7½ to 8¼ lbs.★ ..... each **$634.70**

FOX

J GRADE

Barrel—Highest grade Chromox Fluid steel; sliding ventilated top rib; automatic ejector.
Frame—Beautifully engraved; heavy tapered steel cross bolt; one-piece nickel steel hammer; Coil springs throughout.
Stock Fine quality walnut, full or half pistol or straight grip to order, checkered grip and fore-end.

No. FJTE—12 gauge, 30 or 32 in. barrel, w't 7½ to 8¼ lbs.★ ..... each **$264.50**

A wonderfully, close, even shooting gun with the highest quality of workmanship and finish throughout.

★ **Items Marked Thus ★ Are Shipped From Factory Only.**

*GURNEY GROCERY REFRIGERATORS

COMBINATION COOLING ROOM AND REFRIGERATOR

No. 74

Made throughout of hardwood, golden oak finish, insulation is quilted linofelt of several thicknesses, with dead air spaces between each thickness. In the method of installing the insulation which retards the transmission of heat, the linofelt is applied around all corners of the inner case, while the ordinary way of insulating the top, bottom, back and ends is to place insulation between wood cleats and framing and only within several inches of the corners, where corner lumber is used to support the construction. All broken joints are eliminated through which warm air can pass. Linofelt insulating quilt closes all joints. Ice compartments are lined with heavy gauge galvanized steel, leaving no woodwork exposed to absorb moisture or odors. All parts are removable for cleaning. Trimmings are heavy solid bronze, with drop lever fasteners, nickel plated. Casters are self retaining.

Right hand compartment fitted with meat hooks. Upper half of large door is provided with auxiliary door to meat compartment. Lined entirely with heavy gauge galvanized steel.

No. 74. Ice capacity 700 pounds, weight crated 1040 pounds..... $

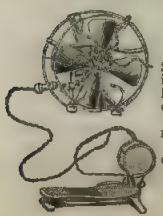
FAN ATTACHMENTS

For use with Sew-E-Z Sewing Machine Motors.



Permits any Jack Rabbit Type Sew-E-Z sewing machine motor to be instantly converted into an electric fan of equal efficiency to the most expensive fan motor of equal size. The speed can be regulated by means of the foot control.

Full nickel plated and polished; diameter of blades 6½ inches.

No. FA—Weight each about 1 lb	*$3 00*	6 00

One in a carton.

✠F. O. B. Ohio or Massachusetts Factories Only.

SEWING MACHINE MOTORS

JACK RABBIT TYPE—SEW E-Z

One of the cleverest devices ever invented for the home. Will operate any high-arm sewing machine (new or old) and immediately converts it into an electrically self-operated labor saver. No belt is necessary, requires neither screws, bolts, nor clamps to fasten, as the springs hold the pulley of the motor against the wheel and gives the firm friction drive. Simply set it on the machine next the hand wheel, so that the little cork pulley bears lightly against the latter.

Place the self-starter in any convenient position on the floor, and attach the plug to any ordinary electric light socket.

The speed of the motor can be varied from 200 to 1800 revolutions per minute by pressing lightly on a treadle with the foot. A rheostat is operated by the treadle. It runs on direct or alternating current, and on frequencies from 25 to 60 cycles.

Nos.	JR-110-U	JR-220-U	JR-32-U

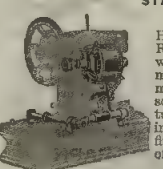
In lots of 12 or more, Each	37 50	✠42 00	42 00

One in a wood box; weight each about 9¼ lbs.

STAR MOTOR



In construction and principle the Holdfast type is similar to the Jack Rabbit type, except that it is equipped with a bracket which fastens it permanently to the head of the sewing machine. The bracket is constructed so that it permits the motor to be turned in under the head of the sewing machine when it is closed. Will fit and operate any make or model of high head sewing machine.

Polished nickel plated finish. Equipped with speed control and operates on either direct or alternating current, 25 to 60 cycles. Complete with cord and attachment plug.

Fishing Rods As Business Builders

THERE IS NOTHING like genuine quality for building up profitable business in fishing tackle. Like all Heddon tackle, our bait casting rods are built to give your customers the best possible value for their money so they will come back to your store when they want something else.

The original Heddon two-piece construction with long tip and short butt gives several advantages—light, free and easy balance; longer casts more accurately made; less likelihood of breakage under severe strain; long life.

Heddon Rods are made only from the finest quality of split bamboo, built up by our own private process under rigid inspection. Thoroughly tested and seasoned before sent out. Trimmed and finished in keeping with their high quality.

Now, as always, Heddon-Dowagiac stands for the best possible quality at a fair price. You can sell Heddon Rods and Tackle with the full knowledge that they will make and hold satisfied customers for you. Catalog on request.

Railway Dining Car Kitchener Gas Heated.

POELE-FOURNEAU, CHAUFFE AU GAZ, POUR WAGONS-RESTAURANTS DES CHEMINS DE FER

COCINA PARA VAGONES-RESTAURANTES (Calefacción a Gas)

This piece of Apparatus may well be described as a kitchen in itself, comprising as it does Roasting Oven, Hot Closet, Grill, Hot Water Boiler and Gas Hot Plate. The Oven is at the bottom and is constructed on the regenerative principle. Immediately above comes the Hot Closet, heated by waste gas from the oven. The doors of the oven and closet have special catches to prevent them swinging open on the train taking a curve at a high speed or on a sudden application of the brakes. Next above the Hot Closet we have the Grill. The burners of this Grill are divided into two unequal parts thus giving three rates of working :-(1) the smaller part alone; 2) the larger part alone; (3) both parts together. The Gridiron can be controlled by a handle placed on the outside and away from the heat. At the top we have the copper water boiler for supplying hot water for Hot Plate work. The Hot Plate can be fitted with either 9 or 12 burners. The cocks for controlling the burners for the entire apparatus are conveniently grouped together as shown. These kitcheners are in use by the following Railway Companies :—L. & N.W. Rly., G.N. Rly., L. & S.W. Rly., G.W. Rly., G E. Rly., and N.E. Rly., England; G.S. & W. Rly., Ireland; N.B. Rly., Scotland; and the G.I.P. Rly., N.W. Rly., and Bombay and Baroda Rly., India.

JOYCE SUSPENSION JOURNAL JACK

Clamp Type, for inspecting Journal Boxes and Re-brasing Journals of all kinds; Does not touch ground, is applied on Axle Collar, holding Wheel firmly down against Track; Only a Short Rise required to lift Journal Box sufficiently to remove and replace Brass, Head Cap is adjustable, enabling use with any Standard M. C. B. Journal, Is extremely Light, very Strong, and about four times as Fast as ordinary Journal Jack, Eliminates Spotting of Car over Tie, or Blocking; Screw runs in Bronze Nut, Ratchet Lever operates so easily that only 24-inch Lever is required, thus enabling easy handling in close quarters.

No. F406-1030—Weight 60 Lbs. Each..... Each *$70 00*

Small Base

Small Base Type Jack; Made with Small Square Base for use where firm foundation can be secured and working space will not admit of a large Base.

Broad Base

Broad Base gives solid foundation where Jacks stands on ground or light boards and there is sufficient room for Jack underneath load; Used principally for railroad work in machine, car and locomotive shops.

Ground Lift

Ground Lift Type Jack; Used principally in railway wrecking cars, machine shops and for moving where there is not room to get Head of Jack underneath load; Ground Lift Claw and Sleeve are cast as one piece and rigidly secured to Head of Jack

JOYCE HYDRAULIC; INSIDE PUMP

SCREW JACKS

DUFF; STANDARD SPEED; BALL BEARING

Refined Malleable Iron and Steel; Gears are Drop Forged from High Carbon Steel, and have Machine Cut Teeth; Raises load by means of Crucible Machinery Steel Screw with Special Thread, which revolves in a Bronze Nut; The load is carried on a large Ball Bearing which gives minimum friction with greatest strength; The Bearings consists of Two Hardened Ground Tool Steel Plates, each has a Groove in which the Balls roll. Each Ball is in a Separate Bronze Cage, eliminating all friction between them. All have Foot Lift for low set body

Nos. P407-66 and P407-60

Nos. P407-67 and P407-61

Nos. P407-68 and P407-62

No. P407 64

For bridge work, repair shops, yards, for handling structural material; for use on steam shovels, or for industrial concerns, trucking companies, machine shops, mills and factories, Operated by a single Ratchet and Bevel Gears.

DUFF; HIGH SPEED; BALL BEARING; WITH CYCLONE FAST LOWERING DEVICE

Worm on top with Crank Handle, assures fast raising to load and quick easy lowering under load, Lowering requires only a fraction of effort for raising; Load can be adjusted to smallest part of an inch by Crank.

No friction disc; Load is held mechanically by Automatic Roller Pin Clutch, which remains positive regardless of wear; No possibility of Jack dropping; Crank Handle can be inserted at both ends of Worm so that it can be turned regardless of position of Jack or load.

Cold Drawn Steel Shell and Stem; Special Alloy Steel Heat Treated Screw, 1 in. Pitch, Double Thread, Diameter is less than in other high speed Jacks, making operation easier; Special Analysis Bronze Nut with tensile strength of 90,000 Lbs.; Case Hardened Alloy Steel Bearing Balls; Tested to 110,000 Lbs., Case Hardened Chrome Nickel Steel Ball Bearing Plates; Case Hardened Alloy Steel Automatic Clutch for retaining and lowering of load, Pinion Shank Bearing lined with Heavy Phosphor Bronze Bushing reducing friction and wear to minimum

Heavy tin, concave.

No. 76—7 oz., per dozen $2.50
No. 77—10 oz., per dozen $2.80

FLAME PROTECTORS

Wind and rain proof.

Fit over burner tip and protects flame against wind and rain.

No. 170—For lamps 85, 407, 417, 100 and 95 lamps .....per dozen $1.50

No. 171—For Nos. 50, 661 and 676 lamps .....per dozen $1.50

JUSTRITE MINERS' CARBIDE LAMPS

Brass finish, brass or nickel plated, burning capacity, 2½ hrs., w't 5 oz., charge 2 oz. carbide, height 3¾ in., diam. of bottom 2 in., 16.7 candle power.

WIRE FEED

Round Hook, 2½ in. reflector.

No. 407—Lamp only ..dozen $18.50

No. 85—Lamp with No. 77 carbide can .....per dozen $21.00

Flat Hook.

No. 417—Lamp only, per dozen $18.50

NEW DRIVERS' LAMP

Special silvered reflector and flame protector.

Polished brass, polygon feed, deep concaved silvered reflector, 2⅝ in. in diam. Equipped with No. 170 flame protector making lamp wind and drip proof. Excellent for wet mines.

No. 787—Round hook, dozen $22.00

No. 797—Flat hook ...dozen $20.00

ABOVE, ONE DOZEN IN A CARTON. W'T 6 LBS.

JUSTRITE SUPERINTENDENTS' LAMPS

Brass, heavily nickel plated, 18 C. P. with folding handle and lighter attachment, equipped with flame protector, carbide can included with lamp. Also for hunting, fishing, camping.

No. 100—2½ in. reflector, burns 3 hours, w't per doz. 9 lbs., per dozen $27.00

No. 95—3 in. reflector, **burns 4 hrs.,** w't per doz. 8 lbs. per dozen $36.00

ACME STEEL LAMP

FOR METAL MINES

All steel lamp with a dependable water feed and reflector strongly attached which cannot easily become bent, broken or lost. Burning capacity 5 hours, 18 C. P., w't 15¼ oz., charge 5 oz., height 5¼ in., height to top of bail 7⅛ in., diam. of reflector 3 in. Equipped with flame protector, making lamp wind and drip proof.

No. 50—Weight per doz. 13 lbs., per dozen $54.00

ONE IN A BOX

VICTOR CAP LAMPS

Miners preferring an "upright" or "vertical' style lamp will find the Victor equipped with a dependable water feed, a reflector rigidly attached to lamp not easily bent, broken or lost.

Brass, round hook, 2⅝ in. reflector.

No. 661—Lamp only, w't per doz. 6 lbs. .....per dozen $18.50

ONE DOZEN IN A CARTON

Brass, flat hook, 3 in. reflector.

No. 676—Lamp only, w't per doz. 6 lbs. .....per dozen $20.00

ONE DOZEN IN A CARTON

GUY'S DROPPER MINE LAMPS

No. 22SL.

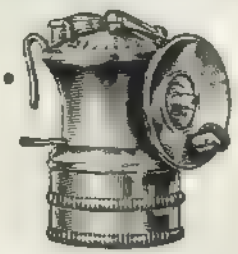
Brass lamp, bright finish. Polished brass reflector fastened to lamp with lock nut screw on burner tube, strongly reinforced on back to protect from accident. Intended for use in rooms or entries with high roofs.

No. 22SL—2½ in. reflector, **round** hook, hexagon bottom, per dozen $18.50

No. 422SL—2½ in. reflector, **flat** hook, hexagon bottom, per dozen $18.50

No. 423SL—3 in. reflector, **flat** hook, hexagon bottom ..per dozen $19.00

AUTO-LITE MINE LAMPS



Improved water dropper, which does not clog and requires no cleaning. Equipped with self-lighter. Light in weight but strong and durable.

Burning capacity 3½ hours. W't 6 lbs.

No. 11—Polished brass, per dozen $18.00

No. 12—Nickel plated brass, per dozen $19.00

ONE IN A BOX, ONE DOZEN IN A CARTON THREE DOZEN IN A SHIPPING CARTON.

HULL.

DIMENSIONS.
Length, 293 ft. 0 in.
Breadth, 40 „ 0 „
Depth, 21 „ 6 „
Draught (loaded) 18 „ 0 „

SPEED, 9½ knots.
Deadweight, 3,000 tons.
Bunkers, 275 tons.

CONSTRUCTED of mild steel, divided into six compartments by watertight bulkheads, having a cellular double bottom extending the whole length of machinery and cargo spaces.

Raised Poop, Bridge and Forecastle.

Lighted throughout by Electricity.

BOATS. Two 20 ft. seamless steel Lifeboats and one 18 ft. Motor Boat

One Carpenter's Raft.

Wireless Telegraph Installation.

STEAM WINCHES. One of 5 tons and three of 3 tons.

Steam steering Gear and Windlass entirely fitted and furnished as is usual for service as a cargo steamer and made ready for sea.

MACHINERY.

ENGINES. Vertical Inverted Triple expansion of 1,200 I.H.P.

BOILERS. Two Cylindrical Single-ended Return Tube Boilers fitted with Howden's system of Forced Draught.

CONDENSER (Cylindrical). Shell of wrought steel supported on back columns.

PUMPS. Air Pump with two Feed and two Bilge Pumps worked by levers from Main Engine.

CIRCULATING PUMP. Independent and of centrifugal type.

Ballast and General Service Pumps of the Duplex Type.

Auxiliary Feed Pump of the single cylinder direct acting type.

COQUE

DIMENSIONS

Longueur 89,30 *mètres* — *Vitesse*, 9½ *nœuds*.
Largeur 12,18 „ — *Poids mort*, 3,000 *tonnes*.
Profondeur 6,55 „ — *Soutes*, 275 *tonnes*.
Tirant d'eau (à plein chargement), 5,48 *mètres*

Construits en acier galvanisé divisé en 6 compartiments par des cloisons étanches à double fond cellulaire s'étendant sur toute la longueur de la salle de machines et des cales.
Poupe sur élevée, pont et gaillard d'avant.
Entièrement éclairé à l'électricité

CANOTS. Deux canots de sauvetage sans soudure en acier, de 6,09 mètres, de longueur et un canot automobile de 5,48 mètres.
Un radeau de charpentier. Installation de télégraphie sans fil

TREUILS À VAPEUR. Un de 5 tonnes et trois de 3 tonnes

Mécanisme de gouvernail à commande par la vapeur, et guindeau entièrement équipé et monté comme d'habitude pour le service habituel de navires marchands, et prêt à prendre la mer

MACHINERIE.

MACHINES. Verticales, à triple expansion, de 1200 S.H.P.

CHAUDIÈRES. Deux chaudières cylindriques à fond unique avec tube de retour, munies du système de tirage forcé "Howden"

CONDENSEUR (Cylindrique). En fonte en acier forgé supporté sur colonnes postérieures

POMPES. Pompe à air avec deux alimentations et deux pompes de cale actionnées par leviers de la machine principale

POMPE DE CIRCULATION. Indépendante et du type centrifuge

Pompe pour lest et pour service général, du type "Duplex."
Pompe alimentaire auxiliaire du type monocylindrique à action directe.

КОРПУСЪ.

РАЗМѢРЫ.

Длина 293 фута — Скорость хода, 9 узловъ.
Ширина 40 футовъ — Грузоподъемная способность, 3,000 тонны.
Высота 21 футъ 6 дюймовъ.
Осадка (Нагружена), 18 футовъ. Угольныя ямы, 275 тоннъ

Построенъ изъ оцинкованной стали, раздѣленъ на шесть частей водонепроницаемыми переборками, съ двойнымъ клѣтчатымъ дномъ, простирающимся во всю длину машиннаго помѣщенія и грузовыхъ трюмовъ.

Приподнятая кормовая палуба, рубка и бакъ.
Освѣщеніе всецѣло электрическое

ШЛЮПКИ. Двѣ 20ти футовыхъ, безшовныхъ, спасательныхъ шлюпки и одна 18ти футовая моторная лодка
Одинъ плотничій плотъ.
Установка безпроволочнаго телеграфа.

ПАРОВЫЯ ЛЕБЕДКИ. Одна въ 5 тонны и три въ 3 тонны каждая
Паровой штурвалъ и якорная лебедка. Полное снаряженіе и уборка сообразно съ службою въ качествѣ грузоваго парохода и готовый къ отплытію въ море

МАШИНЫ

МАШИНА. Вертикальная, типа опрокинутаго типа съ тройнымъ расширеніемъ, въ 1,200 норм. лош. силъ.

КОТЛЫ. Два цилиндрическихъ одностороннихъ котла съ обратнымъ ходомъ пламени, снабженныхъ гоуденской системой для форсированія тяги.

ОПРѢСНИТЕЛЬ (Цилиндрическій). Корпусъ изъ ковкойстали помѣщенъ задними колоннами.

НАСОСЫ. Воздушный насосъ съ двумя питательными и двумя трюмными помпами, пускаемыхъ въ ходъ при посредствѣ рычаговъ отъ главной машины

ЦИРКУЛЯЦІОННЫЙ НАСОСЪ. Самостоятельный и центробѣжный

Насосы для отчерпыванія водянаго балласта и общихъ нужнъ двойного дѣйствія.

Вспомогательный питательный насосъ одноцилиндрическаго, прямого дѣйствія типа.

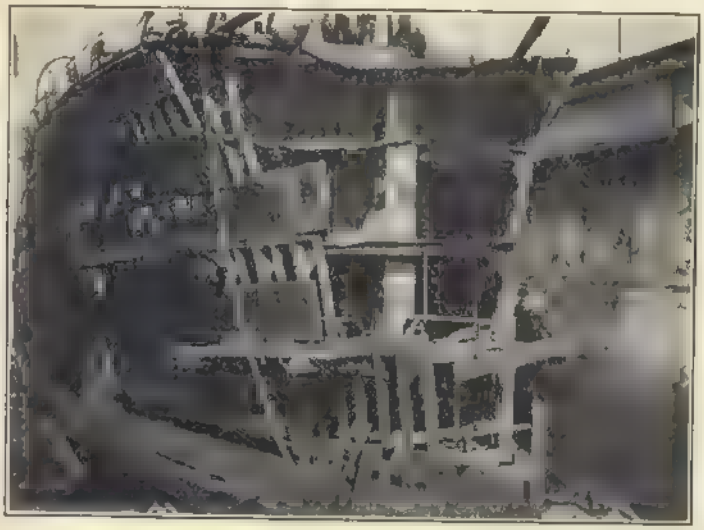
GOVAN GRAVING DOCK REPAIR WORKS.

Vessels Docked and Painted and Repairs of all kinds Executed to Hulls, Machinery and Boilers with Up-to-Date Appliances including Oxy-Acetylene Cutting and Electric Welding Plants.



The damage to this vessel was caused through collision with an iceberg.

Over 150 tons of cement, the upper portion of stem bar, 10 frames on each side, 29 shell plates, and 30 plates on the several decks together with the hawse pipes required to be renewed.

This repair was almost entirely carried out afloat, the vessel only being dry docked for examination for any under water damage.

L'avarie de ce navire fut causée par une collision avec un iceberg.

Plus de 150 tonnes de ciment, armature supérieure de l'étrave, 10 membrures de chaque côté, 29 bordages, 30 tôles de ponts [illegible] remplacer. Les manches à eau [illegible] réparation fut effectuée presque entièrement à flot, le navire ayant été mis en cale sèche uniquement pour l'examen de la ligne de flottaison.

Skaden paa dette skib forarsagedes ved sammenstød med et isbjerg. Mere end 150 tons cement, den øverste del af stævnen, 10 rammer paa hver side, 29 skjødplader, og 30 plader fra forskjellige dæk tilligemed trosserørene maatte fornyes. Denne reparation blev udført næsten helt og holdt mens skibet laa paa vandet og det maatte kun i tørdok for at undersøge om det var skadet under vandlinjen.

This vessel was lengthened 50 feet. Launching ways were laid in dry dock and after cutting away the fore part of the vessel was launched forward 50 feet, and a new portion constructed between. A sister ship was also lengthened in a similar way.

Ce navire a été allongé d'une longueur de 15 mètres. Des rouleaux de lancement furent placés en cale sèche, l'avant du navire fut coupé et amené en avant, à une distance de 15 mètres, et l'on construisit une nouvelle partie de navire entre [illegible]

Dette skib forlængedes med 30 fod. Stabelvejene lagdes i tørdokken, skibets fordel blev skaaret løs og flyttet 30 fod nedover mod stjernen og en ny skibsdel bygges [illegible]

I søsterskibet blev [illegible] paa [illegible]

ONE IN A CARTON

"POLAR CUB," DESK AND BRACKET

UNIVERSAL MOTOR, for direct current 110 volt or alternating current 110 volt, 60 cycle, one speed, no switch, die cast frame, spot welded guard, adjustable to any angle, motor black enameled, mica filled commutator rustproof, brass blades, base finished in rich velvet black, equipped with 8 ft. cord and plug.

Made only for 110 volt circuit.

No. 450E—Model "D", 6 in. diam., 8 in. to top of guard, 6 in. to top of motor, w't each 3 lbs., each **$9.40**

ONE IN A CARTON
ONE DOZEN IN A CASE

No. 460E—Model "9," 9 in. diam., 10½ in. to top of guard, 7½ in. to top of motor, w't each 5 lbs., each **$12 50**

ONE IN A CARTON SIX IN A CASE

Finish—The brass blades are highly polished and lacquered. Base and other parts baked on black enamel.

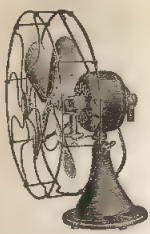
Construction—Cast enclosing shells and base, can be adjusted to any angle desired, either for a bracket or desk fan. The construction is simple and the field of service large. Large air velocity with minimum current consumption.

Speeds—Has four point switch for three speeds, namely, **slow, medium and fast, ranging from 900 to 1500 revolutions per minute.**

Equipment—8 ft. cord and attachmment plug included.

"PEERLESS," DESK AND BRACKET

OSCILLATING.



PEERLESS oscillating fans can be used either as a desk or bracket fan without the use of an adaptor.

They are designed to move from side to side through a desired angle, thus distributing the air over a larger area than with a stationary fan.

DIRECT CURRENT

110 Volt.

No. E1212E—12 in. diam., 3 speeds, 960, 1460 and 1860, w't boxed 40 lbs., each **$57.50**

No. E1216E—16 in. diam., 3 speeds 800, 1100 and 1400, w't boxed 60 lbs., each **$66.00**

ALTERNATING CURRENT

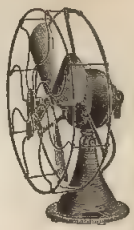
110 Volt, 60 Cycle.

No. E4112E—12 in. diam., 3 speeds, 900, 1400 and 1600, w't boxed 40 lbs., each **$57.50**

No. E4116E—16 in. diam., 3 speeds, 900, 1375 and 1550, w't boxed 50 lbs., each **$66.00**

"PEERLESS," DESK AND BRACKET

SWIVEL AND TRUNNION TYPE.



DIRECT CURRENT

10 Volt.

No. E112E—12 in. diam., 3 speeds 900, 1400 and 1800, w't boxed 27 lbs., each **$44.00**

No. E116E—16 in. diam., 3 speeds, 850, 1150 and 1500, w't boxed 35 lbs., each **$51.50**

ALTERNATING CURRENT

110 Volts, 60 Cycle.

No. E1112E—12 in. diam., 3 speeds, 900, 1200 and 1600, w't boxed 30 lbs., each **$44.00**

No. E1116E—16 in. diam., 3 speeds, 900, 1400 and 1550, w't boxed 38 lbs., each **$51.50**

Prices furnished on application for 25 cycle fans.

Factory Shipments, 220 Volt Fans can be shipped from Warren, Ohio, factory. Prices on application. Voltage desired must be specified in ordering, and if for alternating current, the number of cycles.

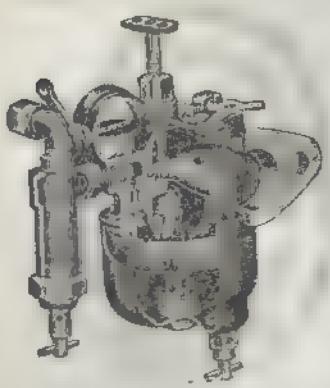
ACCESSORIES FOR FORD CARS

KINGSTON CARBURETORS



The factory advise that the Ford Motor Co., has adopted this Carburetor as standard equipment.

This carburetor owes its success to the construction which makes it possible to thoroughly impregnate all air with atomized gasoline directly at the nozzle and at point of highest air velocities. This is the reason that Ford cars equipped with the Kingston can be throttled down to a speed as slow as walking and accelerated to 40 miles per hour in 20 seconds and every cylinder doing the full share of work all the time. These carburetors start surely and easily because of their perfect atomizing of fuel.

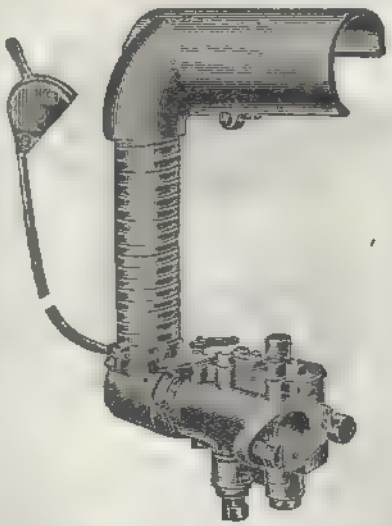
Equipped with new design laminated cork float. Fuel valve made of Monel metal. The compensating air valve is made of bronze. Is equipped with a spray nozzle.

This carburetor will, without any extra fittings, perfectly fit the Ford manifold and operating rods.

No. 5470—W't each 4½ lbs., each $5.50

ONE IN A CARTON

RAYFIELD CARBURETORS



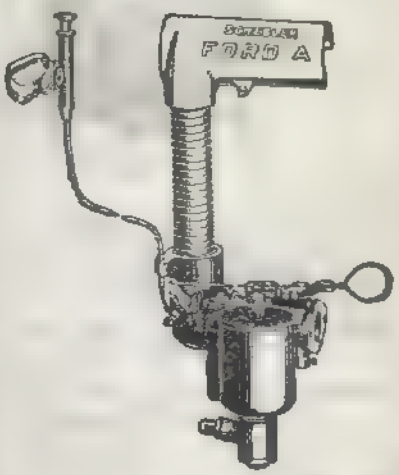
The Improved **Rayfield Carburetor Outfit** was designed especially for Ford motors and is of the plain tube type, having no loose attachments. There are two adjustments, one for low and one for intermediate speeds. The feature of this new Rayfield Outfit is the thermostatic hot air control involved in its construction, making it impossible to over-heat the Ford motor in the summer time. This feature alone will pay for the Carburetor in a short time. It is also adjusted for easy starting of the motor, quick pick-up, increased power, economy of gasoline consumption and uniformity of performance.

The outfit comes complete with all necessary fittings and can be attached in a few minutes.

No. 5467—Complete, w't each 8 lbs., each $27.00

ONE OUTFIT IN A BOX

CARBURETOR OUTFITS



Especially designed for Ford cars, has no moving parts. The new Pitot Tube Principle is introduced, which is an improved type of gasoline nozzle so built that it automatically furnishes a rich mixture for acceleration and thins out this mixture after the normal motor speed has been reached.

No. F5442—"Ford A" Outfit consists of a carburetor, steering column control, hot air drum, flexible tubing, manifold gasket, (2) ⅜x16 in. cap screws and radiator choke wire, w't each complete 12 lbs., complete outfit each★ $26.00

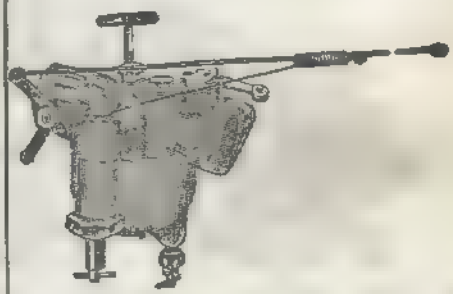
STROMBERG CARBURETORS

In an officially observed test this carburetor gave 37 9/10 miles on one gallon of gasoline, more than 50% decrease in the usual Ford consumption.

No. F5458—The new Stromberg Carburetor for Ford Cars, complete with all necessary attachments ready to install, w't packed 11 lbs.★ .....each $30.40

ONE OUTFIT IN A BOX

SPRING GOOSER WIRES



The Spring Gooser is a combination priming rod and carbureter spring. Used to replace the spring on carburetors which holds the choker valve open. For use on all Fords, whether choked from the dash or the front.

No. 7340—W't per doz. 1½ lbs., per dozen $3.15

AIR RIFLES

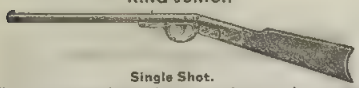
KING JUNIOR



Single Shot.

Designed especially for the younger boys not large enough for a heavy air rifle.

Steel barrel, hardwood ebony finished stock; good sights and perfect action; length over all 29 inches.

Per Dozen

No. 10AR—Nickel plated barrel and frame; weight each 1¼ lbs $25 50

One dozen in a wood case.

BENJAMIN

This is a pneumatic rifle and is operated entirely by air. The air is compressed in an air chamber by a stroke or two of the pump rod, and when released by pressure upon the trigger throws a shot which will easily pass through a ½ inch white pine board. An ideal rifle for target practice and small game. Simple, strong and efficient.

Nickel plated steel barrel and trimmings, varnished walnut stock. Length over all 37 inches.

Per Dozen

No. 18E—Single shot; shoots air rifle shot; weight each 2 lbs $117 00

One in a carton.

POP GUNS

DAISY

Per Dozen

No. 10PG—Designed like an air rifle, breakdown action; one piece nickel plated steel barrel and frame, walnut stock; blued finish; shoots a cork attached to a cord; length 15 inches; weight each 6½ ozs $10 80

One in a carton, six dozen in a case.

KING

Per Dozen

No. 15—Made like an air rifle; Winchester action; one piece nickel plated steel barrel and frame; black walnut stock; shoots a cork attached to a cord; length 17 inches; weight each 7½ ozs $10 80

One in a carton, three dozen cartons in a case.

KING RAPID FIRE

A pump action, rapid fire pop gun. Operates similar to a real pump gun; barks hard, loud and fast; easy and simple to work. Loads automatically, explodes with both forward and backward movement of the hand piece; absolutely safe, not even a cork to fly out.

Per Dozen

No. 25PG—All metal parts nickel plated; genuine black walnut stock, polished; length 27 inches; weight each 18½ ounces $25 50

Three dozen in a case; weight per case 36 lbs.

GUN DISPLAY CASES

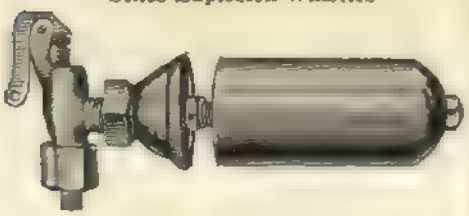
KLAXON 3-V M.C

Stiles Explosion Whistles



The Stiles adjustable explosion whistle is a perfect warning signal for passenger cars and trucks. It can be adjusted to any tone, the adjustable feature makes it possible to get the desired tone regardless of the compression of the motor.

Installed in place of priming cup except on Fords, where a special adapter is furnished to be used in connection with regular spark plug.

Operates by a cord attached to dash or steering wheel.

Fully guaranteed. Will last twice the life of any car.

Complete.....each, $4.00

Aermore Exhaust Horns

"The Signal with a Smile"

The clear, distinctive tone of the Aermore is easily heard above traffic, yet the chord is so harmonious and the signal so pleasant it never frightens or angers pedestrains.

It is carefully built and there is nothing to get out of order. Easily and quickly installed. Operates by exhaust gas so there is no expense for upkeep.

Tractor owners find the Aermore just the signal they want.

PATENTED
Aermore complete with Style 'G' valve ready to attach

Small horns should not be used on large cars as the excessive exhaust will make them shriek.

Always give size of valve desired (outside diameter of exhaust pipe) or name and model of car or tractor to which it is to be attached.

No. 0 17 in. Aermore outfit for cars of over 40 h. p., complete with Style G valve .....each, $12.00

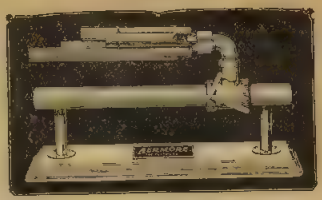
136E-12	Black	12	— lb.	10.25

AERMORE HORNS



Built on the pipe organ principle. The four tones sounded together produce a pleasing chord easily heard over the din of traffic or in the country.

Easily installed, nothing to get out of order. A great favorite with discriminating motorists.

The Aermore is rapidly becoming very popular with tractor owners who find it just the signal for their purposes.

KLAXON

The Klaxon warns unfailingly. Its powerful, penetrating note gets instant attention, instant action wherever, whenever sounded.

There is a motor driven or hand operated Klaxon—durable, good looking and easy to install—for every type of car, truck and motorcycle. There is a Klaxon that will meet your needs exactly, at just the price you want to pay. You will find it described and illustrated below.

The same mechanically as the Klaxon 6 but with a tapering "torpedo"-shaped projector for underhood installation. Furnished without wires and without push button but with brackets for installation on Ford, Buick and Maxwell cars. Black finish only. Projector 4½ inches.

NO.	Volts	Cars	Wt. Each	EACH
5D	12	Dodge	4¾ lb.	$7.00
5F	6	Ford	4¾ lb.	7.00
5M	6	Maxwell	4¾ lb.	7.00
5C	6	Chevrolet	4¾ lb.	7.00
5B	6	Buick	4¾ lb.	7.00

A powerful signal for underhood installation. Furnished in a black finish only. Projector 7½ inches long.

NO.	Volts	Car	Wt. Each	EACH
12L-6	6	Any 6 V Battery	5½ lb.	$15.00
12L-12	12	Any 12 V Battery	5½ lb.	15.00

Horizontal Push

This horn operates on the same principle as the electric Klaxon, except that the cam is rotated by a train of gears instead of by a motor. Projector 7½ inches long.

NO.	Finish	Wt. Each	EACH
8	All Black	4½ lb.	$5.00

Slightly smaller in size than the Klaxon 12. It is nevertheless powerful in tone and sturdy in construction. Just the signal for smaller cars. Projector 5 inches long.

NO.	Volts	Car	Wt. Each	EACH
6-6	6	Any 6 V Battery	5 lb.	$7.75
6-12	12	Any 12 V Battery	5 lb.	7.75

King among automobile warning signals. Its deep, powerful note and handsome appearance add the final touch of dignity to the well groomed car. Furnished also with special bracket for installation on Cadillacs. Furnished in black enamel only.

NO	Volts	Car	Wt. Each	EACH
20S-6	6	Any 6 V Battery	15½ lb.	$30.00

Vertical Push

Vertical push rod, in every other respect the same as Klaxon No. 8.

NO.	Finish	Wt. Each	EACH
8V	All Black	4½ lb.	$5.00

Crank Operated

Big and sturdily built; operated by a small revolving crank. This is a powerful hand operated instrument, and compares in this class to the best electrical instruments. Especially designed for heavy duty, such as heavy trucks, fire apparatus, ambulances, police patrols, etc. Projector 10 inches long.

NO.	Finish	Wt. Each	EACH
10	All Black	10 lb.	$12 00

For Ford Horns see Ford Section.

BOYCE MOTO-METERS

De Luxe

Designed for highest grade passenger cars, temperature tube is ½-inch in diameter, having broad column of red liquid readable at great distances, case is silver plated brass; entire instrument of highest quality workmanship

De Luxe Boyce Moto-Meters; size 3¼x5¾ in.; wgt 20 oz. Each $15.00

Universal

Slightly smaller than Standard model, finished in all nickel beveled crystal glass more easily read than a clock

Universal Boyce Moto-Meters; size 3x5 in., wgt 12 oz. Each $7.50

Ford Special

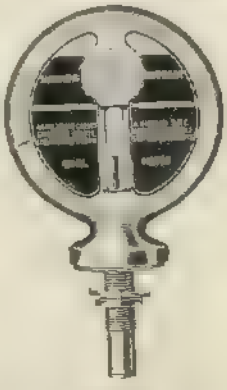
Especially adapted for Ford cars, very durable and handsomely finished

Ford Special Boyce Moto-Meters; size 2¾x5¼ in. wgt 7 oz. Each $3.50

Standard

Selected as regular equipment on leading cars; broad ribbon-like thermometer tube

Standard Boyce Moto-Meters; size 3¾x7½ in.; wgt 16 oz. Each $10.00



Junior

For cars of medium size; frame is heavily nickel plated, has same range of temperature as Standard and Universal models

Junior Boyce Moto-Meters; size 1x4⅞ in.; wgt. 8 oz. Each $5.00

Midget

Especially designed for small or light car use, combines accuracy with sturdiness of construction; fits on regulation radiator cap of all small cars

Midget Boyce Moto-Meters; size 2¼x4½ in. wgt 5 oz. Each $2.50

Truck and Tractor

Designed especially for severe service on trucks and tractors, diameter of thermometer tube ¾ inch throughout, protected frame of instrument very substantial, casing is nickel plated, tube has a broad red column of indicating liquid

Truck and Tractor Boyce Moto-Meters; size 2¾x4¾ in.; wgt 16 oz. Each $10.00

Overland Special

Designed especially for Overland cars having an oval radiator cap, such as on the Overland 4; when ordering specify Overland Model

Overland Special Boyce Moto-Meters; standard model. Each $10.00

Overland Special Boyce Moto-Meters; universal model Each 7.50

Overland Special Boyce Moto-Meters; junior model Each 5.00

Overland Special Boyce Moto-Meters; midget model. Each 2.50

Packed One in a Carton. First Class Freight.

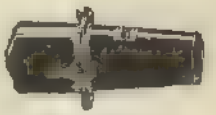
THE KLAXON LINE

Klaxon 20-L

In warning power, dependability, workmanship and finish this Klaxon has no equal. It is built for motorists who want the best horn that money can buy. Furnished with either universal or special Cadillac [illegible]
List Price [illegible] Each **$30.00**

Klaxon 12-A

This is the economy Klaxon—the Klaxon with the orange rim. Its deep, powerful, unmistakable note nearly matches the note of the Klaxon 20-L. Yet it costs only one third as much. Quality and reliability have not been sacrificed. The low price is due to a simplified construction requiring less labor and materials. Furnished with universal, underhood bracket for dash mounting. Black finish only.
List Price ..... Each **$10.00**



Klaxon 5 Ford

This Klaxon is like the Klaxon 6 but is equipped with a "torpedo" projector and a special bracket for installation under the hood on Ford cars factory equipped with self starters. Black finish only. A short wire is supplied.
List Price..... Each **$7.00**

Klaxon 6

This is a small but surprisingly powerful Klaxon for [illegible] cars. In spite of its low [illegible] it is thoroughly dependable in every way.
List Price... Each **$7.75**

Klaxon 12-L

A powerful warning signal, especially designed for use under the hood. Differs in construction from the Klaxon 12-A. Black finish only.
List Price..... Each **$15.00**

Klaxon 3

A really dependable hand-operated signal with the genuine Klaxon note. In every respect as carefully made as the electric Klaxons.
List Price [illegible] Each **$5.00**

Klaxon 3-V

This Klaxon is the same as the Klaxon 3 except that it has a vertical instead of a horizontal push rod.
List Price..... Each **$5.00**

Klaxon 20 Deck

This is a Klaxon 20-L with a swivel bracket for mounting [illegible] instrument board or [illegible] deck of a motorboat.
List Price [illegible] Each **$33.00**

Klaxon 12-S

[illegible] Klaxon 12-L with a [illegible] for installation [illegible] where [illegible] high room for the long projector. Black finish only.
List Price ..... Each **$15.00**

Klaxon 6 MC

An electric motorcycle Klaxon. Really a Klaxon 6 adapted to motorcycle use. It is furnished with either handle bar or frame bracket or with special Harley Davidson bracket.
List Price..... Each **$7.75**

Klaxon 10

This is a practically indestructible hand-operated signal with a powerful tone for use on trucks, fire apparatus, railway service cars and motorboats. Black finish only.
List Price ..... Each **$12.00**

Klaxon 6 Deck

A Klaxon 6 with a swivel bracket for mounting on an instrument board or on the deck of a motorboat.
List Price..... Each **$9.25**

Klaxon 5

This Klaxon is a Klaxon 6 with a "torpedo" projector, designed for use under the hood. Black finish only.
List Price..... Each **$7.00**

Klaxon 3-MC

A hand operated automobile Klaxon furnished with brackets for mounting either on handlebar, frame or tank of motorcycle.
List Price ..... Each **$4.75**

Klaxon 20-S

Mechanically this horn is identical to the Klaxon 20-L only instead of a long projector, it has a short one. There is practically no difference in tone.
List Price..... Each **$30.00**

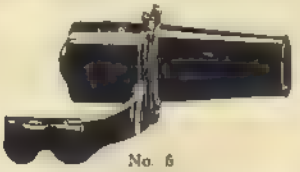
KLAXONS are regularly finished in black baked enamel. For special finishes such as black-and-brass, black-and-nickel, etc., add $1.00 to the list price. Electric Klaxons are operated either from dry cells or storage batteries. They are regularly wound for six volts. For special voltages up to 21 volts no extra charge is made.

Push buttons and wires are furnished only with Klaxon 20 instruments. Extra for Klaxon 12 models—$1.00 List; for Klaxon 5 and 6 models—$.75 List.

Klaxon 3-V-MC

This Klaxon is a Klaxon 3-MC with a vertical instead of a horizontal push rod.
List Price..... Each **$4.75**

Klaxon Horns, Ford Type



No. 6

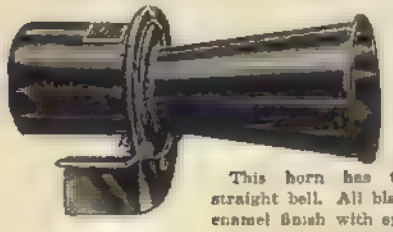
A motor driven safety signal for the Ford car

Made from highest quality material and finished in all black enamel

It is easily installed on all Ford cars equipped with self-starters. Wound for 6 volt battery.

Klaxon 5 Ford Special.....each, $8.00

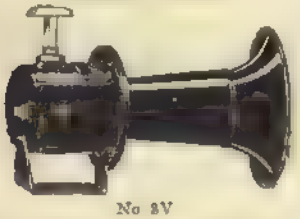
E. A. Motor Driven Horns



This horn has the straight bell. All black enamel finish with special bracket for attachment to Ford motor block. Used on Ford cars with storage batteries. Wound for 6 volt battery.

Model 9 E. A. Ford Special.....$7.00

Klaxon Horns



No 3V

A hand operated Klaxon safety signal with vertical push rod. Finished in the smart "Klaxon black" enamel. Easily attached to all Ford touring cars, runabouts and commercial cars.

Klaxon 3V .....each, $5.75

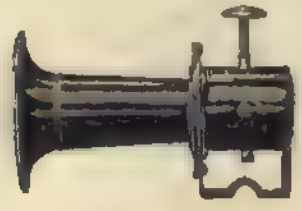
Klaxon Horns

No. 3

A hand operated Klaxon safety signal with horizontal push rod. Finished in the smart "Klaxon black" enamel. Easily attached to all Ford touring cars, runabouts and commercial cars

Klaxon 3 .....each, $5.75

E. A. Hand Horns



Hand actuated. Length 9½ inches. Black enamel finish.

Model A .....each, $4.50

Stewart Speedometers for Open Cars

The Stewart Instrument Board is made of wood, with black satin, egg shell finish. Anyone can install it in a minute's time. The lower edge rests tight against the steering column—eliminates every bit of vibration from the steering wheel.

You can install on the Stewart Instrument Board, a clock, headlight control, priming lever, starting control, and any other accessories you desire.

Model 160B Complete with Model 160A speedometer, 60 mile capacity, 100,000 mile season register and 100 mile trip register.each, $16.25

Stewart Speedometers
Instrument Board Type

Especially designed for easy installation on the instrument board which is now built into the Ford car.

It has 60 mile capacity rotating speed dial, 100,000 mile season odometer and 100 mile trip register, which can be reset to any mile. Has 3 inch dial face. Fully jeweled. Tungsten steel magnet. Black enameled flange. Complete with fittings and driving equipment.

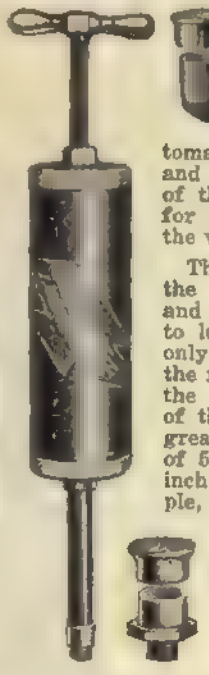
No. 160A Complete.....each, $15.00

Dash Type

Designed for Ford owners who do not desire an instrument board. Also suitable for Ford delivery cars and trucks. Equipped with adjustable bracket for dash installation. Has a three-inch dial face, sixty-mile rotating speed dial, 100,000 mile season and 1,000-mile trip odometer which resets to any mile or tenth of a mile. Fully jeweled. Tungsten steel magnet. Nickeled flange. Furnished with all fittings and driving equipment for Ford cars.

Model 160 D .....each, $15.00

Forc-Ful Lubricators

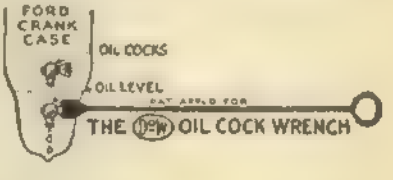


Forc-Ful lubricator outfits include a powerful screw plunger grease gun with automatically closed nozzle and fittings for all parts of the Ford car designed for lubrication, including the wheels.

These fittings replace the regular grease cups and when it is necessary to lubricate the car it is only necessary to screw the nozzle of the gun into the fittings and a stroke of the plunger forces the grease under a pressure of 500 lbs. to the square inch into every part. Simple, clean and efficient.

Outfit complete, gun and 11 connections. $7.75

Dow Oil Cock Wrenches



25 in. long. Finished in black enamel.

No. 1 Each $0.25

Fawco Oil Cock Wrenches

This tool serves the threefold purpose of oil cock wrench, pet cock cleaner and gasoline gauge. A low priced convenience that every Ford owner should have.

Fawco Oil Cock Wrench.....each, $0.45

Ball Joints

Used very extensively for connecting carburetors and timers with levers on steering wheel; in fact, anywhere a flexible right angle joint is required. Is supplied with cotter pin hole and V thread. Threaded end ⅜-32. Tapped end ⅜-32.

No. 3526 Each $0.10

Oil Gauges

Indicates the height of the oil in the crank case. Remove lower pet cock in the crank case, then insert the pipe nipple, attach gauge on other end of nipple. Insert pet cock in front opening and gauge is ready for use. Glass is heavy and is ⅝ inch in diameter.

No. 41 With brass protector .....each, $0.35

Gasoline Gauges

This is the best and most reliable gauge on the market. It is constructed so that all friction is eliminated by the use of a ball-bearing metallic float operating in a concave track; therefore it registers accurately and tells at a glance the amount of gasoline in tank. Is instantly installed by simply discarding filler cap and inserting gauge.

No. 75 For Ford cars, each, $1.25

One Dozen in a Box

Connecting Rods

Made of a special alloy steel, heat treated forging, accurately machined so that all parts are interchangeable. High grade tin base babbitt bearings. The babbitt metal is applied under pressure, giving friction resisting quality.

No. 3024.....each, $2.50

Tribune Babbitting Jigs

For Ford Motors

The Tribune Babbitting Jig is a simple efficient tool for rebabbitting Ford connecting rods. They will do this work quickly, accurately and economically. The average mechanic can rebabbitt eight or ten rods an hour with this simple jig.

Each $1.75

Babbitting Metal for Ford Connecting Rods

Designed for the most severe duty. Contains no lead. Has a great resistance to crushing strain and is particularly adapted to automobile bearings and connecting rods.

Prices on Application

Kingston Carburetors

For Ford Cars

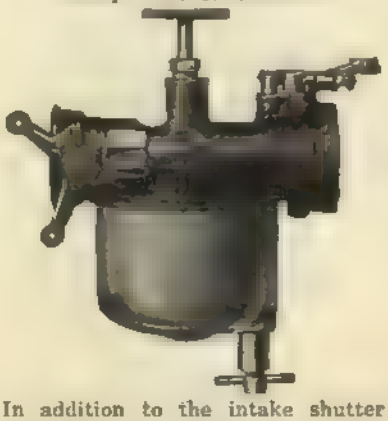
These carburetors are constructed so as to thoroughly impregnate all air with atomized gasoline directly at the nozzle and at the point of highest air velocities. This is the reason that the Kingston carburetor can be throttled down to a speed as slow as walking and accelerated to 40 miles per hour in 20 seconds and every cylinder doing its full share of work all the time.

Model L2.....each, $6.00

Repairs for Kingston Carburetors

No. 6101A Float Assembly..each, $1.00
No. 6115 Spray Needle Assembly .....each, .50

Holly Ford Carburetors



In addition to the intake shutter it has a primary air passage that lifts the cold fuel off the nozzle into the main air stream insuring ease in starting. The inlet needle is detachable and can be easily replaced in a few minutes. The inlet needle and float are made entirely of metal and are impervious to the effects of acids or impurities in gasoline.

Model NH.....each, $6.00

Repairs for Kingston Carburetors

No. 4451A Float with lever.each, $1.00
No. 4452A Spray Needle Assembly .....each, .25

Sunderman Vacuum Carburetors

The Sunderman Carburetor changes gasoline from a liquid to a highly explosive vapor by a combination of terrific air force, vacuum and screen.

No. 1 For Ford cars.....each, $6.00

Rayfield Carburetors

For Ford Cars

A new Rayfield carburetor for Ford cars of the plain tube type that brings forth all the economy, power and speed that is possible to procure in the Ford motor. There are no loose fittings to adjust or readjust, the carburetor having but two adjustments, one for low and one for intermediate speeds. The predominant feature of this carburetor is the thermostatic hot air control principle which is involved in its construction, making it an absolute impossibility to overheat the Ford motor. Easier starting, quicker pickup, increased power and uniformity of performance are made certain.

Complete with all necessary fittings .....each, $18.00

Stromberg Ford Carburetor

This is the new style Stromberg Carburetor made especially for Ford cars. Fits in the same position as the carburetor that comes with the Ford car. Can be put on in a short time with wrench and pliers.

Comes complete with housing, tubing and steering post control.

Model LF ⅝ in. complete..... $24.00
High speed adjusting needle. . . . 1.25

*KNIGHT PORTABLE CIRCULAR SAW MILLS

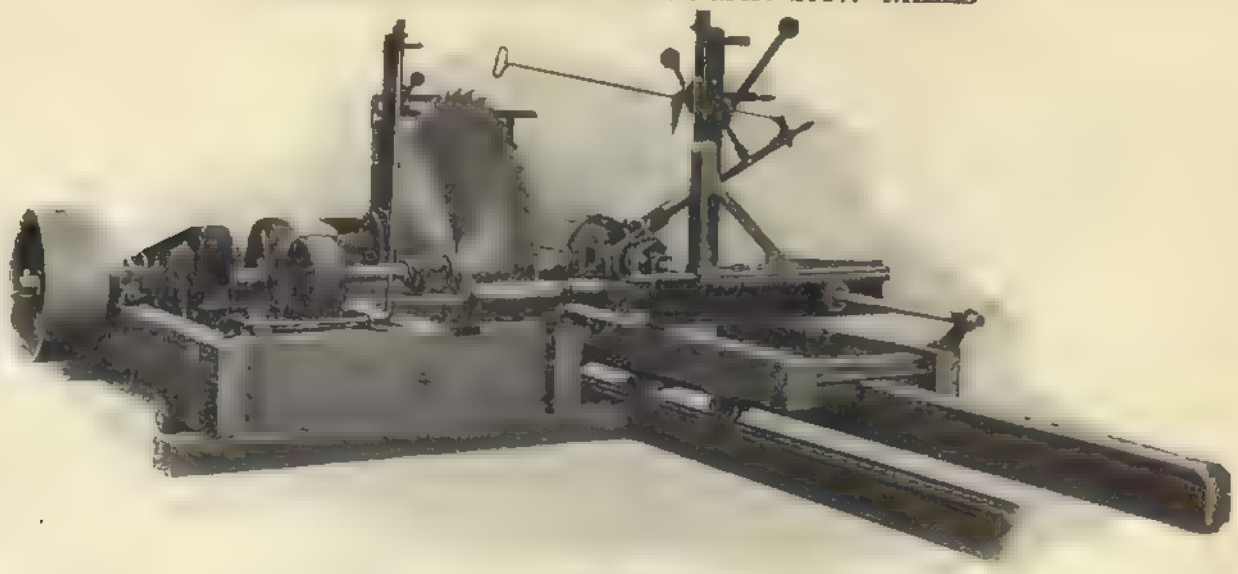


Fig. D1504

Style T with Style C1 Head Block, Ideal Single Mill Dog, No. 1 Ideal Single Ratchet Set Works and Belt Feed Husk

All Knight circular saw mills are equipped with variable belt feed works, which has a tightener pulley directly connected to the sawyer's lever and controls the feed to suit the power of the engine, and the kind of timber to be sawed. Can be quickly changed within a range from 0 to 3¼ inches for the smallest mills up to 0 to 5¼ inches on the largest size mills, by allowing the feed belt to slip over the pulleys. The fast operating gig back increases the daily output of mills in a given time by reducing the time required in gigging back, which is always a loss of time. Mountings for the different sizes of mills are as follows: S has two style C1 36 inch opening head blocks, two pony excelsior mill dogs and No 1 single ratchet set works. T has two style C1 36 inch or 42 inch opening head blocks, two No. 1 Ideal single mill dogs and one No 1 single ratchet set works. T½ has two style A1 36 inch or 42 inch opening simultaneous or taper movement head blocks, two No 1 Ideal single mill dogs and one No 2 single ratchet set works. U has two style C1 36 in or 42 inch opening head blocks, two No 1 Ideal single mill dogs and one No 2 single ratchet set works. V has two style A1 36 inch or 42 inch opening simultaneous or taper movement head blocks, two No 2 Ideal single mill dogs, one No 2 double ratchet set works. Frames of husks and carriage are built of long leaf yellow pine lumber securely bolted. Irons for track. All carriages 16 feet long and with wood drum. Cable drive attachment, unless otherwise specified, but no way timbers.

*Not carried in stock; will ship from factory

*POWER BAND SAWS

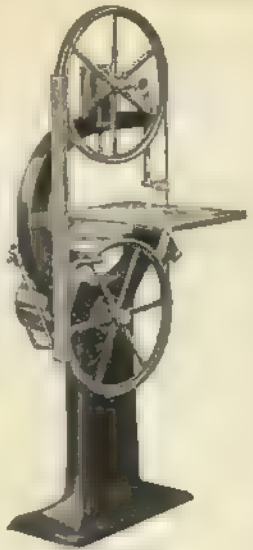

Fig. D1508

Equipped with an iron table planed smooth, and can be tilted for angle sawing up to 45 degrees by loosening a nut with an attached lever, and can be firmly locked when desired. Has upper wheel adjustment on same side of operator. Up and down adjustment of upper wheel is below. Wheels are turned true and perfectly balanced. Rubber bands are securely cemented to rims. Upper wheel has up and down adjustment of several inches.

Regular Equipment

Two plain guides, brazing clamp and tongs, piece of brazing material and one blade ¼ in. wide ready for use.

No. 720. With saw blade 10 ft. long, ¼ in. wide; tight and loose pulley 7x3 in.; table 18x22 in.; wheels 20½ in. diameter, 1⅜ in. face. Base 11½x23 in. floor space 24x30 in.; distance between saw and frame 20½ in.; height under saw guide, when raised 9 in.; height over all 67 in. Power required 1 to 2 horsepower, speed 300 to 400 r. p. m. Weight 390 pounds .....each, **$95.00**

Wright's Non-Friction Roller Saw Guide.....extra, **8.00**

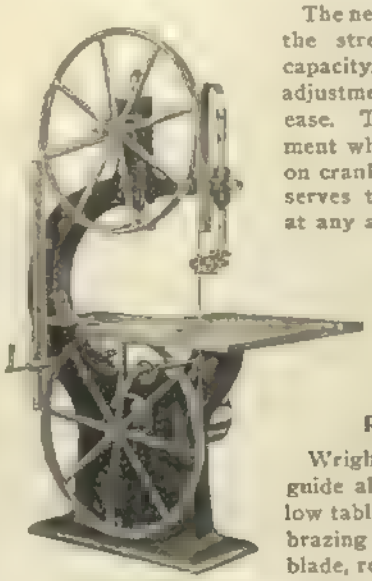

Fig. D1509

The new shape of frame increases the strength and gives greater capacity. Belt can be shifted and adjustments made by operator with ease. Table is attached to segment which is worked by a pinion on crank shaft. Small hand wheel serves to loosen or fasten table at any angle up to 45 degrees.

Belt shifter can be used either above or below pulleys. Wheels turned true, balanced, and with rubber band cemented to face.

Regular Equipment

Wright's non-friction roller saw guide above table, plain guide below table, brazing clamp and tongs, brazing material and ¾ in. wide blade, ready to use. Choice of any blade up to 1 inch wide.

No. 824. With saw blade 18½ ft. long, ¾ in. wide; tight and loose pulleys 12x4 in.; table 31x38 in.; wheels 36½ in. diameter, 2 in. face. Base 18x39 in.; floor space 39x57 in.; height under saw guide when raised, 16 in.; height over all 93 in. Power required 2½ to 4 horse, speed to run 300 to 400 r. p. m. Weight 1390 pounds.....each, **$250.00**

Ripping Gauge .....each, **18.00**

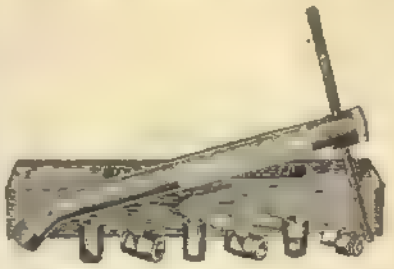
Billmont Master Wrench Sets



The Billmont Master Wrench is adaptable for use wherever there are nuts and bolts to be tightened or loosened. It has the universal Billmont nose piece, a special ring in the socket holder permitting any size Billmont socket to be easily snapped in or removed. The nose, turned at an angle at the end of a long straight shank makes it easy to reach most difficult places.

The heavily nickeled and knurled outer steel tube is stationary, offering a firm grip. The solid T bar handle slides back and forth to pass any obstruction and gives tremendous power. All exposed parts are Parkerized, giving lasting life and utility.

No. 1 Master wrench set contains
1—Master wrench.
1—Standard socket adapter.
5—Interchangeable sockets, 7/16, ½, 9/16, 11/16, 5/8 hexagon.

Packed complete in a wooden case.

No. 1 Set, complete $10 50
No. 0 Master wrench only.. . . . . 8.00

Billmont Master Wrench Sets

The Billmont Master Wrench Set No. 100 is complete and especially suitable for garage work, as the great variety of sockets cover almost every requirement. Consists of following:

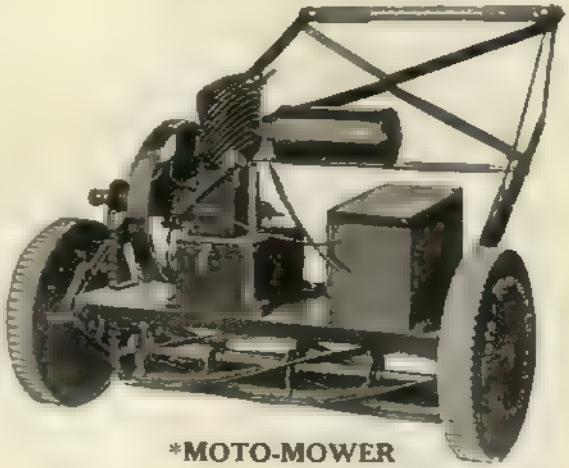
One half dozen nested, in burlap bundle

LAWN MOWERS



*MOTO-MOWER

One half horsepower operates the cutter and propels the mower. It is strongly built of best material, carefully machined and assembled. It requires little attention, having automatic release between motor and reel. There are no gears or exposed parts to accumulate oil and grit, no oil holes to clog, few adjustments.

It is easily operated and self-sharpening. Runs easily and will cut lawns too soft for horse-drawn mower. Saves time and worry, very economical in use, burning but one-eighth gallon of gas per hour of operation.

Moto-Mower. 27 inch cut, weight 125 pounds...each, **$325.00**

*Not carried in stock; will ship from factory

Fig. D1168

Single arm pulley, sizes 12 to 36 inch diameter

LIMESTONE WOOD SPLIT PULLEYS

Made of selected air dried material. Arms are of white oak with sections placed edgewise to the strain; spokes are built into the rim and firmly secured; rims are built of sections nailed and glued; are clamped to shafting by means o heavy iron plates with bolts and hexagon nuts. Pulleys finished in pure orange shellac. Pulleys up to 11 inches diameter are made in solid blocks. Standard bores are: 3 inch diameter, 1⅛ inches; 4 to 7 inch diameter, 2⅛ inches; 8 inch to 72 inch diameter, 3⅛ inches. Pulleys with special specifications can be furnished promptly.

Factory ships all orders **immediately.**

WOOD BUSHINGS

10 inches or less of complete bushing . . ..$0.50 | More than 10 inches of complete bushing....per inch. $0.05

NOTE: When ordering bushings, give size of hole in pulley, length of hub and diameter of shaft.

*Not carried in stock; will ship from factory.

USEFUL INFORMATION

For Everyday Use in Engine Room

To find diameter of cylinder for a given power:

Multiply horsepower of engine by 33,000; divide product by the product of cylinder × steam pressure × piston speed in feet per minute.

Rule for finding contents in cubic feet of a cylinder of any given diameter:

Multiply the square of diameter in inches by .7854 and this product by length of stroke in inches. Divide last product by 1728, and the result is contents of cylinder.

The diameter of the valve rod should be 1-10 to 1-12 of the cylinder diameter; or from 1-350 to 1-300 of unbalanced area of slide valve. This last is considering the valve as a piston. Steel rods will bear being made smaller.

Don't depend too much upon the glass gauge, but try the cocks often enough to keep your hand in in telling the height of water by them. If a gauge cock has a tendency to leak, fix it thoroughly.

Safety valves should be allowed to blow straight out into the room and not hitched on to a leading pipe which may allow water to stand on the valve, increasing its weight, or to freeze up if the boiler is laid up. When the valve blows into the room it will be known, when steam is escaping, whether from leakage or over pressure.

The economy of an engine should always be rated by the amount of steam or water which it consumes per horsepower per hour. The amount of coal burned per horsepower per hour involves the economy of the whole plant, and is not a measure of the performance of the engine taken independently.

Horizontal engines, when practicable, should be run over rather than under, as the thrust will then come downward upon the foundation rather than upon the caps of the boxes and the upper guides.

In calculating horsepowers of steam boilers, consider:

Tubular boilers, 15 square feet of heating surface, equivalent to 1 horsepower.

Portable boilers, 12 square feet of heating surface, equivalent to 1 horsepower.

Cylinder boilers, 10 square feet of heating surface, equivalent to 1 horsepower.

To find the area of safety valve required:

Multiply the number of pounds of coal burned per hour by .045; or the number of pounds of water evaporated per hour by .006. The product is the area of a common valve required in square inches.

For Calculating the Speed of Drums and Pulleys

Problem No. 1. The diameter of the driven being given, to find its number of revolutions.

Rule. Multiply the diameter of the driver by number of its revolutions, and divide the product by the diameter of the driven; the quotient will be the number of revolutions of the driven.

Problem No. 2. The diameter and revolutions of the driver being given, to find the diameter of the driven that shall make any given number of revolutions in the same time.

Rule. Multiply the diameter of the driver by its number of revolutions and divide the product by the number of revolutions of the driven; the quotient will be its diameter.

Problem No. 3. To ascertain the size of the driver.

Rule. Multiply the diameter of the driver by the number of revolutions you wish it to make, and divide the product by the revolutions of the driver; the quotient will be the diameter of the driver.

N. B. In ordering pulleys, be careful to give the exact size of the shaft on which they are to go; also state how you wish them finished on the face—flat face for shifting belt, or rounding for non-shifting.

How to Calculate Speed

To find the speed of a countershaft, if the revolutions of the main shaft and size of pulleys are given: Multiply the revolutions of the main shaft by the diameter in inches of the pulley on the main shaft, divide the result by the diameter of the pulley on the countershaft; the quotient will be the number of revolutions.

Example. What will be the speed of a countershaft with a 12 inch pulley, driven by a 30 inch pulley 180 revolutions per minute: $180 \times 30 \div 12 = 450$

To find the size of a pulley required, if the number of revolutions and size of pulley on the main shaft are given: Multiply the diameter in inches of driving pulley by the revolutions of the main shaft, and divide by the speed required; the quotient will be the diameter in inches of the pulley.

Example. What will be the diameter of a pulley to make a countershaft turn 450 revolutions per minute, driven by a 30 inch pulley 180 revolutions per minute? $180 \times 30 \div 450 = 12$ inch pulley.

To find the size of a pulley for a main shaft, if the speed of shafts and diameter of pulley on the countershafts are given: Multiply the diameter in inches of pulley by speed of the countershaft, and divide by the revolutions of the main shaft. The quotient will be the diameter of the pulley.

Example. What will be the diameter of a pulley on a main shaft making 108 revolutions per minute to drive a 12 inch pulley 450 revolutions per minute? $450 \times 12 \div 180 = 30$ inch pulley.

Horsepower of Shafts

We publish herewith a table used in general practice for the transmission of power where shafts are properly supported.

When shafts are used for conveying power from one point to another without any of the bending strains of pulleys, gears, etc., the next smaller size may be used.

This table must not be confounded with tables of actual strength of shafts published by other authorities

Horsepower of Shafts for Given Diameter and Speed

Diameter of Shaft Inches	Revolutions per Minute									
	100	125	150	175	200	225	250	300	350	400
1 1/16	2.4	3	3.6	4.2	4.8	5.4	6	7.2	8.4	9.6
1 3/16	4.3	5.4	6.5	7.6	8.6	9.8	10.8	13	15.2	17 2
1 1/4	6.5	8	9.7	11.2	13	14.6	16	19 4	22.4	26
1 5/16	10	12.5	15	17.5	20	22.5	25	30	35	40
2 1/16	14	17.8	21	24.5	28	31.5	35.6	42	49	56
2 1/16	20	25	30	35	40	45	50	60	70	80
2 1/4	26.5	32.5	40	44.6	53	59	65	80	89	106
2 5/16	34	42.5	51	59.5	68	76.5	85	102	119	136
3 1/16	54	67.5	81	94.5	108	122	135	162	189	216
3 1/16	80	100	120	140	160	180	200	240	280	320
4 1/16	114	142.5	171	199.5	228	256.5	285	342	399	456
4 1/16	156	195	234	273	312	351	390	468	546	624
5 1/16	208	260	312	364	416	468	520	624	728	832
5 1/16	270	337.5	405	472.5	540	607.5	675	810	945	1080
6 1/16	340	425	510	595	680	765	850	1020	1190	1360
6 1/16	420	525	630	735	840	945	1050	1260	1470	1680
8	640	800	960	1120	1280	1440	1600	1920	2240	2560

It is well to say in this connection that no matter what general rules are adopted there are frequently special cases in which the engineer or designer must depart from his rules, and use his judgment in determining both the size of the shaft and the number and location of bearings.

DOME LAMPS, VASES AND LENSES

DOME LAMP

Frosted star glass 2½ inches in diameter gives sufficient light. Fitted with 6-8 volt 2 cp. DC bulb. All metal parts nickel plated and polished. Can be fastened to the top of any car without cutting the top lining

No. 60S -Dome Lamp without switch Each $2 25
No. 60S Dome Lamp with switch attached Each 2 75

LIMOUSINE VASE

The "Limousine" Flower Vase is ornamental in appearance and is furnished so that the glass part can be easily removed from the holder placed back into position without the least inconvenience. Height 7 inches

No. 1707 Vase Each $13 00

ASH RECEIVER

It does away with the most objectionable feature of cigar ashes scattering where same is the least desired and also acts as a container for lighted cigars, etc A removable sanitary glass cup is supplied with it which can be emptied when necessary and placed back in the ash receiver ready for another supply.

Ash Receiver .. Each $2 00

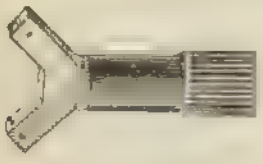
ACETYLENE GAS BURNERS

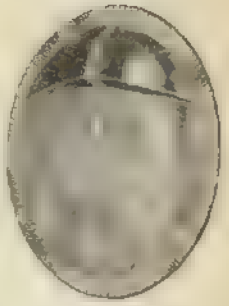


Alco No. 12

Tips are made from genuine imported lava

No. 12 -Alco-Acetylene Gas Burners Each $0 20

VIOLET RAY LENS

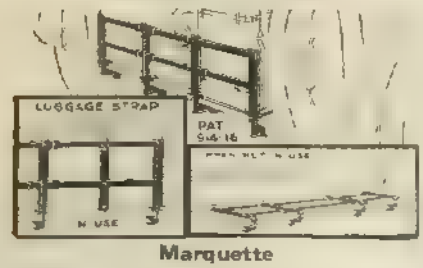


This lens was made necessary by the urgent demand of motorists for safety in night driving. The ordinary lens produces a shaft of blinding light, caused by its glaring red and yellow rays, and is the prolific source of night accidents. As it is the aim of the manufacturers to produce a lens of maximum efficiency, exhaustive laboratory experiments and tests with the constituents of light and its projection have resulted in the development of a steel blue glass which, by eliminating the glare of red and yellow rays and retaining the full power of light, produces in effect an artificial daylight—in a word THE VIOLET RAY the perfect light for night driving.

Violet Ray Lens .. .. ..

LUGGAGE CARRIERS, CAMP STOVE, WATER BAGS, REPAIR CREEPERS

LUGGAGE CARRIER



Marquette

Provides liberal storage for all kinds of luggage, camping equipment parcels, etc.; keeps them safe from loss or damage and out of the way.

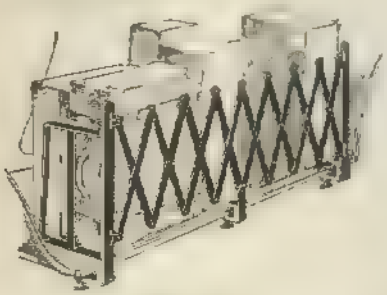
The straps hold luggage securely to carrier away from body of car; the straps are adjustable and detachable.

Made of high grade steel throughout.

	With Straps	Without Straps
Marquette Luggage Carrier, 4 ft. size.	$4 80	$3 80
Marquette Luggage Carrier, 5 ft. size	5 25	4 25
Extra Straps . . . . . Each	$0 35	

LUGGAGE CARRIER

Folded

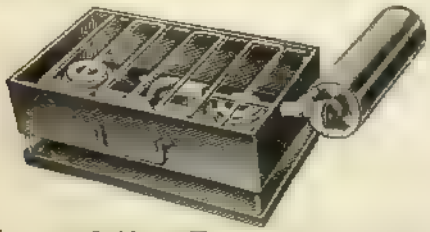


Standley

Is convenient and quickly detached. Clamps to running board with heavy clamps provided with rock pins which prevent them working loose. Is adjustable to fit any passenger or suitcase. Range 10 to 65 inches. Can be attached instantly to any make of car without tools.

Style A—Standley Luggage Carrier . . . . . Each $5 00
Style B Standley Luggage Carrier Light Weight . . . . . Each 3 00

AMERICAN FOLDING "KAMPKOOK" STOVE



The American Folding "Kampkook" Stove is the handiest and most compact camp stove made. There are no projecting parts, each part is enclosed within the steel case and protected against loss or damage. Case is fitted with handle for carrying or hanging. Finished in black enamel. Burns gasoline.

Size folded 14½x8x3½ inches. Weight 8 pounds.

No. 3—American "Kampkook" Stove . . . Each $7 50

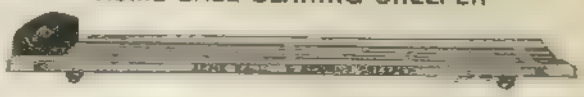
WATER BAGS

Keep water cool for several days; made of special weave imported flax; double stitched throughout; porcelain mouthpiece with cork stopper attached to cord; rope shoulder strap; **open top type** differs from regular type in that bag can be opened at top and thoroughly cleaned.

No.	Capacity	Each
R161	-1 Gallon	$
R162	-2½ Gallons	

Open Type

ACME BALL BEARING CREEPER



X-Ray View of Ball Bearing Caster, Countersunk and Riveted

A creeper that will roll in any direction, on any kind of floor and no weight or pressure can prevent the balls from working freely. Position brake, easily set prevents rolling when creeper is in desired working position.

The ball bearing casters with which the Acme Creeper is equipped are self-cleaning and will not clog with waste and dirt. The use of these casters brings the bed of the Creeper less than two inches from the floor, a big advantage to the garage man. Both casters and creeper will withstand the hardest usage. Can be run over with a car without breaking or damaging.

Built of selected hardwood strongly bolted together, length 39 inches, width 15 inches, weight 7 pounds.

Acme Ball Bearing Creeper. . . . . Each $4 00

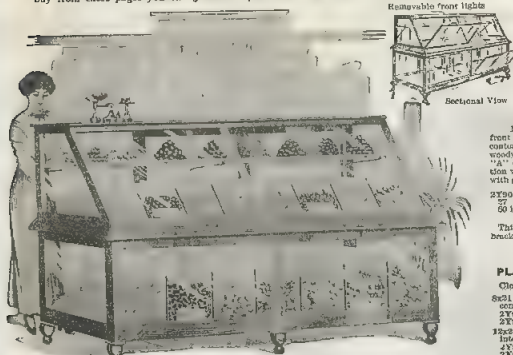
NO. 25 -STEEL AUTO CREEPER

Frame is tubular steel with strongly reinforced corners. Cross strips are one inch steel, and is extending the frame and welded to under surface. Casters are swivel type, ball bearing with steel wheels. Head rest is an oil proof enameled duck cushion, bolting rigidly to the frame. Size 35x15½ inches. Weight 10½ pounds.

No. 25—Steel Auto Creeper . . . . . Each $4 00

"LITTLE GEM" CANDY DISPLAY CASE

One good way to add a lot of profits to your business is to sell more candy buy from these pages you can get better profits and more frequent turns. Candy is a line of good profits and many turns and when you A well selected candy stock should comprise a good line of chocolate creams of various flavors, a variety of popular chocolate bars and wrapped candies, about twenty kinds of flavored hard candies, cream candies and gum candies in bulk. A candy counter stocked with these can be counted upon to bring an ever-increasing volume to your store, especially if well displayed in neat attractive form and with the equipment suggested on this page.



Little "Gem" Display Case consisting of display counter and sloping front top case with removable front that can be cleaned without disturbing contents, floor of top and bottom sections zinc lined, white oak golden finish woodwork, hand rubbed and polished, oxidized copper legs, double strength "A" quality glass throughout, polished wood shelf in top case, counter section without top but grooved for glass top (can be used separately if fitted with glass top).

2Y9076—6 ft. long, 20 in. high, 37 in. wide. Shipping weight 90 lbs. per running foot.
Each, **$92.50**

2Y9077—8 ft. long, 20 in. high, 37 in. wide. Shipping weight 90 lbs. per running foot.
Each, **$109.50**

This does not include dividers and brackets. Same are extra

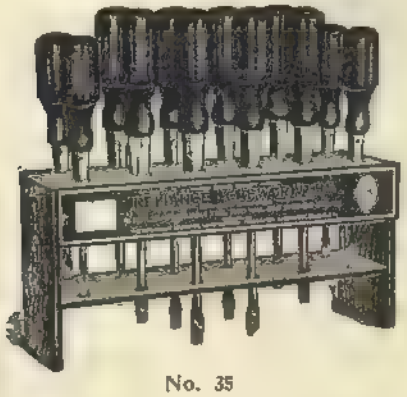
SCREWDRIVER ASSORTMENTS

No. 42

Consists of 4 each of Little Wonder screwdrivers: 1¾, 2 and 3 in. blades, 3, 3¾ and 4¾ in. long over all. Mounted on attractive red and gold display card. Blades made of high grade tool steel, tempered and polished. Handles are hardwood, stained red. Long polished steel ferrules

No. 42. Weight per card 7 lb.....per assortment, **$2.00**

One assortment in a box



No. 35

Consists of 4 each of Reliance screwdriver: 4, 5 and 6 in. blades, with blades of special steel tempered and polished. Heavy drawn reinforced steel ferrules with rivet through ferrule, blade and handle. Ferrule nickel plated and buffed. Fluted hardwood handles. Packed with display rack made of hardwood, mission finish, with label in white, violet and gold.

No. 35. Weight per assortment 4½ lb..per assortment **$5.50**

One assortment in a box

BAILEY WOOD PLANES

ADJUSTABLE

For rough outside work. The bottom, handle and knob are made from selected and well seasoned beech. The cutter is made of the finest quality English steel, tempered and ground by an improved process and is adjustable both endwise and sidewise. The frog is held in place by two machine screws which pass through the top iron and screw into two brass lugs. These lugs are screwed and securely pinned into the wood bottom.

HAY CARRIERS

LOUDEN JUNIOR FOR STEEL TRACK

Reversible and Swivel

Operates on double bead steel track. Has refined malleable iron frame with special quality gray iron wheels. The rope wheels are 4 inches and the track wheels 2¾ inches diameter on the tread.

The carrier has a wide flaring mouth and a round capped fork pulley which never fails to enter the carrier at the proper time, no matter from what angle the fork is drawn and regardless of swinging load or twisting ropes.

The fork is carried within 12 inches of the track. Each carrier is furnished with 1 fork pulley, 1 trip block, 2 end stops and the rope swivel. Weight 25 pounds

No. 439. Hay carrier complete as above. ....each, **$20.00**
No. 366. Fork pulleys, only. ....each, **3.30**

LOUDEN JUNIOR FOR WOOD TRACK

Built exactly like No. 431 except that it uses 4x4 inch wood track instead of steel

Each carrier is furnished with 1 fork pulley, 1 trip block and 1 rope swivel. Weight 28 pounds.

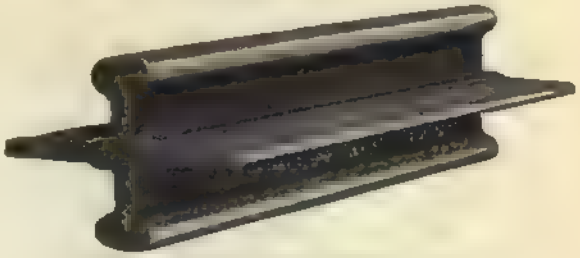
No. 441. Hay carrier complete, as described.....each, **$20.00**

STEEL TRACK SPLICES

Malleable iron complete with six bolts

No. 550. Splices, weight 1¼ pounds.... each, **$0.90**

HAY CARRIER FIXTURES



DOUBLE BEAD STEEL TRACK

High carbon steel, 2 x 1⅞ inches, weight per foot 2 pounds. If properly supported every 24 inches it will safely carry a load of 3000 pounds.

No. 571. Track for No. 430 carriers, with splices, per foot, **$0.60**

In lengths of six, eight and ten feet

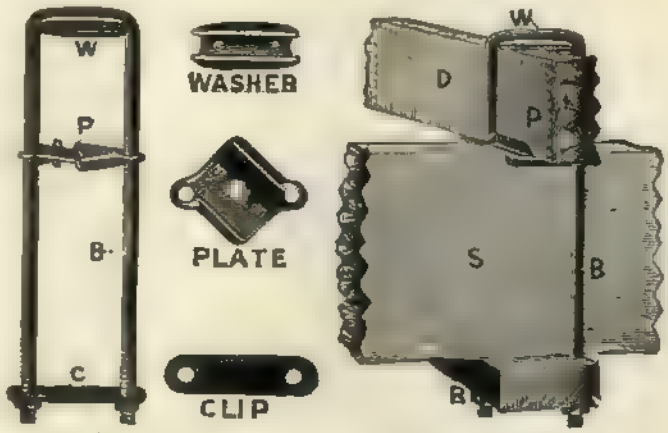
HAY RACK CLAMPS



Parts of Set Method of Construction

LOUDEN

Used for building hay racks of all sizes

By means of these clamps and plates the timbers of a rack can be put together and securely held in position without boring holes in the sills or upper cross pieces.

A rack can be built in one half the time when the clamps are used and the timbers are not weakened by having holes bored in them.

A set consists of 8 top washers, 8 intermediate plates, 8 lower clip plates and 8 U shaped clamp bolts. The top washers and intermediate plates are malleable iron; the bottom plates and clamps are steel.

No. 645-1. Clamps as described, with clamp bolts 14 x ⅜ inches, weight per set 11¾ pounds.....per set, **$3.00**

No. 645-2. With clamp bolts 16 x ⅜ inches weight per set 12¾ pounds.....per set, **3.25**

BLAKESLEE JET PUMPS

Fig. D1121

MODEL A

All parts are interchangeable. Freezing does not injure the pump, as it is self draining. Has no valves, cannot wear out. Pumps sandy or dirty water equally well. Entirely independent of engine. Very simple. Operates by a relatively small jet of steam entering the pump body and expanding its energy upwards. This pump cannot be successfully operated by gas or air. It is a steam pump, which, rightly operated, does its work effectively and without failure.

DOUBLE BARREL SHOT GUNS

FULTON HAMMERLESS

This Fulton hammerless is made by The Hunter Arms Co., makers of the L. C. Smith Guns, and is constructed on the same lines and by the same workmen as their highest grade guns. It is a strong, substantial gun, and will stand the severe test to which all guns are subjected in these days of heavy nitro loads.

Barrels—Fluid blued steel, matted extension rib, plain extractor, both barrels full choke bored.
Stock—Selected walnut half pistol grip, neatly checkered and finished, hard rubber butt plate, selected checkered walnut snap fore-end.
Frame—Case hardened, drop forged top lever, automatic safety rebounding locks.

No. 100—**12 gauge,** 30 or 32 in barrels, w't 7½ to 8 lbs. ..... each **$60.50**
No. 16100—**16 gauge,** 30 in. barrels, w't about 7 lbs. ..... each **60.50**
No. 20100—**20 gauge,** 28 in. barrels, w't about 6¼ lbs. ..... each **60.50**

L. C. SMITH HAMMERLESS

Grade Field.

GARAGE EQUIPMENT

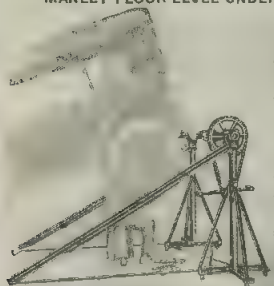
MANLEY, TRESTLES

Especially designed to hold a car in an inclined position in order to work on the under part of the chassis in safety and conveniently. Constructed of cast iron and steel; heavy cast sockets shaped to fit the tire adjustable post for seven positions, from floor to bottom of wheel sockets, 34, 37½, 41, 44½, 48, 51½, and 55 inches; equipped with two chocks bolted together and tied to the trestles for blocking the rear wheels, the tie rods are adjustable to different wheel bases. Each

No. A-66AT Trestles and chocks as illustrated above ✣$144 00

Weight each 200 lbs.

MANLEY FLOOR LEVEL UNDER-WORKER



Especially designed for garages, repair stations and wash racks, constructed throughout of steel and cast iron well supported and braced; the tracks are six inch channels stiffened in the middle; steel tie rods; electrically welded steel chain; drop forged steel hook; the unit is mounted on six ball-bearing casters. The chain is fastened to the axle or any location available and is pulled up to any height desired; when not in use the channels may be removed, the unit takes practically no room and is entirely out of the way. Each

No. A-68FLUW—Weight each 525 lbs. ✣$375 00

MANLEY TRUCK WHEEL DOLLY

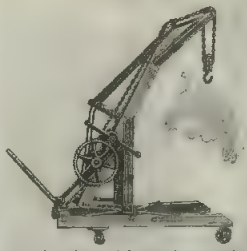
Especially designed for the removing, adjusting and handling of heavy truck wheels in garages, repair and tire stations. All steel construction with a supporting capacity of one ton, mounted on four ball bearing casters. After the truck has been jacked up, the projecting forks of the dolly are lowered until they pass under the wheel, then reversed until the weight of the wheel rests on the forks, holders swing against the tire, hooks are adjusted back of the inner rim to keep the wheels from falling and can be moved with ease to any location desired. Height over all 24 inches; width 44 inches; depth 37 inches. Each

No. A-70TWD—Weight each, 210 lbs. ✣$405 00

✣F. O. B. Pennsylvania Factory Only.

AUTOMOBILE CRANES

MANLEY, PORTABLE



Crane completely assembled as a portable floor crane with top extension in position. This top extension is only needed for high lifting and deep overhang, especially when taking out motor, etc.

Beam is of heavy angles built in an "A" shape for stiffness and in addition has a double truss on the top, making it very strong and rigid under the severest strain. Top extension pieces of flat steel and angles, quickly applied to the crane with two bolts and nuts. The saddle of two heavy angle uprights rigidly bolted to the angle foot and cross brace. The rear anchor piece is made of a 4 inch channel with a clip on each side properly spaced to receive the braces from top of saddle.

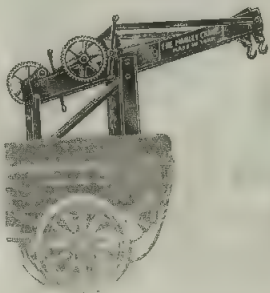
Base is made of selected white oak, 4 inches square. Has 6 inch wheels in front and roller bearing casters in rear. Gearing is exceptionally strong, of wide face and coarse pitch, protected by a guard for safety. Best grade of tested steel chain.

Each

No. A-100—Capacity 1½ ton; length of base 66 inches; width of base 36 inches; height of base 9 inches; height of lift 7 feet; overhang in clearance 36 ins.. $375 00

Shipping weight each 500 lbs.

MANLEY HEAVY WRECKING SERVICE



This crane is especially constructed for heavy wrecking service.

Made of heavy steel, amply braced and trussed for stiffness with a five ton lifting capacity, two chain lifting principle that works independently; quadruple chain reduction. The beam is pivoted on the king pin and can be raised or lowered to suit the job.

Width of frame 30 ins; length of frame 96 ins; projection beyond the king pin 48 and 54 inches; projection back of king pins 42 and 48 inches; distance from center to center of chain hooks 23 inches; height of king pin 38½ inches.

Each

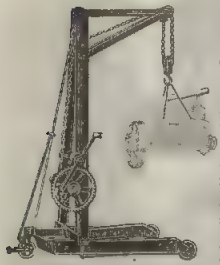
No. A-72WC—Weight each, 950 lbs. ✣$825 00

✣F. O. B. Pennsylvania Factory Only.

AUTOMOBILE CRANES

MANLEY

PORTABLE FLOOR CRANE



Especially designed for garage use. Always ready for instant use, will reach every corner of the shop.

The design of this crane is a cantilever bridge type, trussed down to the base with a steel tie rod, and has maximum strength. Combination cast iron and heavy I-beam base, with enough weight at the floor to hold it down. The base is of a broad spread mounted on three wheels, eliminating all twisting strains. Electric welded steel chain; the drum is steel and allows the chain to wrap singly. Hand may be moved from center to its extended position giving double leverage. For working in close quarters, this sliding feature is invaluable. Ratio of leverage, handle in center, 50 to 1; handle extended, 100 to 1. These leverages are more than double those of any other floor crane with equal capacity.

Each

No. A-62—Capacity 1 ton; width of base 36 inches; height of base 6 inches; height over all 8 feet; lift from floor 7 feet $315 00

Shipping weight each 515 lbs.

PULL-U-OUT

Portable Floor Crane.

This crane has many advantages over the regular crane, among which are its simplicity, adaptability, lightness and strength. Always ready with a strong pull or lift. For shifting heavy parts of machines, taking out or reseating engines, changing wheels or adjusting parts, etc., that are located on the under side of the car. It is handier to use for such purposes than jacks or overhead trolleys and is unlimited in action. Light in weight, but is so designed that it has tremendous strength, both in lifting device and crane.

The Pull-U-Out device can be detached from the crane and used as a block and tackle for innumerable purposes. It has a pulling strength seventy three times that of a man, and is strong enough for any ordinary purpose around a garage.

Crane made of 2½ inch extra heavy steel tubing, slip jointed and mounted on stone roller wheels. Black enameled finish.

Each

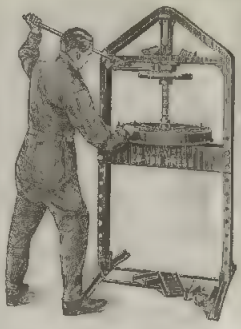
No. A-3CC—Complete with Pull-U-Out; base 3 feet 3 inches wide by 6 feet deep; height 10 feet; lifting capacity 2000 pounds; pulling capacity almost unlimited; lift from floor 9 feet 6 inches..... ✦$202 50

Shipping weight each 300 lbs.

✦F. O. B. Missouri Factory Only.

GARAGE EQUIPMENT

WEAVER PRESSES



Frame is made of 5 inch channel steel, in one piece, rigidly braced by a solid truss construction at the top; ball-bearing wheel; screw does not revolve; no bolted corners or connections to weaken. The lever mechanism provides a leverage of 1500 to 1 for normal service. This leverage can be doubled by shifting the ratchet arm to the center socket in the lever block.

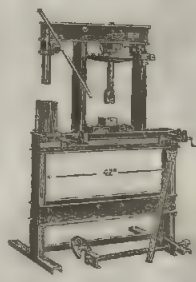
Each

No. A-8FP—Floor space 36x36 inches; width between uprights of frame 32 inches; height over all 72 inches; maximum capacity 28 tons; screw 2 inches in diameter with 3 pitch Acme mill cut thread; range of movement of approximately 12 inches..... $240 00

Crated; weight 435 lbs.

MANLEY

UNIVERSAL PRESSES



Combination, High Speed Rack and Pinion Press Attachment and Test Centers.

Frame is built of heavy 5 inch steel channels. Has two tables, the upper is stationary and the lower is adjustable.

The upper table, or press, has a clearance between uprights of 18½ inches and 19 inches under the screw. The lower table is a unit, rests on pins and is quickly and easily adjustable as to height. These clearances of 42 inches between uprights, are absolutely necessary to handle auto repair work. Screw is high carbon steel, 2 inch diameter; 4 pitch acme thread; does not revolve; travels 12 inches. Hand wheel is a heavy casting, 14 inches in diameter with 20 notches. Has two leverages, high power leverage 2200-6000 to 1 for heavy work and high-speed leverage of 1000 to 1 for light work.

Complete equipment; operating lever bar; two braced channel blocks; V plate with capacity up to 3 inches; V nose for screw; vise block; 1¼ inch threaded tie rod with two nuts and straps, for reinforcing lower table; extension piece for screw for lower table work and test centers.

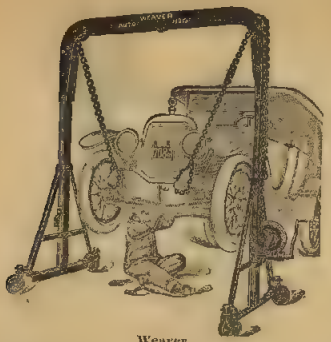
Each

No. A-21-42—Height over all 76 inches; floor space 40x36 inches $390 00

Crated; shipping weight each 475 lbs.

AUTOMOTIVE EQUIPMENT

AUTO HOISTS



Weaver

Showing Double Suspension

This hoist can be operated in cramped quarters. It is easily run into position. Requires only 12 or 14 inches space on either side of car. Adapted to conditions absolutely impossible to meet with other equipment. The frame is designed to permit height of arch to be increased approximately 12 inches, allowing uprights to be raised to desired height in the braces on either side. This increased height enables the hoist to raise the rear end of a limousine or touring car with the top up.

Showing Single Suspension

One chain of hoist may be carried over pulley in center of frame for performing work which can be handled to better advantage by single suspension. The hoisting mechanism is operated by worm drive, which is absolutely safe and positive. There are no gears nor ratchets to slip or break and allow the load to fall. Hoist is carried upon four ball and roller bearing casters, 5 inches in diameter. Construction throughout is of steel.

NO.	Height	Shipping Wt.	EACH
60WH	8 ft., 9 in.	500 lbs.	$200.00

PORTABLE FLOOR CRANES

Manley

Designed on the cantilever bridge type, trussed down to the base with a steel tie rod, and has maximum strength. Combination cast iron and heavy I-beam base; enough weight at the floor to hold it down; low center of gravity; base rests on three wheels, eliminating all twisting strains. Chain is 5-16 in. steel electric welded and is tested; crane hook is a drop forging and swivels. Drum is of steel and allows the chain to wrap singly. The gears are wide faced, with four pitch teeth and have proper safety guards. The operating handle may be moved from the center to its extended position, giving double leverage. Height over all 7 feet 6 inches.

NO.	Capacity	Lift	Overhang	Base Width	Wt. Ea. Lb.	EACH
66	1 ton	6½ ft.	35 in.	36 in.	500	$150 00

Manley

Manley Wrecking Cranes will handle wrecks of any description with one-third the labor, and in one-quarter to one-tenth of the time required by any other method. They are independent of road conditions; mud, snow, ruts, deep sand and chuck holes do not affect them. They are 100% method of handling wrecks. Easily and quickly mounted on a service car. Tilting beam a necessity.

NO.	Capacity	Wt. Each	EACH
101	2 ton	425 lb	$12,95

Manley

The Manley two-ton Combination Wrecking Crane is easily and quickly converted into a portable floor crane by mounting it on its base. It is light, strong and well-balanced. It has a deep overhang, which is necessary to garage work. Capacity as floor crane 1½ tons. Lift 7 feet. Constructed throughout from steel except gears and portable base. This is the same crane as No. 101 with the exception that it is provided with a base for floor use.

NO.	Capacity	Wt. Each	EACH

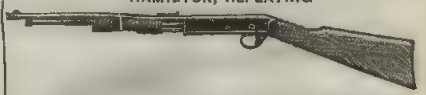
HAMILTON, REPEATING



Model No. 39, 22 caliber. Take Down with pump action. Magazine holds 15 Short, Rim Fire Cartridges. Automatic lock prevents accidental discharge while operating pump action, as trigger can not be pulled until breech is locked in firing position. Pump action is automatically locked when rifle is loaded and ready to fire. A trigger lock in the gun just back of trigger may be used to prevent accidental discharge when rifle is loaded. This lock is not automatic. Barrel is bronze lined, accurately rifled, with solid steel breech. Front sight knife pattern, rear sight open and adjustable, stock and forearm genuine walnut turned. Length over all 35 inches. Length of barrel assembly when taken down, 21¼ inches. Weight about 4 lbs each.

Each

No. 3922—22 caliber, shoots 22 short rim fire cartridges $27 00

One in a cardboard box; 10 in a wood case.

Prepare for the Boys who want

MECCANO

Toy Engineering for Boys

Meccano will be advertised in the leading boys' papers and science periodicals. Prepare for the demand this publicity will create—stock Meccano and reap the profits these eager boys will bring.

Any boy can build hundreds of toys with Meccano—he comes back to his dealer time and again for accessory outfits and extra parts. Each outfit complete with Instruction book and all necessary tools.

Main Outfits

Each

N2837—Contains 101 parts. Weight 1¼ lbs. Illustrated instruction book included, which shows how to make 78 different models, not including numerals or alphabet 2.86

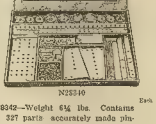
N2838—Weight 2 lbs. Contains 241 parts. A larger set than the No. N2837. Builds 105 models shown in the instruction book—trucks, aerial cable lines, aeroplanes, drop stamps, etc. 4.40

N2839

N2839—A big leader. Weight 4 lbs. Contains all the parts of the No. N2838 outfit plus a powerful Electric Motor which builds right into the models and makes them work like real machinery, complete with book of instructions showing how to build 105 models 7.34

N2840—Weight 4½ lbs. A fine outfit of 225 parts, enabling the boy to build a greater number of models, as windmills, cranes, swing bridges, airplanes, steam shovels, etc. The instruction book included shows how to build 151 models, and any boy can invest many more. ..... ■

N2841—Weight 5½ lbs. This is the same as the No. N2840 outfit but includes a reversing Electric Motor. A fine outfit for any boy The motor gives 1½ to the models 12.50



N2842

Each

N2842—Weight 6¼ lbs. Contains 327 parts accurately made pulleys and gears, worm wheels, plates, strips, angle girders, etc. The Manual shows how to build 166 models with this outfit. 13.22

N2843—Weight 7¼ lbs. A fine big outfit, which will please any boy Contains a reversing electric motor in addition to all the parts in the No. 2 outfit. 16.90

N2844—Weight 9½ lbs. Contains 503 parts—an extra number of the more advanced elements, for the boy who is well along in the art of building Complete with big manual showing how to build 242 models, and includes a reversing electric motor to make them run 22.04

N2844

Each

N2845—Weight 12 lbs. Contains 684 parts—a handsome gift outfit with which a boy can build many advanced models. Contains a Meccano Electric Motor and 136-page Manual, showing how to build 377 models 29.40

N2846—Weight 13 lbs. Contains 752 parts—everything in the No. N2845 outfit plus parts ordinarily included in Inventors' Outfits—braced girders, sprocket wheels, chain, contrate wheels and others. Also includes a reversing Electric Motor and a Transformer 36.74

N2847 Weight 19 lbs. Contains 940 parts. The most complete outfit made, gives the boy the widest possible scope in the field of practical engineering. The complete manual of instructions included shows how to build 328 models 58.80

Accessory Outfits

These contain all the necessary parts to convert an outfit into the next higher Accessory outfits should not be sold as starting outfits

Each

N2838 (Makes a No. N2837 into a No. N2838) 2.98

N2839 (Makes a No. N2838 into a No. N2839) 4.40

N2840 (Makes a No. N2839 into a No. N2840) 4.40

N2841 (Makes a No. N2840 into a No. N2841) 8.82

N2842 (Makes a No. N2841 into a No. N2842) 7.34

N2843 (Makes a No. N2842 into a No. N2843) 22.40

Inventors' Outfits

N2835

These accessory outfits contain new parts not included in other outfits. To be used in conjunction with regular outfits only.

Each

N2834—Inventor's Outfit 4.40

N2835—Inventor's Outfit 10.28

Meccano Electric Motors

Each

N2836—A sturdy, powerful motor for operating Meccano models. Designed to build into and form a rigid part of the model One way only, equipped with pulley and pinion 3.69

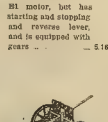
N2837

Each

N2838—The same as the 81 motor, but has starting and stopping and reverses lever, and is equipped with gears 5.18

N2836

N2839



Electrical Accessory Outfit

Each

N2835—Contains accessory parts only, to be used with regular Meccano parts to build models incorporating electricity, as Magnetic Crane, Electric Locomotive, Telegraph Set, Motor Starter, Electric Iron, etc 5.88

Meccano Transformer

Each

N2850—A safe reliable source of current for the Meccano Electric motor, where suitable house current is available No moving parts to get out of order. For 110 volts, 60 cycle A. C. only 3.66

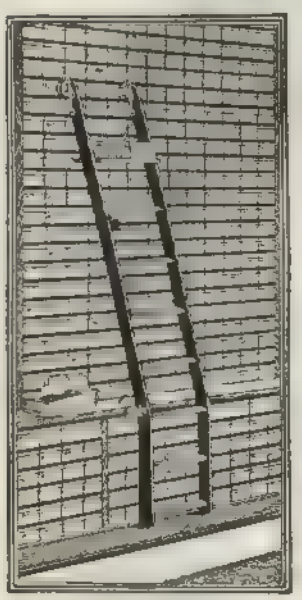
MILBRADT ROLLING STORE LADDERS



Showing No. 1 bent ladder, which runs on a track fastened to shelving near the top and runs close to wide base shelf.

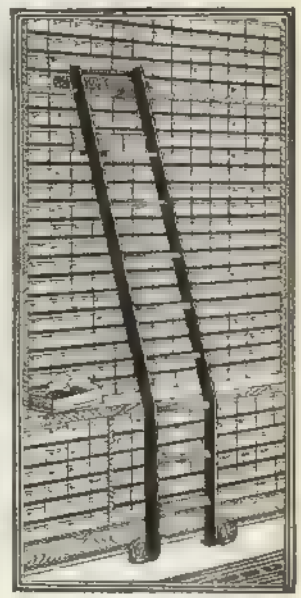
The Milbradt Rolling Stepladders are all made to order, and to fit each particular place, of good oak lumber, in the most artistic and neatest style, handsomely finished, are durable and perfectly safe, as they cannot jump the track. They take up the least possible space, run noiselessly and so easily, either empty or with operator upon them, that a slight push will propel a ladder the length of an ordinary store. These ladders have an extra wide shelf at the top, which affords great convenience in handling stock. All iron work on ladders, as well as the brackets to hold up steel track, is malleable, artistic and strong and aluminum finished.

No. F1—Suitable fixtures at the top to run on steel track and rubber covered rollers attached near the lower end to run against the edge of base shelf. Best for all around purposes where shelving is reasonably strong. With fixtures★ .....each $36.00

No. F2—For shelving that is not strongly built. Most of the weight of ladder and operator rests on the floor. Runs on a hardwood track at the top and has cushion tired wheels to run on the floor. No track required. Wit fixtures★ ....each $36.00

No. F10—Bent ladder that runs on a flat hard wood track screwed on top of original low shelving. When top of shelving is reasonably strong this is the most convenient way to apply a ladder to this style of shelving. Wit fixtures★ .....each $36.00

No. F15—Trolley or ceiling ladder that suspends from a track fastened to ceiling. Has at the top, suitable iron in which paper filled wheels run noiselessly on the steel track and also has cushion tired wheels that run on the floor. Very strongly built and specially adapted for hardware stores or any place of business where heavy goods are handled. With fixtures, each★ $36.00



Showing No. 2 bent ladder, which runs on floor.

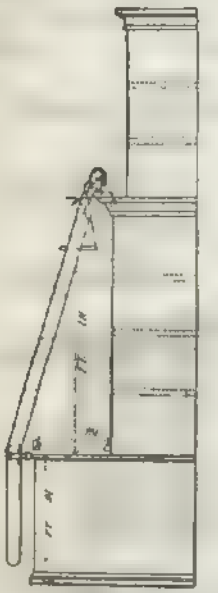
Approximate W't Ladder Crated 50 Lbs.

No, F11—Steel Track—For No. 1, regular strength★ per ft. $0.70
No, F150—Steel Track—For No. 15★ .....per ft. .70

Approximate W't Steel Track 1 lb. per Foot.

No, F20—Hardwood Track—For No. 2, complete★ per ft. $0.50
No, F200—Hardwood Track—For No. 10, complete★ per ft. .50

Approximate W't Steel Track 1 lb. Per Foot.



Showing No. 10 bent ladder, which runs on track screwed on top of original low shelving.

HOW TO ORDER

Ladders as Nos. 1 and 2 give the exact height from floor to top of base shelf; the exact width or projection of base shelf and then the exact height from top of base shelf to top of shelf to which track is to be fastened and the track shell be fastened to a shelf that is about 3 feet from the top.

Steel track for ladders No. 1, both regular and extra strong, is 1 inch in diameter and therefore does not block up any space when fastened up opposite the edge of shelf. When ordering steel track give the total length of each line of shelving; second, give distance from center to center of uprights and state how many brackets are required to hold up the steel track. For regular steel track the brackets cannot be more than 4 ft. apart. When the uprights to which bracketts are to be fastened are more than 4 ft. apart, it is necessaary to use extra strong steel track.

Ladder No. 10, give the exact height from floor to top of base; the width or projection of base and then the exact height from base to the top of shelving or cornice on top of which track is to be fastened. Also state how much the cornice or moulding on top of which track is to be fastened, projects out over lower part of shelving.

Trolley ladder No. 15, is only necessary to give the exact height from floor to ceiling and the exact length of each line of track wanted.

To order wood track for ladders Nos. 2 and 10, it is only necessary to state the number of feet required.

For further information write for special Rolling Ladder Catalogue.

Showing No. 15 trolley or ceiling ladder, which suspends from a track fastened to ceiling.

★ **Items Marked Thus ★ Are Shipped From Factory Only.**

REVONOC FIRE EXTINGUISHERS

REVONOC Fire Extinguishers are examined, approved and labeled under direction of National Board of Fire Underwriters.

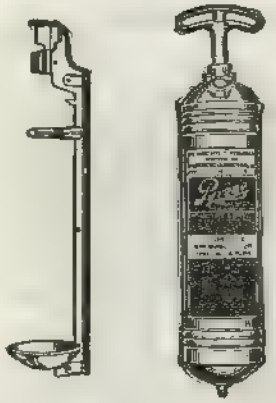
The chemical charge consists of 1½ lbs. bicarbonate of soda and 4 oz. of sulphuric acid, which can be obtained at any drug store. The soda is to be dissolved in about three gallons of water. The acid is retained in the bottle and held in the bottle holder from the top of the extinguisher. In use the extinguisher is turned bottom side up. This allows the acid to mix with the soda solution, creating a very powerful gas with a pressure sufficient to throw the chemical stream 50 feet.

This stream as a fire fighter is fifty times as effective as plain water.

Extinguishers of this type will freeze at 32 degrees Fahrenheit, and should not be kept in an unheated room in winter.

No. R3 REVONOC—Approved, 3 gal., made of special cold rolled Lake Superior copper, all seams hand riveted, solder sweated and lead filled, entire inside lead lined, top collar and cap of best steam brass carefully fitted by expert workmen, patent removable brass bottle holder, improved goose-neck, hose connection, extra heavy, chemically treated hose with solid lead nozzle, tested 350 lbs., hydrostatic pressure, packed complete in box with acid and soda for one charge, w't each 23 lbs.,
per dozen $324.00

PYRENE FIRE EXTINGUISHERS



Pyrene Liquid contains neither acid, alkali salts, no moisture, will not stain or injure anything with which it may come in contact. Will not freeze at a temperature of 50 degrees F. below zero. The device in which Pyrene is used is a double-acting pump easily operated by hand, capacity one quart, made of brass and white metal throughout.

When Pyrene liquid is subjected to a temperature of 200 degrees F or over, it is immediately transformed into a heaavy, dry, cohering, non-poisonous gas blanket, which surrounds the burning material, cutting off the air supply necessary for the life of the fire. Can easily be used by a woman or child. It is practical for home, factory, automobile or motor boat.

No. 101—Brass, with wall bracket, w't each 6 lbs.,
per dozen $120.00

No. 102—Nickel, with wall bracket, w't each 6 lbs.,
per dozen $201.50

Our reputation founded on over sixty-seven years' business stands back of the GUARANTEED brand.

All goods branded GUARANTEED are guaranteed to be of highest quality material and workmanship and free from imperfections.

METAL BOXE

These boxes prevent tampering with the fire extinguishers.

No. 1016—Light type, for interior use made of rust proof metal, finished red, w't each 2 lbs.,
per dozen $36.00

PYRENE LIQUID

Quart Cans.
No. 103—Per dozen $18.00
Gallons Cans.
No. 104—Per dozen $72.00

HAND FIRE PUMPS

The Geyser uses plain water to which salt may be added in winter to keep from freezing.

No. R25D—Geyser, capacity 5 gal., made of No 26 gauge galvanized iron, double action pump throws a stream 40 to 50 feet, w't each 12½ lbs.,
per dozen $132.00

MINERS' CARBIDE LAMPS

GUY'S DROPPER MINERS' CAP LAMPS

Made of heavy gauge sheet brass throughout. Equipped with Guy's patented water dropper, which is fitted with valve cleaner. If dropper becomes clogged, a few turns of the knurled thimble at end of dropper tube will open it. Has a 2½ inch deep brass polished reflector intended for miners working in wet places or where the roof is low. The reflector is deep enough to protect the burner from water. Round wire hoop and clasp. Carbide container has two knurled bands which enable miner to get a firm grip when unscrewing the container from the water tank. Self lighter attached to reflector. Weight each, about 5 ounces.

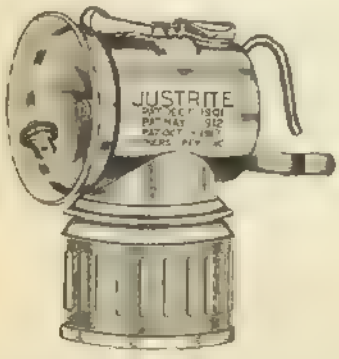
No. 28. Polished brass . . . . . each, **$1.00**
No. 280. Nickel plated . . . . . each, **1.50**

JUSTRITE MINERS' CAP LAMPS

Are made in two parts, water reservoir and carbide container, drawn from seamless brass. Attached parts are riveted and soldered inside. The reflector is polished and is part of the lamp and cannot get loose or break off. The water cap has water chamber to prevent leakage, fits snug and is easy to open and close. Hook fits all caps. Clasp is made of spring brass, holds lamp secure to cap and will fit all standard cap shields.

Equipped with lighter attachment, round hook and clasp, lever valve feed, No. 66 lava tip and 2¾ inch reflector. Height of lamp 4 inches; diameter of bottom 2 inches; water tank is 1¾ inches in diameter and 2¾ inches long; candlepower 16.7; capacity 2 ounces ¼ inch carbide; weight 5 ounces

No. 407. Polished brass lamp only. . . . . each, **$1.10**
No. 85. Polished brass, with No. 77 carbide can . each, **1.25**



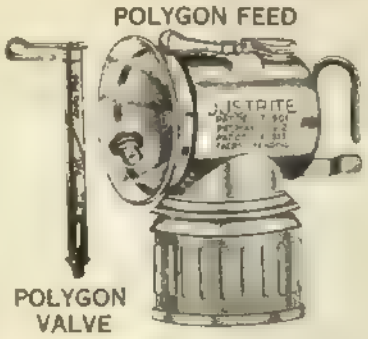
With Liberty Feed and New Reinforced Bottom

The Liberty valve is designed to give a liberal flow of water, because the water flows through the inside of the valve stem, instead of around a restricting wire or rod. No wire or rod is used in the Liberty valve water tube, to interfere with the flow of water to the carbide. Equipped with lighter attachment, round hook and clasp, No. 66 lava tip and 2¼ inch reflector. Height of lamp 4 inches, diameter at bottom 2 inches. Candlepower 16.7. Capacity 2 ounces, ¼ in. carbide. Weight 5 ounces.

No 907. Polished brass lamp only. . . . each **$1.25**
No. 989. Nickel plated lamp only . . . . each, **1.50**
No. 965. Bottom only, polished brass. . . . each, **.25**
No. 935. Bottom only, nickel plated . . . . each, **.30**

MINERS' CARBIDE LAMPS

JUSTRITE MINERS' CAP LAMPS



Polygon feed; lighter attachment; round hook. Standard Justrite shape with permanent reflector, new metal water door and reinforced bottom.

2¼ Inch Concave Reflector

No. 707, Polished brass . . . . . each, **$1.10**
No. 709. Nickel plated. . . . . each, **$1.25**

3 Inch Saucer Shape Reflector

HAMMERLESS

Model 1914, Take Down, 20-17-15 Shot

Beauty of outline, typical of all savage arms is increased in this model by introduction of a trombone action slide handle, shaped as a regular forearm. This overcomes the strained cramped position of the left arm and wrist unavoidable with other .22 caliber arms of the trombone type and permits the shooter to grasp the rifle with the left hand easily and as far forward as he desires. Solid breech hammerless, 24 inch octagon barrel, American walnut shotgun full pistol grip stock with steel butt plate, head front sight and adjustable wind gauge rear sight. Magazine holds twenty .22 short, seventeen .22 long, or fifteen .22 long rifle cartridges. Length taken down 27½ inches.

NO.	Wt. Each	EACH
SM1422	5¾ lb.	$21 00

REPEATING SADDLE GUNS

Model 1899, Solid Frame, 6 Shots

High pressure steel barrel, blued frame, case hardened lever and butt plate; sporting front and adjustable rear sights. An automatic indicator always shows the number of cartridges in the magazine. This carbine has a solid wall of steel between the barrel and the operator, and a safety device that locks the mechanism and prevents accidental discharge.

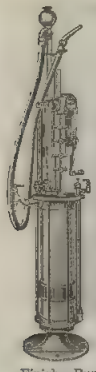
GASOLINE OUTFITS



MOGUL GASOLINE STORAGE OUTFIT

Pump measuring 1, 2, 3, 4 or 5 Gallons.

Long distant type, adjusted to measure, 1, 2, 3, 4 or 5 gallons at a stroke; 9 inch seamless brass cylinder; ¾ inch brass pistin rod; heavy brass valves and stuffing box; cut steel gears, bronzed, bushed and protected by gear guard; case hardened bearings and spindles; normal capacity 25 gallons per minute. Automatic Gear Shift For quick return of rack bar, which can be reversed in a ratio of one reverse motion of the handle to five forward turns.

Indicator—an aluminum etched dial is attached to front of rack bar and is calibrated for every pint from one pint to five gallons, showing at a glance the amount pumped in pints if stopped between gallon buttons.

Discharge Register—Automatically tallies every 5 gallons pumped from 0 to 50 gallons and is reversible from any point.

Removeable Pump Handle—Handle may be slipped off, making pump fool and meddler proof.

Quality Stops—For 1, 2, 3, 4 and 5 gallons are located in front on pump standard. To change measurements it is but necessary to push in the nickeled disc stamped with the quantity desired.

Finish—Pump and Cabinet are highly finished in vermilion enamel, with nickel trimings.

Tanks—Are built in any capacity and any gauge of galvanized steel; riveted and soldered throughout. Both pumps and tanks are tested inspected and labeled by the National Board of Fire Underwriters.

GASOLINE OUTFITS

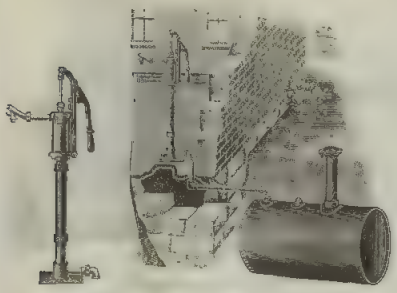
WESTERN PERFECTION OUTFIT



For Private Garage.

Tested, labeled and approved by the National Board of Fire Underwriters.

Pump is built along the same lines as the long distance styles with lever instead of rotary motion of the handle. It discharges an approximate quart at a stroke and is fitted with locking device and automatic shut-off cock.

Tank is made of heavy galvanized steel, coated with three coats of asphaltum, evaporation and rust proof. Equipped with heavy brass foot valve at bottom of suction pipe, insuring the discharge of gasoline at the first stroke of the handle.

The filler pipe is of heavy galvanized iron, fitted with lock cap and galvanized iron inner tube that extends to bottom of tank and is fitted with double strainers made of fine mesh brass wire cloth.

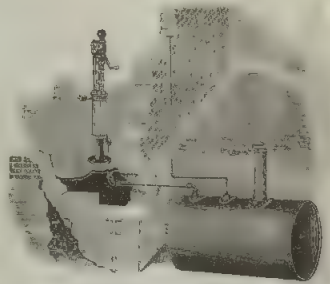
GASOLINE OUTFITS

WESTERN—LONG DISTANCE SELF-MEASURING OUTFIT



(Complete outfit.)

(Shows pump fully equipped.)

Tested, labeled and approved by the National Board of Fire Underwriters.

Guaranteed by the manufacturers against any defect in material or workmanship for a period of three years.

This equipment designed especially for inside discharge. The pump is located inside the building at most suitable location, while tank is buried and filled outside

The pump is adjusted to measure gallons, half gallons, quarts or pints at a stroke; is built of cast and wrought iron with cylinders, valves, stuffing box and piston rod of brass; cut steel gears; equipped with discharge register that automatically tallies every gallon pumped from 0 to 10 gallons; with safety automatic shut-off cock and locking device; requires but 2⅕ turns of the handle to discharge a gallon, giving an actual capacity of 10 gallons per minute. Finished in vermilion enamel with nickel trimmings.

Tank made of galvanized steel, riveted and soldered throughout and coated with three coats rust-resisting paint. Fitted with heavy brass double foot valves, double fill pipes with strainers and cap.

Furnished with each outfit—locks and keys, bolts for fastening pump, measuring stick for tank, two 1½ inch pipe unions and complete instructions for installing. No pipe furnished. Illustration shows pump with meter, filter and two-way nozzle. These extras are not included in price of outfit. Height to top of pump 47 inches.

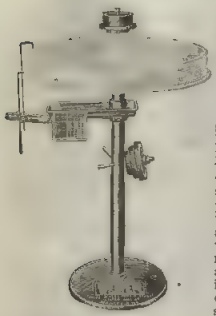
GARAGE EQUIPMENT

WEAVER WIRE WHEEL REPAIR STANDS



Heavy iron base; standard is of heavy steel tubing equipped with tool tray conveniently arranged.

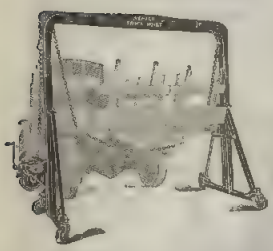
So designed as to permit the wheel to be held securely in position by a cone bearing contact with the machined surface of the interior of the hub. Three accurately machined cones are supplied the proper combinations of which to fit the hubs of all types of wire wheels are supplied by the metal chart attached to tool tray. Two adjustable indicators are provided for the purpose of revealing the slightest variation in the rim. When it is necessary to replace a considerable number of spokes, the proper aligning or trueing of the rim is quite essential and this simple indicator facilitates this work very materially.

Each

No. A-3WW$—Weight each 75 lbs. $90 00

Packed loose.

WEAVER'S HOISTS



Constructed of heavy channel steel, with the arch reinforced on either side by heavy steel plates.

The hoisting mechanism is of the well known worm drive type which not only supplies an enormous leverage for raising the load, but also makes it absolutely impossible for the load to be accidentally released and allowed to fall. There are no ratchets or dogs to break or slip and the load is held securely elevated in any desired position. In addition to the safety feature, this construction has the advantage of allowing the burden to be raised or lowered the minutest fraction of an inch and held firmly in that position as long as desired.

Has a compound leverage giving a lifting leverage of 400 to 1. An auxiliary lever operated directly onto the drum enables the chain to be adjusted to the load very rapidly.

Each

No. A-8TH—Lifting capacity 6000 pounds for double suspension and 4000 pounds for single suspension; width between frame 8 feet 4 inches; minimum height, 8 feet 4 inches; maximum height 10 feet.. ✣$600 00

Shipping weight 900 lbs.

✣F. O. B. Iowa Factory Only.

GARAGE EQUIPMENT

WEAVER'S HOISTS

Constructed of heavy channel steel, with the arch reinforced on either side by heavy steel plates. The hoisting mechanism is operated by worm drive which is absolutely safe and positive. No gears or ratchets to slip or break and allow the load to fall. Can be run into position over a car in a crowded shop without requiring more than 12 to 14 inches space on either side of the car.

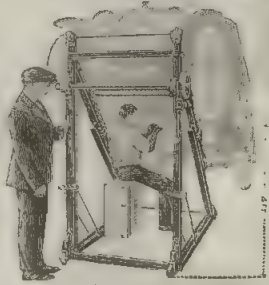
The frame is designed so as to permit the height of the arch to be increased approximately 24 inches; this enables the hoisting of the rear end of a car with the top up, for removing the rear system.

Each

No. A-7AH—Lifting capacity 4000 lbs. for double suspension and 3000 lbs. for single suspension; distance between uprights 6½ feet; minimum height 7½ feet; maximum height 9 ft. 2 in. $360 00

Shipping weight 555 lbs.

KLEMME, PORTABLE HOIST AND CRANE



Constructed of heavy channel steel, and well braced.

With this hoist a motor may be overhauled without taking the motor out of the frame, main and connecting rod bearings can be adjusted just as well with the use of this hoist as by taking the motor out, thus making a saving in time and labor. Tested to a strain of 13,000 lbs., and is guaranteed to lift any size or weight of motor car. Provided with a safety locking device which locks a car at any desired height by simply inserting a stop pin in a hole in the web of the standards.

The crane attachment is included in the outfit, and may be attached or detached in a few seconds, and is a very practical and useful equipment in itself for lifting out motors, transmissions, etc.

Each

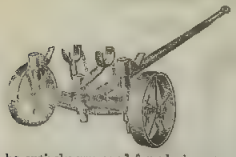
No. A-30KAH—Lifting capacity of hoist, any size automobile to 3 ton trucks; crane 3000 lbs.; width between frame 44 inches; length over all 76 inches; lifting height 48 to 53 inches; extreme height with crane attachment 8 feet ..... ✣$525 00

Shipping weight complete 600 lbs.

✣F. O. B. Illinois Factory Only.

WRECKING TRUCKS

MOSHER



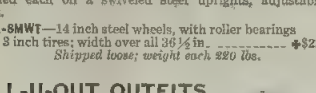
Constructed of high grade steel throughout. The design of the rear support blocks is such that they will fit any axle. The towing pole is of telescopic construction and can be adjusted for use under the longest cars. It can also be entirely removed for placing car on elevator, or other conditions making such removal convenient. The axle shaft is cold rolled steel on long roller bearings. The wheels are free to rotate in the axle, permitting short turns. The front end support a swivel offset yoke, is provided with two heavy chains which may be secured to the springs, to prevent the possibility of side slipping. For rear end breakdowns, two V blocks are provided each on a swiveled steel uprights, adjustable for height.

Each

No. A-8MWT—14 inch steel wheels, with roller bearings and 3 inch tires; width over all 36½ in. ..... ✣$225 00

Shipped loose; weight each 220 lbs.

PULL-U-OUT OUTFITS



(This cut shows Pull-U-Out in operation)

This new mechanical device makes heavy lifting and pulling simple, quick and easy. With it a person, unaided can pull a big touring car out of ditch or hub deep mud, or right the car if overturned. Operates in any position. The stakes form a hitching post that cannot be moved, no matter how great the strain pulling against them, and yet can be jerked out of the ground without effort from other direction.

Each

No. A-1—Equipped with 40 feet of cable, two 7 foot chains and three stakes; lifting capacity 1 ton dead weight; will easily pull heaviest touring car out of trouble; reach, 10 ft. lift or 17½ ft. of pull; weight 28 lbs. ..... ✣$56 25

No. A-2—Equipped with 50 feet of cable, two extra heavy 7 foot chains and three stakes, lifting capacity 3000 pounds dead weight; reach, 12½ ft. lift or 19 ft. pull; for trucks and extra heavy hoisting and pulling, weight each 60 lbs ..... ✣123 75

No. A-2-X—Equipped with 80 feet of cable, two extra heavy 7 foot chains and three stakes; lifting capacity 3000 pounds dead weight; reach, 20 ft. lift or 27 ft. pull; for truck and extra heavy hoisting and pulling; weight each 90 lbs ..... ✣135 00

No. A-2-X8—Equipped same as No. A-2 X, with additional of internal brake for controlling device when lowering extra heavy weight for long distance; weight each 95 lbs ..... ✣146 25

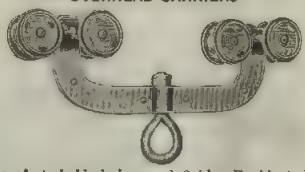
One outfit in a box.

✣Trucks—F. O. B. Illinois Factory Only.

✣Pull-U-Out Outfits F. O. B. Missouri Factory Only.

GARAGE EQUIPMENT

WAGNER OVERHEAD CARRIERS



Made of steel, black japanned finish. Double trolley or eight-wheel carrier especially adapted for heavy articles weighing up to 2000 lbs. Wheels are 3 inches in diameter and equipped with roller bearings. Simple and easy to install; should be in every shop.

Each

No. A-1200—Length over all 21 inches $25 50

Packed loose; weight each 17 lbs

HAWKEYE TRACK

Made of 12 gauge high carbon steel. Can be fastened to ceiling or side walls. Furnished in 4, 6, 8 and 10 foot lengths.

Nos.	A-25-4	A-25-6	A-25-8	A-25-10
Length, ft	4	6	8	10
Weight each, lbs	15	22	30	37½
Per Foot	$2 40			

Packed loose.

BRACKETS

Each

No. A-1H—Wrought steel $2 28

Packed loose; wt. each about 2 lbs.

HOISTS

Wrought steel, painted red. Center pull triple sheave hoists. To be used in connection with above carrier. By using the safety lock or self operating clamp, one man can handle a load weighing up to 700 lbs.

Price does not include trolley or rope.

Each

No. A-60—Capacity 4000 lbs. $17 40

Packed loose; weight each 13 lbs.

WEAVER UNIVERSAL AXLE STANDS

Built to handle any rear axle. Simple and durable. Truss rods do not interfere. Axle may be clamped securely, has clamp for drawing tortion tube. Stand has large tool tray and removable oil pan. Crotches are offset to side and back and are interchangeable. Equipment is portable. Carries a wide, heavy base amply broad to prevent tipping even when supporting the largest axle and makes it unnecessary to anchor the stand to the floor. Two men can easily move stand from one part of the shop to the other.

Each

No. A-2WAS Weight each 180 lbs. $102 00

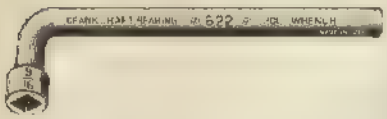
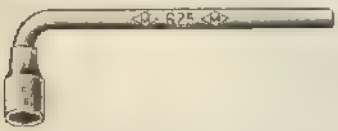
MOSSBERG SPECIAL FORD WRENCHES



No. 622

For crank shaft bearing bolts; heavy forged steel construction; length 10¼ inches; burnished nickel finish

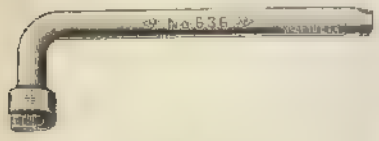
No. 622—Main Bearing Bolt Wrench; wgt. 1½ lbs Each $0 90



No. 625

Fits all ⅜-inch cap screws; indispensable for Ford repair shops; length 7¼ inches; burnished nickel finish.

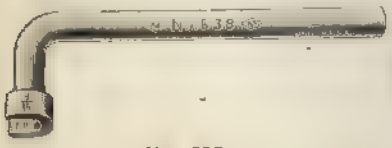
No. 625 — Mossberg Socket Wrench; wgt. ½ lb... Each $0 40



No. 636

For fly wheel cap screw; length over all 11½ inches; burnished nickel finish.

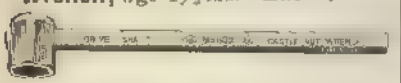
No. 636 — Mossberg Socket Wrench; wgt. 1 lb... .Each $1 10



No. 638

Designed for use on Ford wrist pin and wherever a wrench of this size can be used; length 9¼ inches; burnished nickel finish.

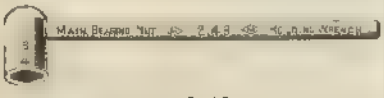
No. 638 – Mossberg Socket Wrench; wgt 1½ lbs. Each $1.10



No. 632

Drive shaft or differential pinion gear castle nut wrench; length 10¾ inches; burnished nickel finish

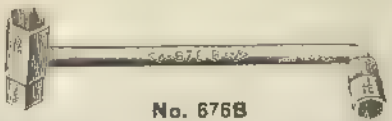
No. 632 — Mossberg Socket Wrench; wgt. 1¼ lbs Each $0 80



No. 2149

Designed for use to hold nuts when making adjustments of main bearing bolts; length 10 inches; burnished nickel finish

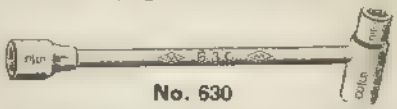
No. 2149 Mossberg Socket Wrench; wgt. 1 lb... Each $0 48



No. 676B

Triple socket wrench; socket sizes ⅜, ⅞ and 15/16-inch; length 10¾ inches; burnished nickel finish.

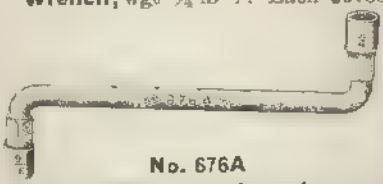
No. 676B – Mossberg Socket Wrench; wgt. 1½ lbs Each $1 3



No. 630

Especially designed for all cylinder head cap screws and rear axle housing bolts; socket sizes ½ and 5/8-inch openings; length 9¾ inches; burnished nickel finish.

No. 630 — Mossberg Socket Wrench; wgt ¾ lb .. Each $0.65

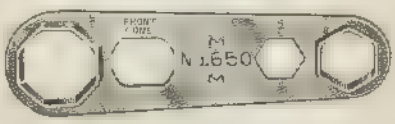


No. 676A

Double socket wrench; socket sizes ½ and ¾-inch. Length 9¾ inches. Burnished nickel finish

No. 676A — Mossberg Socket Wrench; wgt 1¼ lbs...Each $0 75

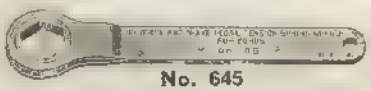
HUB CAPWRENCH



No. 650

Heavy steel construction; length 8½ inches; burnished nickel finish.

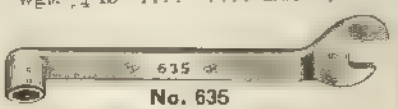
No. 650 Hub Cap Wrench; wgt ½ lb..... Each $0 18



No. 645

Ratchet tension spring wrench for reverse and brake pedal; heavy steel with properly hardened ratchet and spring; length 6⅛ inches; burnished nickel finish.

No. 645—Reverse and Brake Pedal Tension Spring Wrench; wgt. ¼ lb ..... Each $0 50



No. 635

Cylinder head screw and spark plug wrench; ⅝ and ¾-inch openings; Heavy steel construction, burnished nickel finish, length 10 inches

No. 635 Mossberg Socket Wrench; wgt. ⅞ lb Each $0 85

CONNECTING ROD WRENCH

No. 623

Fits fourth connecting rod bolts and units without dismounting motor; length 10¼ inches; burnished nickel finish.

No. 623 — Connecting Rod Wrench; wgt. 1 lb... Each $0.45

FORD SPECIAL SPEED WRENCHES

Of standard size, length, sweep and clearance for use on Ford cars.

No. 611 Ford Special Speed Wrenches; socket size ⅜-inch; length 19¼ inches; burnished nickel finish; wgt 2 lbs .Each $0 80

No. 612—Ford Special Speed Wrenches; socket size ⅝-inch; length 19¼ inches; burnished nickel finish; wgt. 2 lbs. Each .80

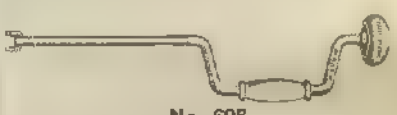
No. 613—Ford Special Speed Wrenches; socket size ½-inch; length 14¼ inches; burnished nickel finish; wgt. 1½ lbs. Each 75

VALVE GRINDERS

No. 607

Short type; fits all valves; wood swivel top and grip; rocker points; length 4¾ inches; burnished nickel finish; weight ¼ lb.

No. 607—Valve Grinder .Each $0 50



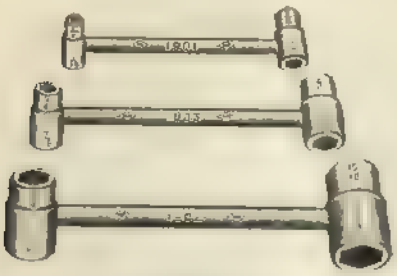
No. 608

Long shank brace type; top and center swivel grip handles; rocker points; length 21 inches; burnished nickel finish; weight 1½ lbs.

No. 608 -Valve Grinders Each $0 80

MOSSBERG WRENCH SETS

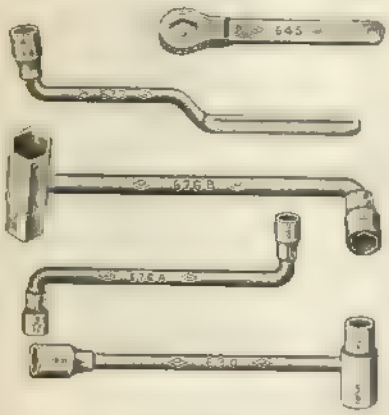
SOCKET WRENCH SETS



No. 1900

Consists of three wrenches with 12 socket sizes; special steel bar with drawn cold steel sockets; burnished nickel finish
No. 1901 wrench has 4 hexagon sockets, sizes ⅛, ½, [illegible]
No. 1902 wrench has 4 hexagon sockets, sizes [illegible], 1,
No. 1903 wrench has 4 square sockets, sizes [illegible]
No. 1900—Socket Wrench Sets; wgt. 4½ lbs. Each $3 75

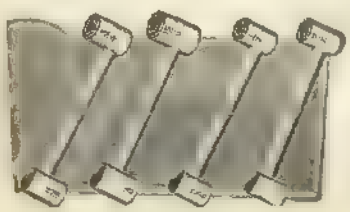
WRENCH SET FOR FORD



No. 676

Consists of 5 wrenches made up of individual wrenches described in detail on previous page; have total of 10 socket openings
No. 676—Wrench Set for Ford; wgt. 4¾ lbs Each $3 60

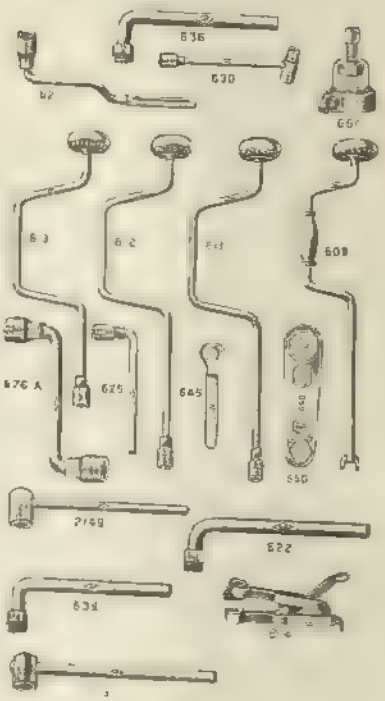
HEAVY DUTY REPAIR SET



No 17

Consists of 4 wrenches and 8 socket sizes; made of special heavy steel; burnished nickel finish.
No. 17—Heavy Duty Repair Set; length each wrench 9½ inches; packed in canvas kit; weight 4⅛ lbs. Each $3 75

GARAGE WRENCH SET FOR FORD



No. 670

A complete set of tools necessary in every Ford garage contains one each of the following:

No. 611 Speeder, 9/16 inch opening.
No. 612 Speeder, ⅝ inch opening.
No. 613 Short speeder.
No. 2149 Offset socket wrench, ¾ inch opening.
No. 608 Long valve grinder
No. 636 Fly wheel cap screw wrench.
No. 638 Wrist pin wrench
No 632 Differential pinion gear wrench
No. 630 Triple end cylinder head screw and rear axle housing nut wrench.
No 623 Connecting rod wrench.
No. 645 Reverse and brake pedal wrench.
No. 625 Offset socket wrench, 9/16 inch opening.
No. 660 Wheel puller.
No. 622 Crank shaft bearing bolt wrench.
No 650 Hub cap wrench.
No. 654 Valve lifter.
No. 676A Double end socket wrench, 9/16 and ¾ inch openings.

No. 670—Garage Wrench Set for Ford; burnished nickel finish; weight 30 pounds.. ....Each $13.00

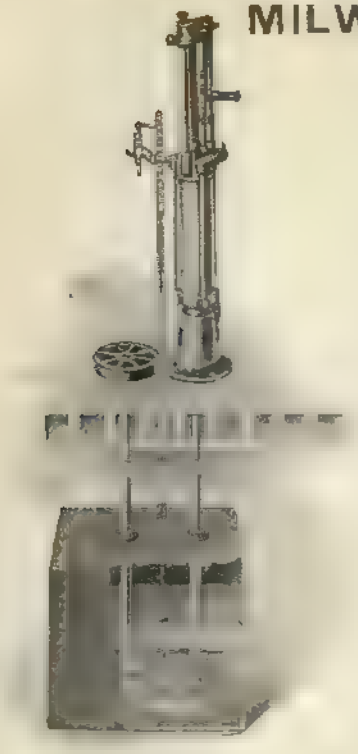
MILWAUKEE PUMPS



TYPE 23

Self-Measuring Cellar Outfit

Provides an efficient method for the storage and handling of kerosene and lubricating oil for stores and other retailers. It is especially commendable because the liquid can be stored in the basement while the pump is placed on the floor where the liquid is sold, thus economizing floor space.

The pump having adjustable stops for gallons, half-gallons and quarts, and being fitted with non-drip faucet, discharge register counting to 10, drip pan, grate and lock and key, the outfit works remarkably easy, measures with extreme accuracy, and is as essential to those retailing kerosene and lubricating oil, as a scale is for weighing solid merchandise.

Type 23 is not sold without tank. If a pump only is desired, see Type 33

TYPES 18 and 19

Battery Storage Systems

This battery of separate tanks forms an L. P. system for the storage and handling of number of different kinds of non-explosive liquids. All the dimensions of the tanks are the same, with the exception of the width, which varies according to the capacity.

Pumps are especially adapted to the liquids they are ordered for. Are of the Milwaukee standard self-measuring design Type 18 has gallon pump with adjustable stops for half-gallons and quarts. Type 19 pumps quarts, pints and half-pints.

Tanks are constructed of heavy steel, closely riveted, hard soldered, and finished on the inside by the well-known Milwaukee "Kant-Leek" process. An 18-inch manhole (on all tanks over 60 gallons capacity) affords easy access for cleaning or inspection. Are also equipped with an 8-inch fill opening with quick opening cover and drip basin, with grate, plug and removable strainer. Barrel tracks are included without extra charge.

"KANT-LEEK" UNDERGROUND STORAGE TANKS

Each has the Underwriters' Label. Built of heavy galvanized steel, and nationally known for durability and service; each has a measuring gauge, a fill pipe fitted with inner tube and strainer, lock, brass cap with vent valve, also interior suction pipe.

If pumps are ordered without tanks, a foot valve is required in the tank to hold the liquid up in the pipe line. Where tanks are ordered complete with pumps, this set of double foot valves is included without extra charge.

Each	$3.25	3.75	5.00

OILY WASTE CANS

Walters

Made according to specifications of the National Board of Fire Underwriters

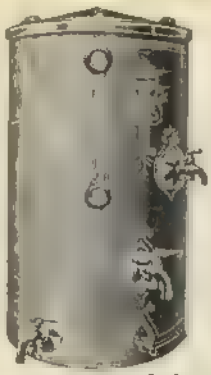
Sheet steel construction with seams brazed with hard brass spelter solder which will not melt at a welding heat.

Waste can burn in this can without melting solder or opening seams

Thoroughly fireproof and a reliable floor protection.

Nos.	1	2
Diameter, inches	12	16
Height, inches	13½	18
Capacity, gallons	7½	15½
Weight each, pounds	10	14
Each	$5.25	7.00

CROSS OIL FILTERS



The Cross is designed for filtering engine and common machinery oils.

Very little steam (exhaust) is required and if the filter is kept in a warm place it will not be necessary to make steam connections.

The only object of using heat is to increase the speed and capacity of the filter

The Cross Style A is recommended for use where lubricating oil is used in very large quantities, and in the interest of economy it is desirable to make pipe connections by means of gate valves so that the filtered oil can be pumped to any part of the plant desired. It is also adapted for use with oiling systems. Both styles are made in various sizes to meet all requirements

Cross Filters

Nos.	1	2	3	4
Filtering capacity per 24 hours, gallons	20 to 30	5 to 10	40 to 50	60 to 70
Weight each, pounds	36	22	72	163
Each	$37.00	25.00	75.00	90.00
Nos.	**5**	**6**	**7**	**8**
Filtering capacity per 24 hours, gallons	70 to 90	100 to 120	120 to 150	150 to 200
Weight each, pounds	196	220	250	350
Each	$110.00	130.00	160.00	190.00

Style A Cross Filters

Adapted for use with oiling systems

Nos.	1A	3A	4A	5A
Filtering capacity per 24 hours, gallons	20 to 30	40 to 50	60 to 70	70 to 90
Weight each, pounds	63	100	163	196
Each	$45.00	80.00	100.00	120.00

ONE DOZEN IN A BOX

STEEL ROW BOATS

FLAT BOTTOM FISHING BOAT

Rides light, yet steady. Made of 20 gauge galvanized sheet steel with all seams double locked and soldered. Each rivet capped and soldered, can't leak.

Each boat is fitted with two large air chambers, one in each end of boat. The air chambers are riveted and soldered fast so as to be air tight and will more than support the boat full of water. Wood seats covering the air chambers. They give extra seating capacity. The frame and ribs are of 1 in. angle steel and make a boat that is very rigid. A pulley is in the front angle for anchor rope.

Fitted for an out-board motor. A wide two-inch board is fastened securely to the rear end of the boat to which motor can be attached. The cut of the boat makes the use of a motor very satisfactory. These boats are fitted with either one or two seats as desired. The seats are of wood and so fastened that they do not warp or split.

Painted Battleship Gray, unless otherwise specified, which is a very attractive color.

A pair of copper-tipped oars furnished with each boat.

Each boat has a false bottom of light cedar, painted.

These bottoms are not necessary but are more comfortable than the bare steel bottom.

MULLINS

The Standard Grade canoes are perfect in design, of best selected materials. Planking and ribs are of cedar, gunwales of spruce, stems of ash, and seat frames of ash or maple, all air dried. Brass bang plates; all planking brass fastened. Best canvas is used.

The I. X. L. Grade is made of the best materials used in canoe construction. Every piece of lumber used is hand selected and matched to secure uniformity of color.

YALE

This beautiful model is the embodiment of graceful, speedy lines in a safe, steady and stable canoe. Open gunwale construction; pressed brass bang plates; protecting stems are noteworthy features. The handsome appearance, the bright glossy lustre is one of the distinctive features.

Can be furnished in three colors, Yale blue, Harvard green or coach green. Length 16 ft.; width at rails amidship 32½ inches; width at bilge amidship 33½ in.; depth amidship 13 inches.

	Each
No. 16Y—Standard Grade	✚$240 00
No. 16IXL—I. X. L. Grade	✚ 255 00

Approximate weight packed, 95 lbs.

PRINCETON

The Princeton represents the height of perfection in canoe design, construction and finish. One stroke of the paddle in this graceful model will cause a thrill of satisfaction to the most experienced of canoe men, as it is a marvel of speed, lightness and stability. Beautiful finish, brass bound stems of polished brass and open gunwales.

Can be furnished in three colors, coach green, Yale blue or Harvard red.

Length 17 ft.; width at rails amidship 33½ in.; width at bilge amidship 34½ in.; depth amidship 13½ inches.

	Each
No. 17P—Standard Grade	✚$255 00
No. 17IXL—I. X. L. Grade	✚ 270 00

Approximate weight packed, 110 lbs.

HARVARD

Stems are securely bound with polished brass bang plates.

Can be furnished in three colors, Harvard red, Yale blue or coach green.

Length 18 ft.; width at rails amidship 35 inches; width at bilge 35½ inches; depth amidship 13¾ inches.

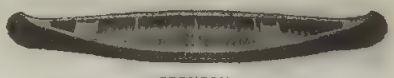
	Each
No. 18H—Standard Grade	✚$270 00
No. 18IXL—I. X. L. Grade	✚ 285 00

Approximate weight packed, 130 lbs.

✚F. O. B. Ohio Factory Only.

CANOES

MULLINS



SPONSON

Recommended for ladies' and children's use, as it is practically impossible to capsize it. Also desirable for fly-fishing and casting. Far safer than an ordinary canoe with air tanks in the ends, for the Sponsons not only possess as much buoyancy as air tanks but prevent the canoe from tipping over.

Open gunwales, brass bound stems.

Can be furnished in three colors, coach green, Yale blue or Harvard red.

Length 17 ft.; width at rails amidship 33½ inches; width at bilge amidship 40½ inches; depth amidship 13½ inches.

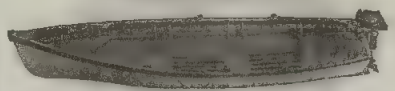
	Each
No. 17S—Standard Grade	✚$336 00
No. 17IXL—I. X. L. Grade	✚ 345 00

Approximate weight packed, 130 lbs.

STEEL ROW BOATS

MULLINS

OUTWARD SPECIAL



Designed and especially constructed for the application of detachable row boat motors. Equipped with bottom boards, rowing braces, one pair oarlocks, tying rings at bow and stern, air-tight compartments, especially constructed and reinforced transom for attaching outboard motors and one pair 7½ ft. straight ash oars. (When ordering, specify whether loose or pin type oarlocks are wanted).

	Each
No. 140S Length 14 ft.; beam 48 in.; draft 6 in.; height at bow 27 in.; at stern 25 in.; amidship 20 in.; seating capacity, 7; width at stern 33 in.; height of seat above floor boards 18 in.; 1⅛ inch transom with special corner braces. Finished in aluminum outside, light blue inside, natural wood trimmings; air chambers under decks like a life boat	✚$300 00

Crated, weight 315 lbs.

SULTAN

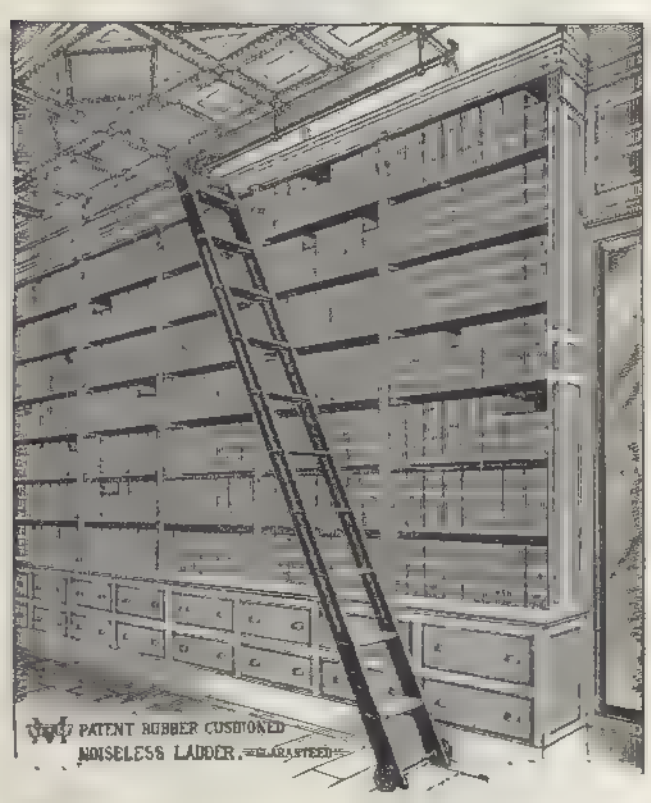
Modeled on perfect lines and will make an admirable boat for family use where a good capacity is required. Equipped with bottom boards, rowing braces, one pair oarlocks, tying rings at bow and stern, air-tight compartments and one pair 7½ foot straight ash oars. (When ordering specify whether loose or pin type oarlocks are wanted).

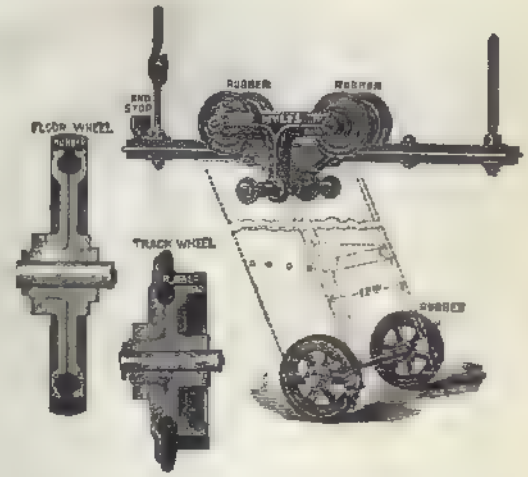
	Each
No. 16S Length 16 ft.; beam 50 in.; height at bow 25 in.; at stern 25 in.; amidship 15 in. Finished in aluminum outside, light blue inside, natural wood trimmings; large air chambers under decks like a life boat	✚$294 00

Crated; weight 275 lbs.

✚F. O. B. Ohio Factory Only.

MYERS CUSHION TIRE STORE LADDERS





No. F20—Ladder and Trolley complete, average w't 60 lbs.★ .....each $36.00

No. F30—Track, complete with hangers, w't per ft. 2¼ lbs.★ .....each $0.51

Do not forget to give height of ceiling. If height of ceiling varies give the height at each end and center of each run of track. Give length of each run of track.

DESCRIPTION

The track is the well known double angle steel rail, which is very neat and strong, and is suspended from ceiling by means of lag screws, either jointed or rigid or by flanged plates and wood screws. By this means the track is placed close to the ceiling and can be leveled on an uneven ceiling without the least trouble, and without any blocking or bridging, as is the case in many other tracks.

The ladder is constructed of the best clear Georgia pine, nicely finished, filled and varnished, has open panel sides 5 in. wide, steps 5 in. wide. Each step is supported at each end with a special malleable dowel tee, which makes the strongest construction possible. The width of the ladder is 12 in.

The trolley is self-adjusting and made of malleable iron, fitted with turned steel bearings and 3 in. anti-rattler wheels turned and bored on lathe and fitted with special rubber tires.

The floor travelers are 5 in. in diameter, composed of metal sides with rubber cushion tires clamped in such a position as to be impossible to get off or come loose. These wheels are placed on a steel axle which revolves with one of the wheels, the other running loose. In this manner the ladder will adjust itself to the floor. With this style trolley, which is noiseless, a great objection in other ladders is overcome.

When the ladder is too long for ceiling, cut off at the bottom and replace the lower traveler shaft by boring new holes at the proper point so as to have the steps of the ladder level.

Above Prices Do not Include Track. See Track Descriptions and Prices Below.

Figure 3.

Bicycle ladders have but two wheels, the track is at the bottom, either on the base shelf or on the floor, so that the entire weight of the ladder and operator is supported from below on a solid foundation and not suspended, holding operator and ladder in perfect balance and eliminating all liability of the ladder sagging the shelving.

A light turned pole guides the upper end of the ladder in moving it. Stout hooks fit over this pole to prevent the ladder from tipping backwards, but not a pound of weight rests on the pole.

Operator stands directly over the wheels, there is no side friction at all and ladder travels as easily as any other bicycle.

The noiseless rail is yielding and resilient, absorbing all vibration due to operation of ladder.

The auto ladder requires no track but runs on flat wheels.

It can be set at any angle or pushed close to the shelving when not in use. It is particularly adapted to short runs, cramped spaces or sloping, uneven floors The adjusting feature allows guide rail to be placed opposite a shelf regardless of being parallel with the floor.

Track.

No. F22—Steel bronze rail, japanned brackets special pole★ ..... per foot $0.50
No. F24—Noiseless Fibre rail, japanned brackets, special pole★ ..... per foot .60
No. F26—Noiseless or nickeled rail, nickel brackets★ ..... per foot .70
No. F28—For auto ladders, japanned brackets, special pole★ ..... per foot .40

Approximate weight ½ lb. per foot.

Any combination of track will fit any of the above ladders, except No. 120 Auto.

No. 22 Track is always sent for Floor Track Ladders, and No. 24 for Base Track Ladders unless otherwise specified.

How to Order Bicycle Ladders: Refer to Figure 3 on this page and give the following measurements: floor to C; floor to A; A to B; and B to S. State whether ladders are to be straight or bent. State length of track wanted and the number of uprights of all kinds in the shelving, and say whether solid uprights, partition boards, turned spindles or iron brackets are used to support the shelving.

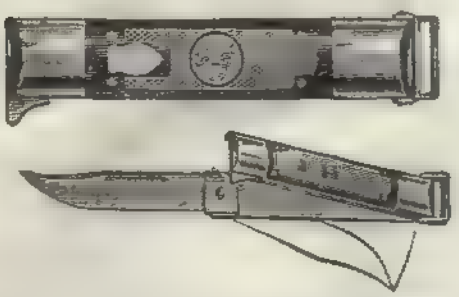
We catalogue only selected merchandise, the market's best and fastest sellers, satisfactory in quality, moderate in price and with a nice profit; you can't do better than buying from this catalogue.

HUNTING KNIVES



A slight pressure on the shield opens the knife, swings blade out into cutting position, closes case or handle and you have a rigid knife that is ready for business.

No torn thumb nails or sore fingers, no projections to catch or tear clothing.

Adaptable for every outdoor use. For hunting, fishing, camping, etc., it has no superior. Blades can be easily changed. Unconditionally warranted.

No. 961—Neft safety knife, made of the highest grade crucible steel, scientifically tempered and ground to a keen and lasting edge, length of blade 4½ in., length of knife when closed 5¾ in., scored hard rubber handle, large nickel silver bolsters with guard and toggle to attach to rope or key chain, small metal wrench for interchanging blades .....per dozen **$60.00**

HALF DOZEN IN A BOX

MARBLE TROUT KNIVES

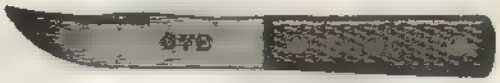
Latest addition to Marble Line. Designed expressly for dressing speckled trout and other fish.

Always open, entirely sanitary, quickly cleaned. While designed expressly for dressing speckled trout, may be used for a variety of purposes for which any small pocket knife could be used. The little finger is inserted about one-half its length in ring while the three remaining fingers and thumb are placed just back of blade against curve of shank.

No. 79—Forged from one piece of finest cutlery steel, handle terminates in a ring 1 in. in diam., full length 5⅞ in., blade 2 in., w't each 1 oz., complete with metal bound leather sheath .....per dozen **$12.60**

ONE DOZEN IN A BOX

HUNTING KNIVES



Made from a special grade steel similar to that of the very best razor steel. Not the regular butcher knife steel. Hand forged, swaged and polished. Ground to a very sharp razor edge. Second ebony handle. Fastened to blade with three large head brass rivets. The blade extends through the entire length of the handle.

No. 745—5 in. blade, full length 9¼ in., **without sheath** w't per doz. 3 lbs. .....per dozen **$13.50**

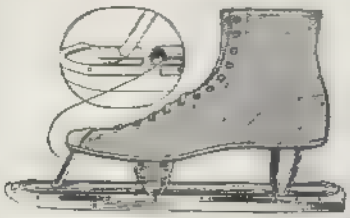
NESTOR JOHNSON NORTH STAR SKATES

Scientific principles of construction make Nestor Johnson skates the peer among tubular skates. Not only does the patent rib, on each side of the runner housing tube, add a feature of strength, but adds to the rigidity of the skate as well. A very superior feature is the one-piece drawn steel heel cup, which is an exclusive feature of all our skates. Nestor Johnson blades are to well known to need any added praise. Shoes for all outfits are made with correctly molded counters and only with inside counter pockets, same as all high grade shoes. All Nestor Johnson skates are made to place the foot in correct scientific position and cups are heel compensating. Reliability and long wear are built into every pair of our skates and shoes.

NORTH STAR RACER



Reinforced Corrugated Rib

For Shoe Sizes 5, 6, 7, 8, 9, 10.

No. 300—Men's, aluminum finish,
per outfit $18.00

No. 301 Men's, full nickel plated,

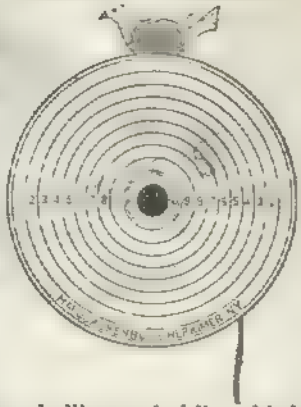
GALLERY TARGETS



When bull's-eye is hit, a bird rises and the bell, similar in sound to an electric ball, rings a few seconds.

While designed for the use of 22 caliber cartridges, the spring may be quickly adjusted for service as an air rifle target.

We can furnish No. 3 Targets with ⅜ in., ⅝ in. and 1 in. bull's eyes at same price for shipment from factory.

No. 3—Round, diam. 12 in., ¼ in. thick, with bell and image, made of a grade of metal particularly adapted to stand cartridges with ⅝ in. diam. bull's eye, w't 12 lbs. ..each $7.50

Plain round, diam. 12 in., ringing gong when bull's eye is hit, self-setting.

The construction of the target's surface brings out each numbered circle clearly, thus aiding the marksman in locating his shot.

No. 19—¾ in. iron, ½, ⅝, ¾ and 1 in. open bull's eye, for 22 caliber cartridges, w't 20 lbs. .....each $4.50

Heavy iron, made for outdoor shooting, for 22 caliber cartridges, birds and stars falling back when hit, re-set by rope from stand.

These targets are substantially made, and will stand extreme wear, and tear. The heavy metal objects have their weights so evenly distributed that the entire target is reset with a slight tug at the rope.

No. 0116—6 objects to shoot at, w't 13½ lbs. .....each $4.00
No. 0118—8 objects to shoot at, w't 23 lbs. .....each $5.00

LATHES

Cut showing portion of No. 9 Screw Cutting Engine Lathe.

Barnes all iron and steel, velocipede foot power.

Swings 11 in. on the face plate, 6½ in. over the tool carriage, and is 34 in. between centers. Back-gearing and cone pulleys give great range of speed. Head stock has a steel spindle with 1 9/32 in. hole through its entire length. Tail stock can be readily set at any desired point, and can be taken off altogether, leaving it free for face plate or chuck work. It can also be set over for turning tapers. Spindles of both head and tail stocks are of steel, with positively true taper holes for the reception of the centers. Tail stock center is self-discharging. Tool carriage is gibbed to the bed. The tool can be set to the work at any position or angle desired; also to bore a taper hole. All the works are securely protected from chips and dirt. As a right or left screw cutting lathe it is simply perfect. All the gearing is cut from solid metal in the best machinery known for gear cutting, and is as true and noiseless as it is possible for metal gearing to be. Weight 385 lbs., boxed ready for shipment, 500 lbs.

No. F5—Lathe, complete, each★ $362.00

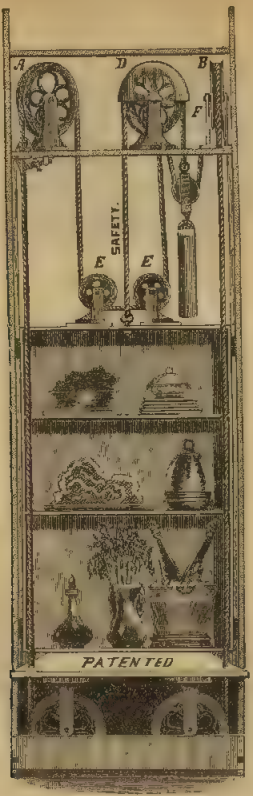
DUMB WAITER FIXTURES



NEW YORK SAFETY

With these fixtures a durable and effective dumb waiter may be installed to operate in any opening approximately 24 inches square. The safety rope prevents serious accidents in case the hoisting rope breaks. It will operate with perfect ease, is absolutely noiseless and has no complicated parts which might be easily broken. The manner in which the counter poise is attached allows for stretch or shrinkage in the ropes, keeping them tight at all times. A diagram with full instructions for mounting, is packed with each set.

Fixtures Only

Six 8-inch wheels, two 4-inch wheels, one pulley for weight and safety rope; five 1¼-inch thimbles, one ¾-inch thimble; one ring for safety rope, one brake grip and ring for cord, one hooded pulley for grip and one patent plate

HALF DOZEN IN A CRATE

BROAD AXES

Extra quality forged tool steel, ivory black rust-proof polished finish, polished face and bevel.

Large, full eye, built to take a stout, husky handle.

Eye very broad, giving a better hold and leverage on the handle. Eye set close to the blade, gives user perfect control of the cutting edge.

Long, narrow blade, carried full to end of cutting edge, the weight evenly distributed. Makes a perfect balance for a true stroke.

A straight edge, laid from top of head to cutting edge, touches the bottom of the eye and cutting edge only. The head set forward slightly, axe cannot bind in the wood.

Ground accurately, with a perfectly straight edge, except that the corners are set forward slightly giving timber spring. Corners cannot catch or gouge.

Improved Canada Pattern, Round Edge, Ridge Bit.

Nos.	67	78
W't, assorted, lbs.	6to7	7to8

HALF DOZEN IN A CASE

OVB BRONZED HATCHETS

A line of Hatchets expressly made for the carpenter and builder, whose requirements are most exacting. We would not know where to look for better quality, pattern and construction in any hatchet than we have attained in OVB. Each tool is forged from highest quality tool steel, scientifically heat-treated, and tempered to give a cutting edge which is hard, yet tough. So seldom is resharpening required that the OVB Hatchets will be found remarkably long-lived

Each hatchet is fitted with a well-shaped handle of selected white second growth hickory, waxed, with flared end to prevent slipping. The balance or "hang" is correct for easy, fast and accurate work. Heads are beautifully shaped, with smooth, gold-bronzed finish, and highly polished bit and face. A display of these tools in the dealer's window or show case is a joy to behold. EACH OVB HATCHET IS FULLY WARRANTED.

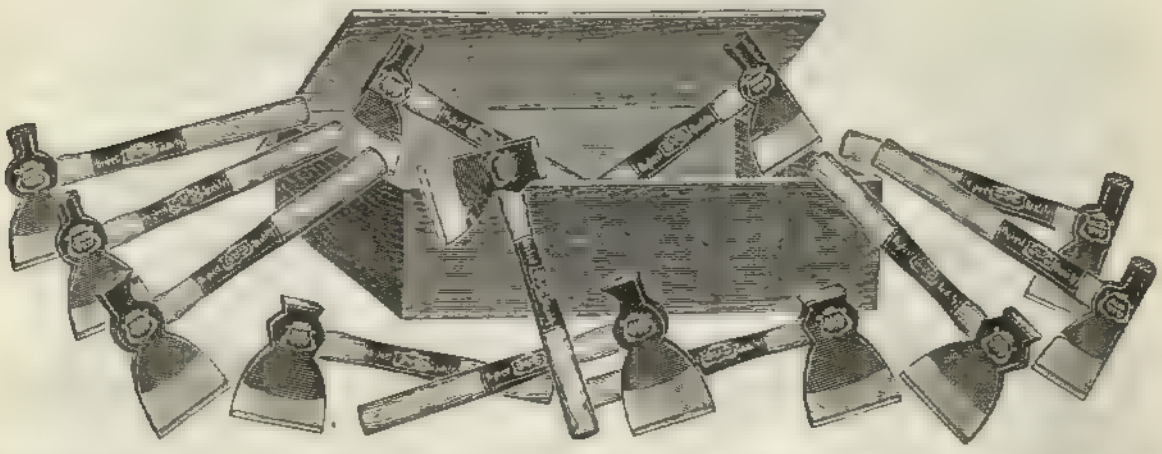
BRONZED HATCHETS

SPECIAL HATCHET ASSORTMENT



A convenient stock assortment for the dealer, in a single case. Made for the expert workman whose requirements are most exacting. We would not know where to look for better quality, pattern and construction in any hatchet than we have attained in . Each tool is forged from highest quality tool steel, scientifically heat-treated, and tempered to give a cutting edge which is hard, yet tough. So seldom is resharpening required that the Hatchets will be found remarkably long-lived.

Each hatchet is fitted with a well shaped handle of select white second growth hickory, waxed, with flared end to prevent slipping. The balance or "hang" is correct for easy, fast and accurate work. Heads are beautifully shaped, with smooth, gold-bronzed finish, and highly polished bit and face. A display of these tools in the dealer's window or show case is a joy to behold. EACH HATCHET IS FULLY WARRANTED.

No. 462—Case contains ⅛ dozen No. 402 Shingling, ¼ dozen No. 412 Claw, ¼ dozen No. 422 Half, ¼ dozen No. 432 Lath, ¼ dozen No. 442 Broad, and 1/12 dozen No. 452 Flooring; w't per assortment 30 lbs. .....per assortment **$26.50**

HALF DOZEN IN A BOX

HAMMERS

—Under this stamp and label we supply a complete line of Hammers, which the experience of many years has proven to be the finest obtainable from any source, whether judged by appearance, ability to stand hard service, or the "hang" and balance which so greatly enhance the ease and speed of operation.

Steel—Each hammer is forged from crucible steel of special analysis, tested constantly to insure uniformity of composition.

Temper—The tempering and hardening heats are regulated automatically by thermometer, so that definite and perfect uniformity of hardness and toughness results in each tool.

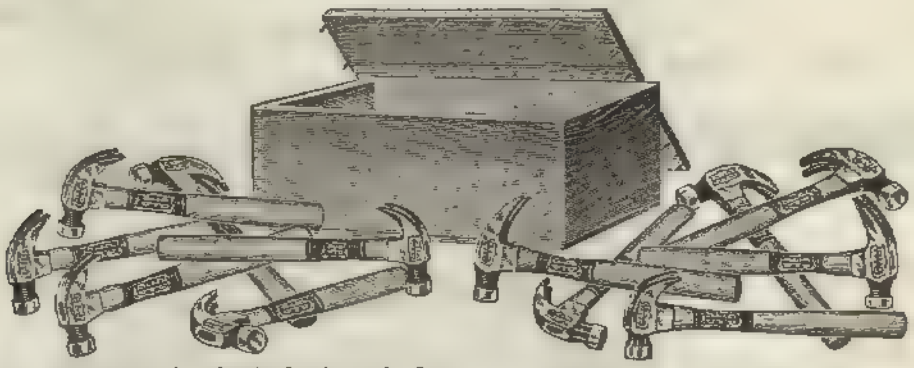
Faces—The striking faces are extremely hard, not brittle, and will do the severest legitimate work without cracking, denting or breaking down.

Patterns—The patterns embody the best suggestions of scores of practical mechanics, and each tool has the shape proven best for comfort and efficiency.

Handles—Handles are turned from the best second growth, white hickory, straight grain, made with full grip and securely wedged.

Finish—Each polished tool has a high mirror polish, while the artistic stamp and label brand each tool now and always

HAMMER ASSORTMENT



A convenient stock assortment for the dealer in a single case, comprising the best selling items, in proper proportions for quick turnover. Each Hammer fully warranted.

HALF DOZEN IN A BOX

HAMMERS

Steel—Crucible steel of special analysis, proven the best by years of experience, and tested constantly to insure uniformity of composition.

Temper—Tempering and hardening heats regulated automatically by thermometer. Steel of uniform composition, uniformly treated, must give uniformly perfect results.

Faces—Of extreme hardness, yet not brittle, will do the severest work without cracking, denting or breaking down.

Claws—Short, compact, tough, with fine drawn slot, whose sharp knife edge will grip and hold and pull straight any nail which will enter it.

NAIL HAMMER HEAD

Sectional cut of Bell Face Hammer Head, showing eye tapering from both ends towards the center, and Patent Wedge, which locks the handle perfectly. It cannot come out. Notice also the perfect proportions of the head.

Patterns—Embodying the best suggestions of scores of practical mechanics. No "hit or miss" designs, but the best shape in each tool for comfort and efficiency.

Handles—Turned from best second growth white hickory, split, not sawed, insuring straight grain. Made with full grip and sligthly flared end will not slip from hand. Wedged with patent wedges, heads and handles never part company.

Finish—A high mirror polish. The artistic stamp and label brand each tool now and always as .

OCTAGON NAIL

Octagon neck, octagon face, full nickel plated and burnished head, cherry stained select second growth hickory handles.

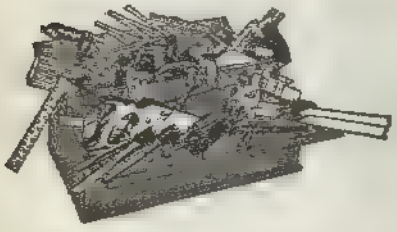
STANLEY TOOL CHESTS AND ROLLS FOR BOY SCOUTS

The following chests have been designed especially for Boy Scouts. The officials of this organization have put these Tool Chests in the new Equipment number of Scouting. Appeals have been sent out to thousands of Boy Scouts and Adult Scout Leaders to put over new development in the scouting program in encouraging and interesting boys in the use of tools in the home.

The tools in these assortments are of the dependable Stanley quality. A practical collection of good tools for the home. All chests are made from hardwood nicely finished, 20 in. long, 10½ in. wide, 8 in. deep.

TOOL CHESTS



No. T888A—Contains 32 tools w't 35 lbs. .....each $54.50

Contents, one each of the following:

- No. 61 Stanley Rule

ONE IN A BOX

HIBBARD HAMMERS

HIBBARD Hammers are first quality in every particular, and in appearance and quality are fully up to the standard of the best and most widely known brands on the market. In price they will be found always favorable as compared to the ruling market prices on other high grade tools, and the dealer may feature and push this line with confidence that it will make friends for him and bring "repeat" orders.

Each tool is forged from extra quality, crucible steel, hardened and tempered with the utmost care. The patterns are standard, and will meet the approval of expert workmen.

Handles of select white hickory, properly shaped and "hung"; finish, branding and labeling so attractive as to greatly aid their salability. Each HIBBARD Tool fully warranted against defects in material or workmanship.

ADZE EYE NAIL

HALF DOZEN IN A BOX

HAMMERS

—Under this stamp and lable we supply a complete line of Hammers, which the experience of many years has proven to be the finest obtainable from any source, whether judged by appearance, ability to stand hard service, or the "hang" and balance which so greatly enhance the ease and speed of operation.

Steel—Forged from crucible steel of special analysis, tested constantly to insure uniformity of composition.

Temper—The tempering and hardening heats are regulated automatically by thermometer, so that definite and perfect uniformity of hardness and toughness results in each tool.

Faces—Extremely hard, not brittle, will do severest legitimate work without cracking, denting or breaking down.

Patterns—The patterns embody the best suggestions of scores of practical mechanics, and each tool has the shape proven best for comfort and efficiency.

Handles—Turned from best second growth, white hickory, straight grain, made with full grip and securely wedged.

Finish—Polished high mirror polish, while the artistic stamp and lable brand each tool now and always as .

RIVETING

*OBER WOOD TURNING LATHES

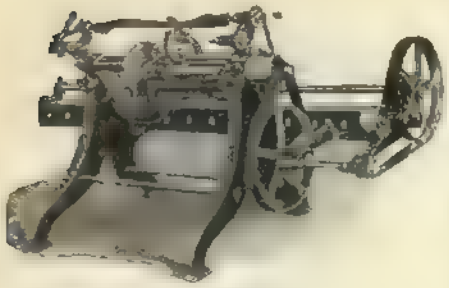

Fig. D1514

For turning axe, adze, hammer, hatchet, pick and sledge handles, spokes, whiffletrees and other kinds of irregular woodwork. This lathe will turn like a pattern and can be made to turn larger or smaller by loosening a set nut and moving the pattern rest from or toward the head. The round center in the pattern is an eccentric so that one end of the work can be made larger or smaller without changing the other end. The eye of a handle or spoke can be made longer or shorter without changing the pattern. Axe handles are finished in the lathe, even to the throating, but can go to the sander after leaving the lathe. Spokes are squared in the lathe when they are turned. This lathe will not turn porch spindles, table legs and that class of work. Wood patterns can be used, but should be made large enough so they will not spring. Carriage is moved forward by a screw and rack. When work is finished the carriage is stopped automatically and is raised from the head by a lever and can then be drawn back to its place. Knives will not gouge into the work nor allow sticks to get into them and break them. The regular lathe will turn from 8 to 36 inches in length. A special lathe is made to turn up to 42 inches. The entire carriage and feed can be removed and used as a rip or cut off saw. Made entirely of steel and iron, with tight and loose pulley on countershaft.

No. 11. Lathe to turn 36 inches and under with countershaft with 10x5 inch tight and loose pulleys, pulleys should turn 1000 r p m, requires about 2 horsepower to run; weight net 1350 pounds, crated 1500 pounds... . .....each, **$520.00**

*AMERICAN "PONY" PLANERS OR SURFACERS

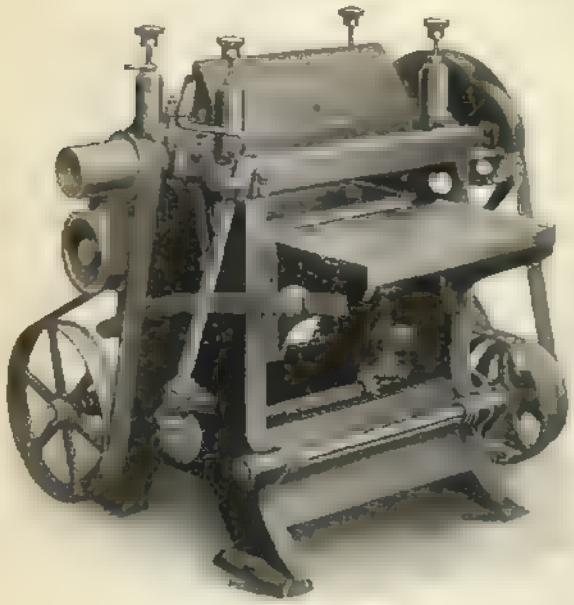

Fig. D1515

Modern Design, Compact, Rigid, Handy

This single surfacer or pony planer is compact and rigid, and embodies the very best materials and highest class workmanship. It is intended for all kinds of surfacing and finishing, and will do first class work on hard or soft wood with great rapidity. It is adapted to planing stock for sash, doors, window casings, panels, etc.; and as the rolls are close to the cylinder, and a pressure bar is provided, it will plane box boards and other short stock in most satisfactory manner. It has no superior for this class of work.

The main frame is designed for strength and stiffness.

The table is a single casting, deep, strong, heavily ribbed and gibbed to the outer edges of the main frame, to which it can be securely locked at any point, thus avoiding all rocking or vibration. It carries two 3 inch steel idle rolls, and is raised or lowered by hand screw.

The cylinder is forged steel, accurately milled and balanced, with ample journals and babbitted bearings. It has lips to strengthen the cutting edge of the knives and insure smooth, fine work.

The feed is positive and powerful, having two 3 inch steel rolls, one in front and one in rear of the cylinder, both strongly geared, the feeding-in roll being fluted.

Two rates of feed are provided and the feed is stopped or started by a belt tightener in easy reach of the operator. Built in two sizes to plane 20 inches and 24 inches wide and any thickness from ¼ inch to 8 inches.

Feed belts required: 20¼ feet of 2 inch belt. Tight and loose pulleys on countershaft 12x6 inches; speed 800 r. p. m.; width of cylinder belt used is 5 inches; belting is not furnished unless ordered, and extra charge made.

"Pony" Planer or Surfacer. With countershaft, no belts; to plane 20 inches wide; requires from 5 to 8 horsepower to run; weight 1500 pounds...each, **$445.00**

To plane 24 inches wide, weight 1700 pounds ..each, **490.00**

Fig. D1516

Countershaft

"Pony" Planer or Surfacer. Without countershaft, to plane 20 inches wide; weight 1285 pounds....each, **$420.00**

To plane 24 inches wide; weight 1485 pounds....each, **465.00**

*Not carried in stock; will ship from factory

*CORDWOOD SAWS

AMERICAN CLIPPER

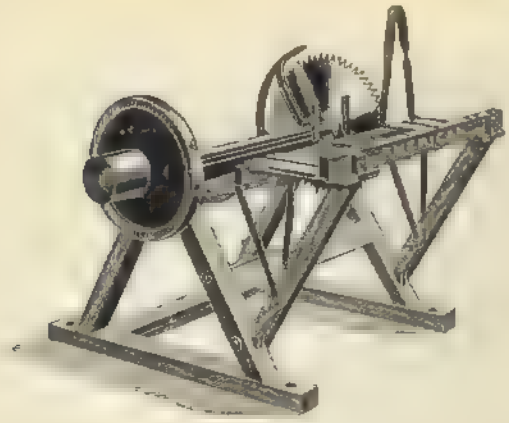

Fig. D1511

Frames are made of selected seasoned hardwood, accurately mortised and tenoned, securely bolted together by steel rods alongside the girts and passing through from one side of frame to the other. Strongly braced in every direction and painted two coats of brilliant red paint on woodwork. Iron parts painted black. Mandrel is polished steel, perfectly true and runs in heavy babbitted boxes, united by heavy cast iron yoke, insuring perfect alignment and cool bearings. Balance wheel is accurately balanced, insuring a quiet, steady running and durable machine. Each machine fitted with an adjustable saw guard which will admit a saw from 20 to 30 inches diameter. All saws are shipped right hand, except when otherwise ordered.

No. 3. For cutting cordwood from 4 to 5 feet long, take saws from 20 to 30 inches diameter with 1¾ inch hole; mandrel is 1⅛ inch diameter, 52 inches long; distance from saw to balance wheel 42 inches; mandrel pulley 6x6 inches, speed 1000 to 1500 r.p.m.; weight knocked down 300 pounds; without saw .....each, **$34.80**

*AMERICAN "UP-TO-DATE" SHINGLE MACHINES

With Power Feed

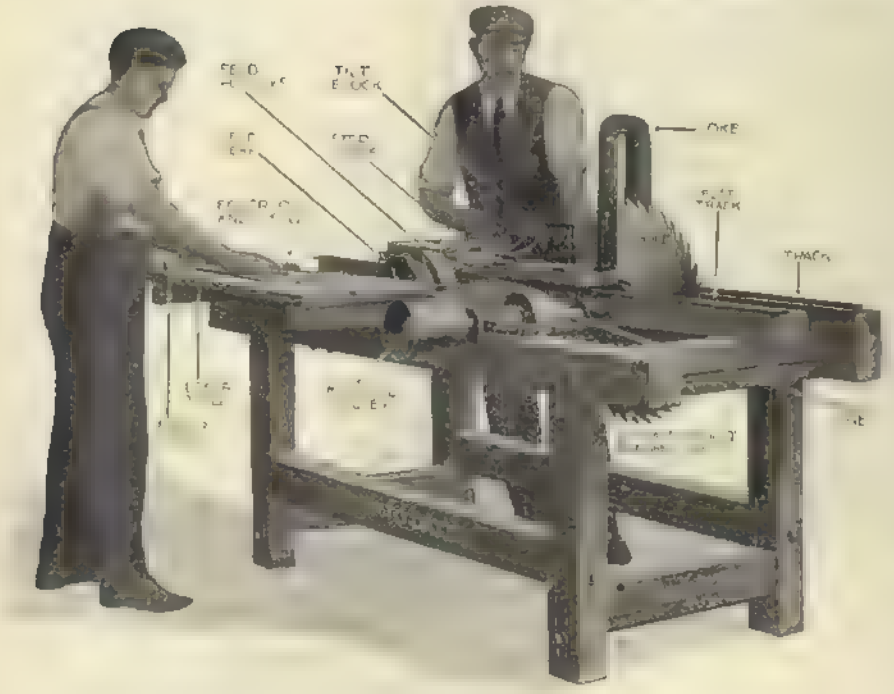

Fig. D1512

The Carriage is very substantial and provided with a strong iron yoke that will admit saws up to 36 inches diameter. The under side is fitted with gibs, planed to fit the iron track to which they hold the carriage securely. These gibs are slotted to provide adjustments and to take up lost motion.

The thickness of shingle is regulated by an adjustable tilting device in the center board, which can be removed for cutting box boards, etc. The center board is adjustable to regulate the thickness of box boards and may be removed entirely for bolting or squaring shingle blocks. No separate shingle block bolter is required. Shingles drop out underneath as they are cut.

Power Feed is provided which is thrown into gear by pressure of the foot on the treadle, and the machine can be used either with hand or power feed.

The Mandrel is steel, with 6 inch collars and runs in self-oiling boxes, connected by heavy yoke with adjusting screw for regulating the lead of the saw.

An edger and knot saw is provided which has an 8 inch saw and a convenient gauge, insuring square, straight edge shingles.

Larger saw for bolting the stock can be furnished, when desired, at additional cost. 5,000 to 10,000 shingles per day can easily be cut.

The machine will handle square, round, or split blocks up to 24 inches long.
Furnished complete, with 24 inch shingle saw, 8 inch edger saw, and feed and edger belts.
Will make shingles, heading, box boards, and crate slats equally well.

Dimensions: Frame 7 feet long 2 feet 5 inches wide, carriage 3 feet 8 inches long, 13 inches wide; power feed 24 inches; main mandrel 1⅞ inches; driving pulley 6x6 inches; weight, with edger, net 625 pounds; gross, 750 pounds; power required, 5 to 8 horsepower; speed of 24 inch saw about 1,200 revolutions.

American Up-to-Date Shingle Machine, as described.....each, **$160.00**
American Up-to-Date Shingle Machine without edger, with automatic stop and knot saw.....each, **145.00**

Extras

For making machine cut 36 inches long .....extra, **$20.00**
For 75 pound balance wheel on mandrel.....extra, **10.00**

*Not carried in stock; will ship from factory

BICYCLE LAMPS

OIL

PARKER LUCKY-CURVE SELF-FILLING FOUNTAIN PENS

Chased Pattern, Showing Clip.

Plain Pattern, Showing Clip.

Ladies' Pattern.

The Parker Lucky Curve Fountain Pen is the only pen on the market that is guaranteed to give satisfaction and which carries an Accident Policy good for One Year from date of purchase, to keep in repair free of charge, the barrel, cap, feeder, nozzle or section.

The barrel is ink tight—safety sealed—a feature which no other self-filling pen has. The lever which squeezes the rubber ink sac comes out at the top of the barrel in the form of a button covered by an ink-tight safety cap. To fill the pen, simply immerse the point in ink, press the button and release it, return the pen in the ink for two or three seconds and it is filled.

Should at anytime the rubber sac give way, the ink cannot get out and soil clothing due to the safety seal feature. Also when this happens, the pen is not made useless, but can be used by removing sac and filling it with dropper, until you can replace sac with a new one.

All Pens are 14 Karat Gold.

ONE IN A CRATE

RADIATORS

PEERLESS FOR 1909 to 1916 FORD CARS

This is the same style radiator used on Ford cars for years, and will fit all models up to 1917.

The core is practically indestructible, as well as efficient. Has a large water capacity, and cooling surface is 33⅓% more than any ordinary type of core.

Has the same efficiency and capacity as No. A-11, which makes it of exceptional value on converted Ford truck units or tractors.

Capacity 11 pints; filler neck 2 inches in diameter.

Black enamel finish; honeycomb brass core, gray finish; heavily tinned malleable iron water connection; heavy wrought steel side brackets; parts coming into contact with water are brass.

No.	A-10
Each	$45 00

One in a wooden box; weight each 40 lbs.

PEERLESS FOR 1917 to 1921 FORD CARS

On 1917 to 1921 Fords, this radiator will fit the hood that is furnished by the Ford Motor Co.

The core is practically indestructible, as well as efficient. Has a large water capacity, and cooling surface is 33⅓% more than any ordinary type of core.

It is also particularly efficient on converted truck units or tractors, which require an exceptional radiator to properly cool the engine under heavy load.

Capacity 11 pints; filler neck 2 inches in diameter.

Black enamel finish; honeycomb brass core, gray finish; heavily tinned malleable iron water connection; heavy wrought steel side brackets; parts coming into contact with water are brass.

No.	A-11
Each	$45 00

One in a wooden box; weight each 50 lbs.

FREE RADIATOR DISPLAY EASELS

PEERLESS

This handsome display easel will be given free with orders for one each of Nos. A-10 and A-11 radiators. Easels will be shipped from Cincinnati, Ohio; radiators from Louisville.

No. A-5RDE Hardwood frame; white enamel finish; complete with 4 color lithographed hanger; height 60 inches; width 29 inches. } Free

One in a crate; weight each 50 lbs.

PEERLESS FOR 1918, 1919 AND 1921 NO. 490 CHEVROLET CARS

Shell is of heavy gauge bright finish cold rolled steel, finished in black enamel. All parts that come in contact with water are of brass. Top and bottom tanks are of one piece, eliminating soldered seams.

The honey comb brass core is practically indestructible. Has a large water capacity, and cooling surface is 33⅓% more than any ordinary type of core. Will keep the engine cool under the most severe conditions. Each

No. A-14—Capacity 11 pints filler neck 2 inches in diameter $75 00

One in a wooden box; weight each 45 lbs.

F. O. B. Ohio Factory Only.

RADIATORS

ZIG ZAG

FOR 1917 TO 1921 FORD CARS

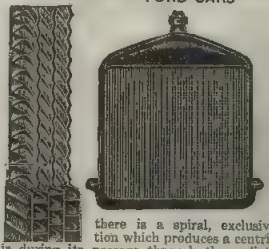
The new zig zag radiator gives the Ford a distinctive appearance; gives 20% more cooling efficiency which prevents overheating under the most trying conditions without adding any extra weight. The flexible construction of the tubes allows for considerable expansion due to freezing in winter, assuring the Ford owner against ordinary freezing trouble.

Each

No. A-2ZZN – Nickel finish $75 00
No. A-3ZZB—Black enameled 75 00

One in a carton; weight each 50 lbs.

SPIREX REGULAR, FOR 1917 AND LATER MODEL FORD CARS



The water channels are stamped from a single width of metal, folded over and lapped in the rear and soldered inside and out. Great strength and durability, given by one-piece channel construction and spiral braces, a feature found only in Spirex radiators. In each cell there is a spiral, exclusive Spirex construction which produces a centrifugal action on the air during its passage through the radiator, producing the increased cooling capacity. Spirex Spirals also greatly reinforce the core.

Spirex Special radiators have additional water channels giving 67% more cooling capacity. Cold weather has no effect on this radiator. The water channels expand when the water freezes and return to their natural form when the ice melts. Black enameled.

No.	A-1SSB
1 to 6, Each	$48 00
6 to 12, Each	46 50
12 or more, Each	45 00

One in a wood box; weight each 50 lbs.

RADIATOR, HOOD AND SHELL

PEERLESS

FOR 1915-21 FORD CARS

This combination being designed especially for models 1915 and 1916 giving the car the appearance of the late model. It gives the car a streamline effect.

The core is practically indestructible, as well as efficient. Has a large water capacity, and cooling surface is 33⅓% more than any ordinary type of core. It will absolutely keep the engine cool under the most severe conditions.

Capacity 11 pints; filler neck 2 inches in diameter. Each

No. A-12—Finished in black enamel; **Honeycomb** brass core, gray finish; heavily tinned malleable iron water connection; heavy wrought steel side brackets; all parts coming into contact with water are brass.. $87 00

Radiator packed in box; hood shield, etc., in carton; weight complete 65 lbs.

RADIATOR HOODS

FOR FORD CARS

Sheet steel, black enamel finish; concealed hinges, waterproof.

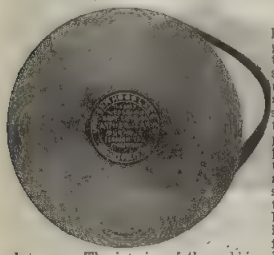
Will fit all model cars from 1917 to 1920; will also fit the 1921 or 1916 model car when used with No. A-12 combination.

No.	A-20PH
Each	$10 50

Five in a crate; weight each 29 lbs.

UNIFORM HOOD LACING

Fender Strips, Body Cushion and Anti-Squeak Material.



Uniform hood lacing is a textile product of exceptional tensile strength and toughness. The exterior is treated with a special preparation, and is fireproof. This fireproofing causes it to be admirably adapted to withstand friction; the heat of the hood prevents it from becoming filled with foreign substances. The interior of the webbing is thus kept alive, and so forms an elastic, springy, anti-rattle material. Being so treated, it does not dry out quickly or pack down hard and develop a rattle like leather or a thoroughly permeated product. This lacing may be used wherever an anti-squeak or anti rattle material is required. Put up 100 feet in a roll. Sold in full rolls only.

RADIATOR COVERS

SAFE STORM

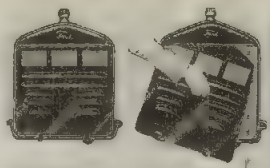
Two-Piece.

Made from 32 oz. black automobile top rubber; water, wind and weatherproof; surface will not crack or peel off; lined with good quality felt that will retain the heat. These covers are made in two parts, so that the engine hood can be raised without removing the radiator cover. Fitted with two piece radiator curtain which can be closed when car is standing to hold all the heat, and entirely opened when driving or half closed at bottom in extreme cold weather.

	Each
No. A-1720F—For Ford cars, all models 1917 to 1921	$8 70
No. A-2001C—For Chevrolet cars, 490 model, 1916 to 1920	12 00
No. A-2000D—For Dodge cars, all models	13 50

RADIATOR PROTECTORS

RIGHT



Made of 20-gauge auto body steel; finished in high grade enamel, baked on. Application can be made merely by slipping it on. When properly applied. It scientifically distributes air through radiator at points where it is most needed.

The main feature of this protector is that when it is properly applied it allows no radiator to freeze while the motor is running. Insures a smooth running motor in the coldest weather, saves gasoline and oil.

No.	A-33FRP
List Price, Each	$2 00
Each	4 50

One dozen in a carton; weight per dozen 42 lbs.

CARRIAGE AND AUTO HEATERS

CLARK'S

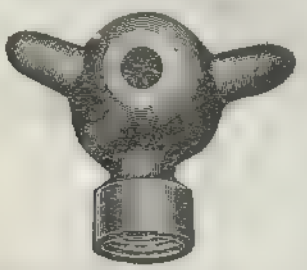
"Our Drummer" takes the risk out of buying.

LAWN SPRINKLERS

WILGUS

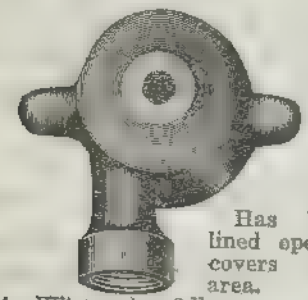
Made of white metal and cannot rust, all have machine tapped threads practically indestructible.



Has brass lined opening, double chamber giving a wide spray also a single center stream rising high, efficient on any pressure.

No. 2—W't per doz. 10 lbs., per dozen $10.80

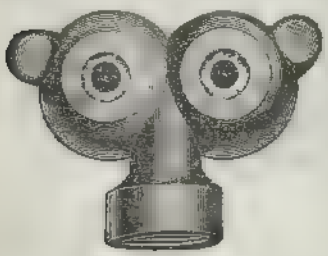
HALF DOZEN IN A BOX



Has brass lined opening, covers large area.

No. 1—W't per doz. 9 lbs., per dozen $9.00

HALF DOZEN IN A BOX

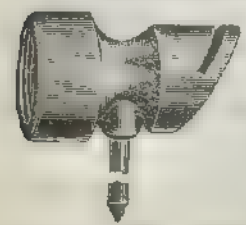


TWIN

Has double brass lined opening giving two conflicting sprays, beautiful and effective. Good for any pressure.

No. 7—W't per doz. 7 lbs., per dozen $7.20

HALF DOZEN IN A BOX



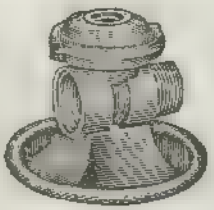
FAN

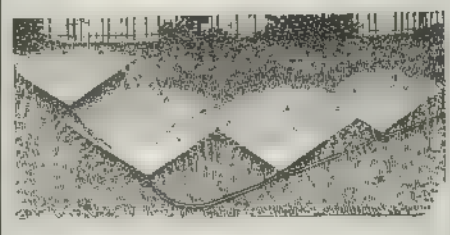
Throws a half circle spray one way. Excellent for use at side of house or walks.

No. 8—With spike, w't per doz. 5 lbs. .....per dozen $5.40

ONE DOZEN IN A BOX

"WILGUS MULTIPLE"



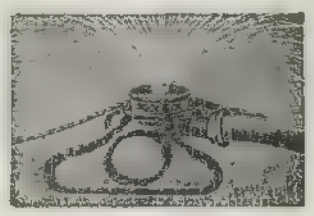


White non-corrosive metal with male and female threads, mounted on a heavy cast iron, disc-like base. Pressure permitting, any desired number may be connected in line of hose, affording a portable system, readily moved, and capable of any arrangement. Entire lawn can be covered at one time.

No. 51—¼ in. outlet, w't per doz. 21 lbs. .....per dozen $28.80

HALF DOZEN IN A BOX WITH ONE STOP CAP FOR END SPRINKLER

ELGIN



Throws a very uniform and even spray. No revolving parts to get out of order. Will not clog with sand or dirt. Very simple and effective.

No. 502—Cast iron japanned base and hose connection, orange lacquered top for ½ in. garden hose, 7x9 in. base, height over all 3 in., w't per doz. 30 lbs. .....per dozen $16.00

QUARTER DOZEN IN A BOX

BUTTERFLY

Revolving spoon will distribute satisfactorily over a circle of 30 ft. in diameter.

Regular stock is threaded for ⅝ in. iron pipe, but we can furnish them for ½, ¾ and 1 in. iron pipe or ¾ in. hose pipe thread.

No. 550—Gray iron, galvanized by a new process, ⅝ in. iron pipe, thread, cut in base, to fit Nos. 551, 554 and 556 sprinkler bases and stems, w't per doz. 7½ lbs. .....per dozen $8.30

ONE IN A PASTEBOARD BOX

Being mounted close to the ground, the vibration is less, consequently the spoon revolves more rapidly and better distribution results. Hydrant pressure of 35 lbs. will distribute satisfactorily over a circle 30 ft. in diameter.

No. 551—Gray galvanized iron head, japanned iron sled base, w't per doz. 26 lbs. .....per dozen $15.50

ONE DOZEN IN A PASTEBOARD BOX

Galvanized gray iron, sharp point in base for setting in ground.

No. 554 is proving especially popular for private lawns while No. 556 is being used largely in parks, cemeteries and golf grounds.

Nos.	554	556
Standard, ft.	4	6
W't, doz., lbs. ..	42	54
Per dozen $19.20		23.70

LOOSE

LAWN SPRINKLERS

REVONOC

Sprinkles quickly and thoroughly, an area of about 40 feet diameter. The head and arms are brass, highly polished, extra large base finished beautifully in black enamel.

No. 525—Height 5 in., for ¾ in. hose, w't per doz. 27 lbs., per dozen $24.00

ONE IN A BOX; ONE DOZEN IN A CASE

In this sprinkler friction has been entirely eliminated by improved head, and it revolves easily on very light water pressure. Large black enameled base, the arms and head are highly polished. Will sprinkle thoroughly an area of 45 feet diameter. Has loose coupling nut for quick connection to hose.

No. 519—For ¾ in. hose, height 10 in., w't per doz. 40 lbs., per dozen $30.00

ONE IN A CARTON; ONE DOZEN IN A CASE

BALL BEARING

Has a large black enameled base, the head and arms are polished brass, revolving on ball bearings. The long curve on the arms permits a greater range in distributing water. When arms are set upright it will sprinkle 15 feet high and 50 feet diameter, distributing as much water close up to the sprinkler as at a distance. Can also sprinkle only a few feet by turning down water pressure. Has loose coupling nut for quick connection to the hose.

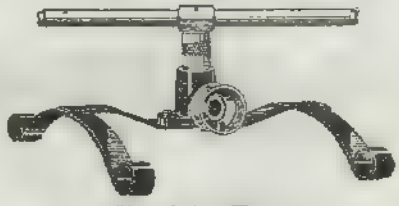
No. 522—Height 12 in., for ¾ in. hose, w't per doz. 47 lbs., per dozen $31.00

ONE IN A BOX; ONE DOZEN IN A CASE

HOT HOUSE ROSE SPRINKLERS

"RAINBOW"

The special feature of these is that they are instantly set in motion with low pressure water, will work equally as well with high pressure, and the water descends in small particles like mist and rain combined, covering an area of 40 to 50 ft. Strong in construction, attractive in appearance.



For ¾ in. Hose.

Supported on a brass sled which may be easily drawn over the lawn without injury to the turf.

No. 560—W't per doz. 18 lbs., per dozen $48.00

ONE DOZEN IN A BOX

For ¾ in. Hose.

Brass stick type, very effective on uneven surfaces, for sprinkling flower or vegetable gardens.

No. 570—W't per doz. 11 lbs., per dozen $40.00

ONE DOZEN IN A BOX

"FISHER"

FISHER, nickel plated brass arms and head, steel tube or shank painted green, with standard sharp point for setting in ground, height from ground 23 in., length over all 29 in.

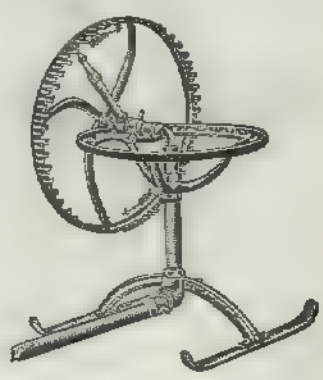
Sprinkler arms can be adjusted to cover a space from 6 feet to 50 feet in diameter with the ordinary city pressure of 30 lbs., and with the minimum pressure of 15 lbs., thirty feet in diameter can be covered perfectly.

No. 534—With standard to stick in ground, w't per doz. 36 lbs., per dozen $60.00

No. 535—With feet, w't per doz. 54 lbs. .....per dozen $70.00

LOOSE

"PENNSYLVANIA RAINMAKER"



This sprinkler waters an area of 300 to 500 square yards with drops or spray; doesn't flood; doesn't swamp at the center; doesn't wash out soil; doesn't chill tender grass or plants, and works without attention.

It is made on the turbine principle. The water coming from the nozzle strikes the turbine paddles, turning the wheel. As the turbine wheel revolves it travels around the circular base, carrying the jet around approximately eight times a minute. It distributes the water evenly over the entire area so gradually that it allows it to sink into the ground and not run off into low places.

Easily regulated to throw heavy or medium drops, or fine spray. With a pressure of 40 to 60 pounds, it will distribute this evenly from the center to the extreme edge of a circular area 60 to 75 feet in diameter. Most of the spray travels through the air much further than is true of all other sprinklers. That gives it time to lose the chill so harmful to tender plants.

No. F575—For ¾ in. hose, height 29 in., width 27 in., w't each 52 lbs., each★ $48.00

Pure Gum. 2 ounce bottles, weight per dozen 5 pounds.....per case, **$5.25**

Three dozen in a case

PHONOGRAPH NEEDLES

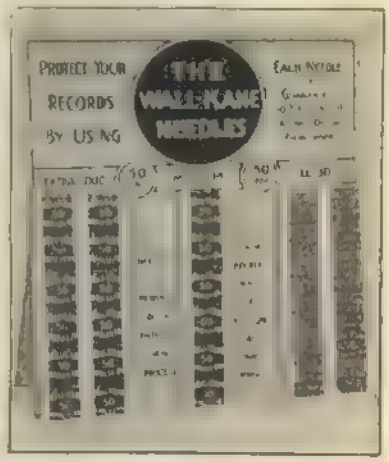
WALL-KANE

The Wall-Kane is the highest grade of steel phonograph needle made in America.

The various processes through which these needles pass in the course of manufacture produce perfect working, non-scratching durable needles

Each needle is guaranteed to play ten records on any phonograph, the tenth playing as clear as the first.

This eliminates the troublesome changing of needles after each record



A handsome metal enameled display stand holding 60 packages; 2 dozen extra loud, 1 dozen medium and 2 dozen loud, each package containing 50 needles.

Wall-Kane Stand. Complete as described each **$9.00**

This display container is handsomely finished in the same color scheme as the boxes. It holds 100 packages of a kind, loud, extra loud or medium, each package contains 50 needles.

Wall-Kane Containers. As described .....each, **$15.00**

FOLDING CAMP STOVE

AMERICAN

Open, Ready for Use

To operate, remove cover, place the tank in position and the stove is ready to light. No loose parts to become lost. Nothing to screw together or assemble. No alcohol or torch required to light it. It produces an intensely hot flame when burning at full capacity, although the burners can be regulated to a low fire if desired. It is only necessary to generate one burner, this produces the gas for the second burner which may be turned on or off at will.

No. T3—"Kamp-Kook," two burner enclosed in a neat black enameled steel case with handle. Size of stove folded 14½ in. long, 8 in. wide, 8½ in. high. Burns gasoline, w't 8 lbs., each $10.00

CAMP GRATES

No. 100C, standing or folding broiler.

No. 129—One piece, 9x14 in., w't per doz. 18 lbs. .....per dozen $15.00

X-RAY REFLECTORS

SCOOP

For 75 watt Mazda Type "C" gas-filled lamp.

The SCOOP is a scientifically correct reflector, designed for use with the 75 watt Mazda "C" lamp. It is designed for small show windows, particularly those whose height is equal to the depth.

The reflector is small in size, requires little head-room and makes a very neat appearance. If very bright illumination is desired, install reflectors on 12-inch centers. For average conditions, reflectors on 18 to 24-inch centers give good results.

Install in windows 8 or 10 ft. high and 6 or 8 ft. deep.

No. 778E—Width 7 1/16 in., depth from front to back 6 1/16 in., height including neck 6 9/16 in., holder 2 1/2 in., form "O" each, reflector only *$4.00*

TWENTY-FOUR IN A STANDARD PACKAGE. WT 30 LBS.

POKE BONNET

For 25, 40, 50 and 60 watt Mazda Type "B" lamps.

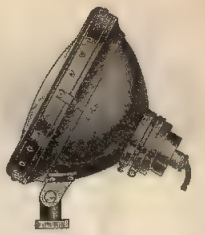
Install for low deep windows. A 6 in. window drape, moulding or sign will hide it.

No. 750E—Depth 7 3/8 in., length 14 in., complete with adjustable fork, 18 inches of re-inforced cord, plug, twin sockets and reflector, no lamps, each *$12.00*

X-RAY REFLECTORS

Prices on Application

FLOOD LIGHT



For use with the 200 or 250 watt G-30 Mazda "C" flood lighting lamp.

Projector being small is particularly adapted for use on the sides of buildings, brackets, and other places difficult of access.

It has been widely and successfully used for protection lighting and for facilitating night operations in large spaces, both inside and outside.

The unit is weather-proof, perfectly ventilated, and not affected by heat, cold, rain, snow or ice.

No. P51XE—Finish gray, diam. 11 1/2 in., depth over all 9 3/4 in., swivel and tilting base supplied with unit for bolting to supporting surface, size of base 2×4 in., with two 1/2 in. holes 2 1/2 in. on centers, **without lamp,** each *$30.00*

ONE IN A CARTON· SIX IN A CASE

Finish—The brass blades are highly polished and lacquered. Base and other parts baked on black enamel.

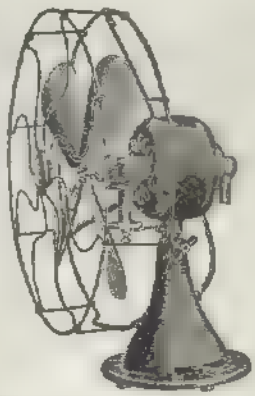
Construction—Cast enclosing shells and base, can be adjusted to any angle desired, either for a bracket or desk fan. The construction is simple and the field of service large. Large air velocity with minimum current consumption.

Speeds—Has four point switch for three speeds, namely, slow, medium and fast, ranging from 900 to 1500 revolutions per minute.

Equipment——8 ft. cord and attachmment plug included.

"PEERLESS," DESK AND BRACKET

OSCILLATING.



PEERLESS oscillating fans can be used either as a desk or bracket fan without the use of an adaptor.

They are designed to move from side to side through a desired angle, thus distributing the air over a larger area than with a stationary fan.

IMPROVED CUTLERY SHOW CASES

Prices on Application.

FLOOR DISPLAY CASES

Our FLOOR DISPLAY CASES FOR CUTLERY are thoroughly hand made from natural oak and are of NATURAL OAK FINISH, highly hand polished.

The top is ¼ in. bevel French plate glass laid in plush on green felt cushions, selected double strength glass front and ends and glass sliding dust-proof doors in the back that move on ball bearings and steel track.

The inside has 10 in. and 14 in. paneled oak shelves, the front edges of which are fitted with an oak lip extending ¼ in. above the shelf proper to prevent the goods from being pushed off the shelves, these shelves are supported by adjustable nickel plated brackets, cloth lined paneled bottom.

One of the latest improvements in these cases are the steel strength mitered joints, which means that the mitered joints in our cases are reinforced with steel, making the weakest part the strongest—this is a most important point to be considered.

Made either knockdown or set up and of standard measurements, 42 in. high, and 26 in. wide outside dimensions.

FIRE EXTINGUISHERS, PRIMERS AND CAR HEATERS

PYRENE FIRE EXTINGUISHERS

With Bracket

Approved and Labeled by the Underwriters' Laboratories

Pyrene Fire Extinguishers are the safest and most efficient type for electrical and all fires starting in oil, gasoline, shellac, paints or other highly inflammable substances. Water only spreads oil fires and it is dangerous to use water on an electrical fire.

In Metal Box

Insurance companies recognize the value of Pyrene and grant a 15 per cent deduction in automobile fire insurance when cars are equipped with Pyrene. The law requires and safety demands that motor boats carry fire extinguishers

Employees need no instruction to use Pyrene. It is efficient in the hands of a woman or a ten year old boy

Pyrene will injure nothing, stain nothing, destroy nothing, but it will kill fire from any cause, and it will do it instantly

Liquid

Pyrene liquid does not lose its strength or deteriorate with age, and does not require recharging unless used. It will not freeze below zero

Approved and labeled by the Underwriters' Laboratories

Pyrene with Bracket . . . . . Each $10 00
Pyrene with Metal Box, Heavy Type . . Each 14 00
Pyrene with Metal Box, Light Type . . . Each 13 00

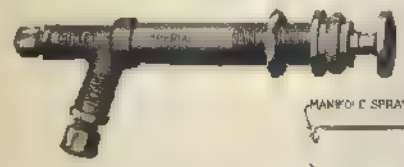
IMPERIAL PRIMER



Standard Installation

The Imperial Primer is a simple, easily-installed plunger pump outfit that throws a rich spray of vaporized, FIREABLE gasoline into the manifold near the entrance to the cylinders thus enabling the engine to be started on the FIRST turnover, no matter how cold the weather

Each outfit includes new self-closing plunger pump, only two kinds of outfits are required to fit all makes of cars See listing below.

All outfits are packed in a handsome Counter Display Carton, containing two Ford and two Standard Primer Outfits, which will help you double your sales on this popular device. Weight of carton is 5¾ lbs

No. 58-D—Primer Outfits, complete for all makes of cars . . . . . Each $4 75
No. 59-D—Primer Outfits, complete for Ford cars only . . . . . Each 4.00

UTILITY PROTECTED HEATER

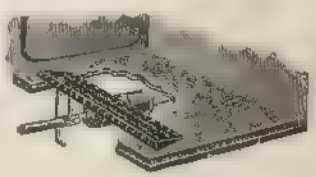
Utility heaters take heat from exhaust pipe thru flexible metal tube; can be used in any type of car; heat may be regulated as desired; with handy regulating valve. Is simple, practical and reliable; cannot get out of order

Three sizes of fittings furnished. Medium size fits 90 per cent of cars.

Small Fitting—For exhaust pipes less than 2 in. diam.
Medium Fitting—For exhaust pipes from 2 in. to 2½ in. diam
Large Fitting—For exhaust pipes over 2½ in. diam

No. 1—Utility Protected Heater; 27 in. long, Nickel finish; wgt. 14 lbs . . . . . Each $20 00
No. 2—Utility Front Seat Heater, Nickel finish; 17 in. long; wgt. 10¼ lbs . . . . . Each 12 50
No. 3—Utility Heater; same as No. 2 except black finish . . . . . Each 10 00

THE SANITARY HEATER



Easily installed by drilling two holes through the floor board and one into the exhaust pipe; adjustable to any degree of heat; can be put in front or rear or both; in the operation there is no noise, no oder, no loss of engine power and no back pressure on your motor; makes the car comfortable—there is rarely any question of obtaining sufficient heat, it is usually a matter of properly controlling an abundant supply.

The Sanitary Heater (For Fords) . . . Each $5 00

MANEX HEATER

For Fords

Clamped over exhaust manifold so as to catch all radiating heat. No screws—no parts—no rattle. So designed as to eliminate discomfort from fumes, odors and dust. Can be installed in thirty minutes removed in five. A pattern furnished with each heater shows exact details of installation.

Manex Heaters Each. . . . $3 00

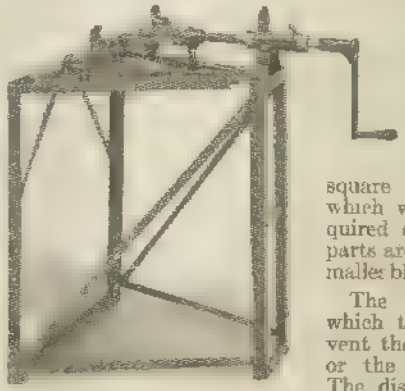
No. 2804—Breaking strain 20,000 lbs.. Each 13 00

LITTLE GIANT SPLIT RIM TOOL



Is designed to handle the most difficult tasks in expanding and contracting **all kinds and sizes** of Split Rims. A one-inch spindle with a square thread is provided which will do the work required of it. The gripping parts are made of high-grade malleable iron.

The tracks or slides in which the arms travel prevent the tool from buckling or the arms from sliding. The distance between gripping points are equal at all times. This prevents damaged or sprung rims

Little Giant Rim Tool; with stand Each $30 00
Little Giant Rim Tool; less stand Each 18 00

REVONOC FIRE EXTINGUISHERS

REVONOC Fire Extinguishers are examined, approved and labeled under direction of National Board of Fire Underwriters.

The chemical charge consists of 1¼ lbs. bicarbonate of soda and 4 oz. of sulphuric acid, which can be obtained at any drug store. The soda is to be dissolved in about three gallons of water. The acid is retained in the bottle and held in the bottle holder from the top of the extinguisher. In use the extinguisher is turned bottom side up. This allows the acid to mix with the soda solution, creating a very powerful gas with a pressure sufficient to throw the chemical stream 50 feet.

This stream as a fire fighter is fifty times as effective as plain water.

Extinguishers of this type will freeze at 32 degrees Fahrenheit, and should not be kept in an unheated room in winter.

No. R3 REVONOC—Approved, 3 gal., made of special cold rolled Lake Superior copper, all seams hard riveted, solder sweated and lead filled, entire inside lead lined, top collar and cap of best steam brass carefully fitted by expert workmen, patent removable brass bottle holder, improved goose-neck, hose connection, extra heavy, chemically treated hose with solid lead nozzle, tested 250 lbs., hydrostatic pressure, packed complete in box with acid and soda for one charge, w't each 23 lbs., per dozen $324.00

HAND FIRE PUMPS

The Geyser uses plain water to which salt may be added in winter to keep from freezing.

No. R25D—Geyser, capacity 5 gallons, made of No. 26 gauge galvanized iron, double action pump throws a stream 40 to 50 feet, w't each 12½ lb., dozen $132.00

ONE IN A CRATE

PYRENE FIRE EXTINGUISHERS

Prices on Application

Pyrene Liquid contains neither acid, alkali salts, no moisture, will not stain or injure anything with which it may come in contact. Will not freeze at a temperature of 50 degrees F. below zero. The device in which Pyrene is used is a double-acting pump easily operated by hand, capacity one quart, made of brass and white metal throughout.

When Pyrene liquid is subjected to a temperature of 200 degrees F. or over, it is immediately transformed into a heavy, dry cohering, non-poisonous gas blanket, which surrounds the burning material, cutting off the air supply necessary for the life of the fire. Can easily be used by a woman or child. It is practical for home, factory, automobile or motor boat.

No. 101—Brass, with wall bracket, w't each 6 lbs., per dozen $120.00

ONE IN A BOX

BABY CRAB WIGGLER

This bait is painted in close resemblance to a fresh water crab or crawfish, floats when not in motion, dives under water when retrieved, the movement being a pronounced wiggle, simulating movement of crab when moving backwards, away from danger; bait is drawn through water tail first. Has patented variable line fishing device to regulate action of bait. Is a floating, diving, darting minnow.

3¾ in. body, two nickel plated treble hooks w't ⅝ oz.

	Per doz.

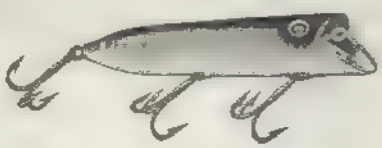
No. 1909C—Imitation Crab ...	16.00
No. 1909D—Scale Finish	16.00

ONE IN A BOX

HEAD-ON-BASSER



Possesses certain subtle improvements in balance, stream outline and had-planes that intensify the erratic swimming movements associated with baits of similar type.

Casts straight and true and floats on the surface until retrieved. Under the line pull, it drops to an average depth of 18 inches below the surface, and comes in with an undulating, weaving motion, interrupted by short, quick darts that excite the curiosity of any bass in the vicinity. Equipped with three treble hooks. Length overall 3¾ in., w't ⅝ oz.

No. 8502—White body, red head .....per doz. $13.60
No. 8509D—Green scale finish, per dozen 13.60

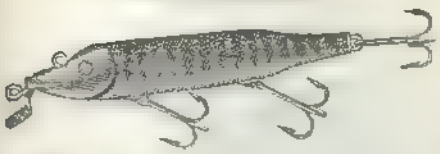
ONE ON A CARD IN A BOX
HALF DOZEN IN A CARTON

PIKIE MINNOWS



The new Nature Lure so closely imitates the pike minow in shape, color and movement that the combativeness of the bass is aroused and they strike it to kill.

Gives best results when reeled slow but does not revolve if reeled fast. It's a near surface wiggler, or by turning up the screweye a few turns and reversing the mouthpiece you have a surface splatter.

Slim body 4½ in. long; weight ¾ oz.; rust-proof bronze hooks to blend with color of body; all hooks including the tail hooks set in sockets to hold same away from the body.

No. 700—Scale finish,
Per dozen.

No. 701—White, blue head ..$16.00
No. 704—Natural chub 15 20
No. 705—Green back, scale finish 15.20
No. 706—Yellow shiner 15.20

BABY PIKE

Thoroughbred from the Famous Pikie Minnow.

This lure 3¾ in. long is a smaller bait than the now famous Pikie Minnow, which has been making the record catches of game fish in every part of the country. It has a wicked wiggle and all the good qualities of the larger lure. A light, strong killer.

No. 900—Natural Pikie, per dozen $15 20

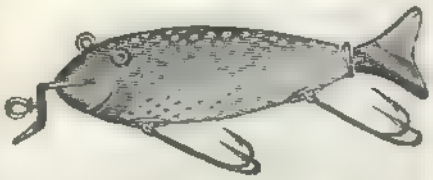
CRAWDAD NATURAL CRABS

Natural shaped body and tail, black bead eyes, rubber legs, bronze hooks, movement backwards, same as a crab. Wiggle mostly in tail. Rubber legs give more movement. ONLY BAIT WITHOUT NICKEL PLATE; fine for use on bright days, in clear water and along stony shores.

Floats until started. Tail guards hooks from snags and bottom. Length of body 2⅝ in.; w't ¾ oz. Casts like a bullet.

No. 300—Shell finish,
per dozen $12.60

CHUB WIGGLERS



DE LUXE WAG TAIL

A bait which apparently swims with its tail. Looks like a live minnow, swims like one and is a Real Fish Getter. Has a nickel plated tail which swings back and forth as the bait travels through the water, and the flash of the nickel makes a more attractive lure. Body 2¾ in. long, w't ½ ounce, double hooks so placed that the fish get hooked when striking and at the same time the bait is practically weedless.

No. 800—Natural Creek Chub, scale finish .....per dozen $16.00

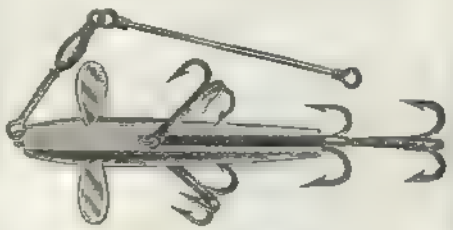
Always floats when at rest. Does not revolve. Practically weedless.

Per dozen.

No. 801—White, blue head ...$15.20
No. 804—Natural chub 15.20
No. 806—Yellow shiner 15.20

ONE IN A BOX

PFLUEGER DEVON MINNOWS



BREAKLESS

The spring brass wire frame permits of quick attaching or detaching of the hooks which might have become broken or damaged and also changing of one size hook for another. With this device there is no fraying of the gut or gimp mounts as formerly used and is practically indestructible. Extra strong best quality treble hooks, bright nickel plated, brass barrel swivels and bronze wire leaders bright nickel plated.

No. 289—

Sizes	3	4	5
Per dozen	$10.60	12.00	12.00

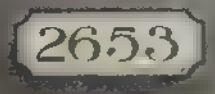
LETTERING & ARMS.



TABLETS

Transfer designs in Gold Leaf and Colours have almost entirely superseded hand paintings of Coats of Arms, Lettering, Monograms, Notices etc for use on the panels of Railway Carriages, Locomotives, Tram Cars, etc

The durability of our Transfers is conclusively proved by the continued use for many years by the principal Railways in such varied climates as India, South Africa, Australia, Malay States Russia, China and North and South America.

The fixing of Transfers on panels is very simple and can be done in a few minutes

It is essential for intending buyers to state in their enquiry the approximate quantity of each design required, as the larger the quantity of each design ordered the lower the cost

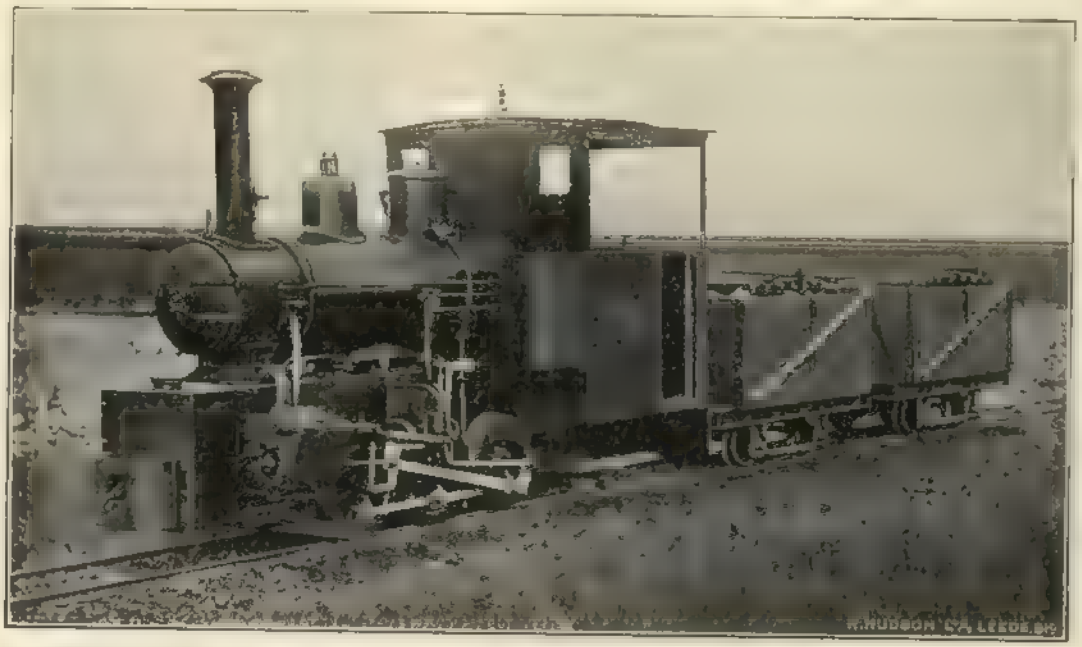
The leading BRITISH Manufacturers of

PORTABLE AND PERMANENT LIGHT RAILWAY MATERIALS

Especially as used for
GOLD, DIAMOND, TIN AND COPPER MINES SUGAR ESTATES, FORESTS COLLIERIES, TEA AND RUBBER ESTATES, IRRIGATION SCHEMES, RAILWAY CONSTRUCTION, Etc.

Fabricants anglais les plus importants de
MATERIEL POUR CHEMINS DE FER A VOIE ÉTROITE PERMANENTS OU PORTATIFS
employés spécialement pour les mines d'or, de diamant, d'étain et de cuivre; pour les plantations de canne à sucre, les forêts, les houillères, les plantations de thé et de caoutchouc; les travaux d'irrigation, la construction des lignes de chemins de fer, etc., etc.

Los Fabricantes ingleses más importantes de
MATERIAL PARA FERROCARRILES DE VIA ESTRECHA, PERMANENTES O PORTÁTILES
especialmente empleados en las minas de oro, diamantes, estaño y cobre, para servicio de las plantaciones de caña de azúcar, de los bosques, de las Fulleras, plantaciones de té y de caucho; obras de riego y construcción de líneas ferroviarias, etc. etc.



Dans les pages suivantes nous donnons les détails de quelques unes de nos spécialités et nous serons heureux d'envoyer des devis et catalogues sur demande.

Nous avons toujours une grande quantité de matériel de toutes sortes prêt à être livré.

En las páginas siguientes damos detalles de algunas de nuestras especialidades y nos será grato remitir proyectos y catálogos á petición.

Disponemos siempre de una gran cantidad material de toda clase, listo para la expedición.

Contractors to the War Office, Admiralty, India Office, Crown Agents, H.M. Office of Works, Colonial and Foreign Governments
Fournisseurs du Ministère de la Guerre, de la Marine, du Gouvernement des Indes, des Agents de la Couronne Britannique, du Ministère des Travaux publics, et des colonies et des Gouvernements étrangers.
Contratistas del Ministerio de la Guerra, de la Marina, del Gobierno de las Indias, de los Agentes de la Corona para las Colonias y Extranjeros, Ministerio de Obras Públicas y de los Gobiernos Coloniales y Extranjeros.

On the following pages we give particulars of a few of our specialities and shall be pleased to send detailed estimates and catalogues on application. Large stocks of materials always kept ready for immediate shipment.

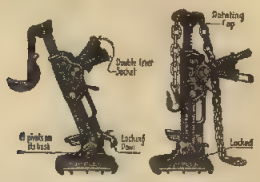
SIMPLEX JACKS

Malleable Iron Standard and Base; Drop Forging Lever Socket; Chrome Nickel, Drop Forging Rack Bar; Drop Forging Pawl; Steel Bushings, Keys and Lever Bar. Double Socket for Lever Pole enables work to be done in any position



EMERGENCY

A Single Acting Automatic Raising and Lowering Jack, of 15 Tons Capacity, operating on the Down Stroke of Lever.

A Combination of Crane and Jack; Pivots on its Base from 30 to 90 Degrees to horizontal, and lifts, lowers, pushes, or pulls at any Angle.

Load can be lifted on Cap, Lower Foot, Steel Auxiliary Shoe, or with Special Chain Attachment.

Cap is recessed to hold Chain; Has Corrugated Surface and V-notched Side and will readily engage Beams or Boxes; Jack cannot slip because of heavy Calks in Base; Base of Standard rests on curved Shoulders which are part of Base, which therefore takes all Thurst.

For pushing Heavy Machinery, Re-railing Cars, Removing Obstructions, Bracing and Shoving Timbers, Extricating Motor Trucks, Lifting Sleds, etc., also for General Mine, Bridge or Construction Work, Ship Yards or Docks, Oil Fields, Electric and Steam Railroads, Telephone, Public Service or Trolley Poles, and other Industrial Purposes.

Each

No. P404-310—Capacity 15 Tons; Lift 12½ in., Height 21½ in.; Weight of Jack only 65 Lbs.; Weight of Chain and Bar 30 Lbs.; Complete with 5 Feet of Chain with Grab Hook, and 5 Foot Combined Steel Lever, Pinch Bar, and Car Mover $48 00

Open Stock; Weight 95 Lbs. Each

POLE PULLING

A Single Acting Automatic Jack of 15 Tons Capacity, operating on the Down Stroke of the Lever, or Tripping in any position.

Especially designed for pulling, reinforcing and straightening Telephone, Trolley and Lighting Poles; Pivots on its Base and lifts out largest pole in a fraction of the time required by old methods; No Digging or other starting necessary.

Pivoting Base allows Jack to follow Angle of Pole with Pressure constantly exerted; Recessed Cap, into which any of Links of Chain are dropped, holds firmly under every Load; Double Lever Socket assures convenient position of Lever Bar, regardless of inclination of Jack.

Rack Bar raises or lowers Tooth by Tooth, or may be tripped at any point; After completion of first pull, Jack can be eased off, tripped to Low and a new hold taken.

All possibility of Accident safeguarded.

Each

No. P404-318—Capacity 15 Tons; Lift 23 in., Height 39 in.; Weight of Jack only 90 Lbs.; Chain 34 Lbs.; Bar 17 Lbs.; I-Beam Base 48 Lbs.; Complete with 8 Feet of heavy Chain with Pear Link attached, 5-Foot Steel Lever and Pinch Bar, and 2 feet of 10 inch 25 Lb. I-Beam Base..... $70.00

Open Stock; Weight 187 Lbs. Each

SHIPBUILDERS AND LOGGING

Single Acting, Automatic Lowering, with Pivoting Base, which automatically inclines, follows or guides Load; Calks to prevent slipping; Two Prong Recessed Cap and Locking Pawl.

Each

No. P404-312—Capacity 15 Tons, Lift 12½ in.; Height when closed 21½ in.; Weight of Jack only 50 Lbs.; Chain 14 Lbs.; Bar 18 Lbs.; Complete with 5 Feet of Chain with Grab Hook, and 5-Foot Steel Lever and Pinch Bar..... $48.00

Open Stock; Weight 83 Lbs. Each

TRACK

A Compact, Double Acting Track Jack; Heavy, massive Construction enables it to handle the heaviest work, yet it is shorter than other Jacks of equal lift; Malleable Iron and Steel Construction; Square Lever Socket permitting the use of Square Lining Bar.

Each

No. P404-101—Capacity 10 Tons, Lift 14 in.; Height, Closed, 23 in..... $22.00

Open Stock; Weight 58 Lbs. Each

An Efficient Double Acting Jack, for Track, Ballast or Construction Work; Operates on Up and Down Stroke of Lever, or Trips at any position; Malleable Iron and Steel Construction; Square Lever Socket permitting the use of Square Lining Bar.

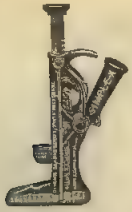
Each

No. P404-105—Capacity 15 Tons; Lift 19 in.; Height 29 in..... $28 00

Open Stock; Weight 70 Lbs. Each

SIMPLEX JACKS

All Malleable Iron and Steel Construction



SURFACING, TRACK AND BALLAST

Single Acting, operating on Down stroke of Lever or Tripping at any position.

Pawls are located almost vertically, permitting great leverage and power with less effort.

Range from No. P405-116 for Low Lift Track Surfacing to No. P405-118 for High Lift Heavy Ballast Work.

Nos.	P405-116	P405-117	P405-118

Maker of the

"HIPKINS" PATENT RIVETLESS SLEEPER

EF

THE BEST ON THE MARKET FOR MINES, Etc.

Fabricants de la TRAVERSE SANS RIVETS "HIPKINS" BRÈVETÉE

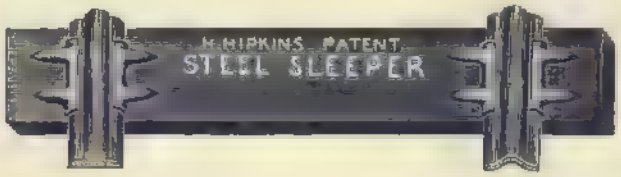
La meilleure sur le marché à l'usage des mines, etc

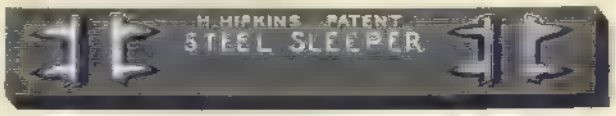
Constructor de la TRAVIESA, PATENTE "HIPKINS" SIN REMACHES

La mejor en el mercado, para minas, etc

NO LOOSE PARTS. NO RIVETS.

Pas de pièces détachées Pas de rivets No hay partes sueltas No lleva remaches





LES anciennes traverses en fer ont été reconnues défectueuses et coûteuses par ce que les rivets qui étaient nécessaires pour fixer les éclisses sur les traverses devenaient libres en raison des chocs et des frottements dus à leur démontage

Pour obvier à ceci nous avons introduit sur le marché la traverse en acier sans rivets dans laquelle les éclisses pour maintenir les rails sont estampées de la masse et trempées par ondulations.

En énonçant votre demande de renseignements prière de spécifier le calibre requis et de donner le croquis du rail.

THE old iron sleepers have been found objectionable and expensive on account of the rivets, which have been necessary to secure the lips upon the sleeper, frequently becoming loose by reason of the jar and friction, which necessitates their being taken up and relaid.

To obviate this the STEEL RIVETLESS SLEEPER has been introduced in which the lips or jaws to hold the rail are STAMPED OUT OF THE SOLID AND STIFFENED BY CORRUGATION.

The required gauge should be stated and sketch of rail sent with all enquiries.

LAS traviesas antiguas de hierro se las ha encontrado defectuosas y costosas á causa de los remaches que se requerian para sujetar las pestañas ó labios sobre la traviesa, que con frecuencia llegaban á ser aflojados á causa del traqueteo y de la fricción necesitando por esta razón tener que sacarlas y volverlas á colocar.

Para obviar ésto se ha introducido la traviesa de acero sin remaches en la que las garras ó labios para mantener firme el rail, se hallan estampadas del macizo y atiesadas por ondulación

Cuando se envíen las consultas se deberá indicar el ancho de viá así como un bosquejo del rail.

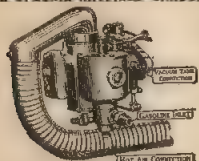
DODGE SPECIAL RAYFIELD CARBURETOR



The special RAYFIELD Carburetor for the Dodge car is the standard "Model M" RAYFIELD, particularly suitable to the Dodge motor, insuring the greatest possible efficiency and economy.

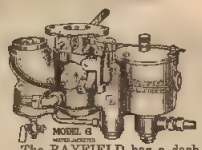
A special RAYFIELD Carburetor on a Dodge car is guaranteed to make it start easier, accelerate faster, throttle lower, develop more power and speed, and save from 20% to 50% in fuel.

Hot air is used to heat the Carburetor. A hot air connection is provided to fit the motor without changes.

Complete with all necessary fittings:

1915-1916-1917 Dodge Special FMR3 Carburetor, each *$47.50*

1918 FMR3 Carburetor ..... each *48.50*



The "Model FG" is a double-jet water jacketed carburetor. It has only two adjustments, one for low speed and the other for high, both controlling the supply of gasoline.

The RAYFIELD has a dash pot construction which injects additional gasoline (only when it is needed) when the motor is accelerated. This makes it possible to use an extremely economical running mixture and still have the very fast get-away and maximum power.

A Dash or Steering Post Control is furnished with all RAYFIELD carburetors. This control raises the nozzle needle, supplying a richer mixture for cold weather and cold motor conditions. When pulled up the entire distance it also engages the RAYFIELD primer (built integral with the carburetor) making possible utmost ease in starting even in the coldest weather.

MODEL G (WATER-JACKETED)

Model	Size	Each.
FG2 and FGL2	1 in.	*$46.50★*
FG3 and FGL3	1½ in.	*55.00★*
FG4 and FGL4	1¾ in.	*64.00★*

If the motor has pump circulation the "Model G" MUST BE USED.

The "Model FL" RAYFIELD carburetor is non-water-jacketed, otherwise the design and construction is the same as the Model FG. It should be used only on thermo-syphon and air-cooled motors.

Heat to the carburetor is necessary to properly vaporize the low grade fuel now in use.

Both hot air and hot water should always be used.

MODEL L (NON-WATER-JACKETED)

Model	Size	Each.
FL2 and FLL2	1 in.	*$42.50★*
FL3 and FLL3	1½ in.	*46.50★*

These include standard type of dash or steering post control.

The "Model L" carburetor is suitable only for use on thermo-syphon and air-cooled motors and is guaranteed on no other.

"Models FG and FL" are also furnished in sizes as listed above with the adjustments on the opposite side of carburetor. These models are left-hand and are known as FGL and FLL.

Always specify the make, model and year of car or motor when ordering. We will ship the necessary fittings for installation. Hot air outfits and other fittings are not included in the price of carburetor, and will be charged extra.

FLEXIBLE METAL TUBING

For conveying hot air to carburetor, strongly constructed, very flexible, easy to assemble. Furnished in electro galvanized steel, brass or copper. Asbestos packed.

CARBURETORS

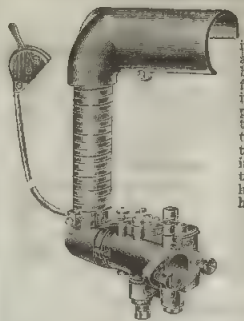
RAYFIELD, DASH CONTROL, MODEL "UF," FOR ALL MODELS FORD CARS



Plain tube type, having no loose fittings to adjust or readjust. Has but two adjustments; one for low and one for intermediate speeds. The predominant feature of this carburetor is the thermostatic hot-air control principle, which is involved in its construction, making it an absolute impossibility to overheat in the summer time.

	Each
No. A-UF—Complete with all fittings for installation	$40 50

One in a carton; weight each 10 lbs.

KINGSTON, FOR FORD CARS

Model L 4

Designed and built especially and used as regular equipment for Ford cars; (Spitfire Nozzle) equipped with improved spray nozzle providing super carburation, quicker getaway, economy and power in all weather and hill climbing conditions

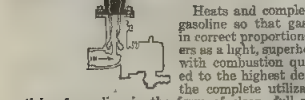
One assortment in a wood box; wt. 10 lbs.

MANIFOLDS

WILMO, Increases Gasoline Mileage 42% to 54%.



Heats and completely vaporizes gasoline so that gasoline and air in correct proportions enter cylinders as a light, superheated mixture, with combustion quality developed to the highest degree. Insures the complete utilization of every particle of gasoline in the form of clean, full power gas. It provides a warm mixture at first few turns of the motor.

Made of one piece gray iron. Replaces the exhaust and intake pipes. Easily and quickly installed.

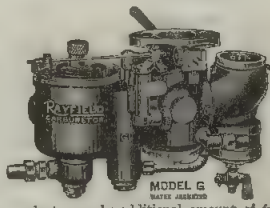
CARBURETORS

RAYFIELD, DASH CONTROL

The basic principle and general construction which has made the Rayfield known as the world's best carburetor, is continued in accordance with original design. From time to time refinements have been incorporated to accomodate the many improvements in modern motor construction and the constant deterioration in the quality of fuel.

The dash control, when properly used, will render easy starting; furnish a richer mixture when motor is cold, and maintain a correct mixture under the most extreme atmospheric changes. When adjustments are correctly made they should not be changed, as the dash control will take care of cold weather as well as cold motor conditions. All Rayfield carburetors are equipped with a strainer trap at bottom of float chamber, which should be drained occasionally. The dash pot can be flushed through drain cock.

MODEL G



Water jacketed; has only two adjustments, which are simple and accessible; one for low speed and one for high, both controlling the supply of gasoline. Automatic injector feature operated by dash pot pump below the air valve injecting through the metering pin nozzle to supply additional amount of fuel for acceleration. Has two air intakes for breaking up and vaporizing gasoline. Complete with all fittings necessary for installation.

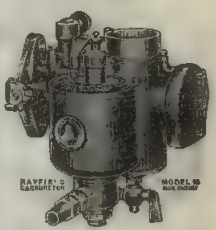
One in a carton; weight each 12 lbs.

MODEL M, FOR HUPMOBILE



Designed to supply the demand for a side outlet carburetor resulting from the construction of motors having integral intake passages, thereby eliminating the exposed manifold. Fuel is delivered to the combustion chambers at a high temperature, insuring better vaporization. Has two intake valves which are interconnected and automatically operated. Fuel is supplied through two nozzles; one supplies all gasoline required when motor is idling, and additional gasoline for quick acceleration and high speed is supplied through the other nozzle, which is controlled by a tapered metering pin. Complete with all fittings for installation.

Right Hand.	Each
No. A-800-36—For Hupmobile, 1915-16-17 all models; size 1¼ inch	✦$70 89

Windshield Weather Strips

This Windshield Weather Strip is furnished in 42 in. lengths and packed 15 lengths to a box. It can also be furnished in any length up to 10 ft. on special order. Every car owner should carry a length of this for an emergency as it absolutely prevents rain and snow from beating in between the cracks of the shield.

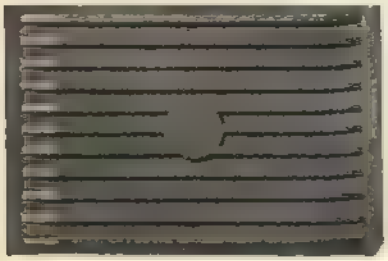
No. 97 Each.....$0.75

Windshield Weather Strips

Made especially to fit offset windshield on Ford car. Comes in 37 in. lengths; packed twelve lengths to a box. Can be furnished in any lengths up to ten feet on special orders.

No. 109 .....each, $0.85

Cherokee Running Board Mats



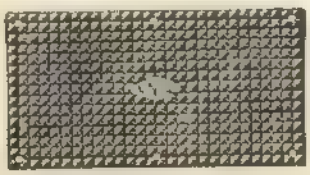
Cherokee Running Board Mats are made of the highest quality all rubber composition having a glossy black finish which remains so during the entire life of the mat.

They prevent dirt from being carried into the car and assure safety in alighting.

Size 7¼ x 11 inches with reinforced eyelets.

Each $1.00

Aluminum Heel Plates



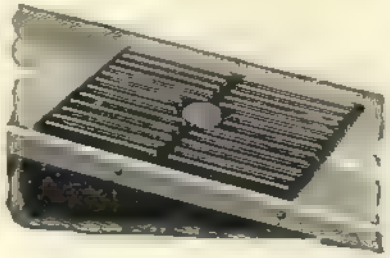
Pyramid style, made of aluminum, easily attached by six screws or split rivets.

6x10¼ in. .....each, $0.60
5x 8 in. ..... each, .40

Stanwood Safety Step Plates

The different types of plates perform the same office for the automobile that the vestibule mat does for the house and will appeal to and insure contentment through cleanliness to those who care.

They are a winter necessity, a summer luxury and a hygienic requirement—a symbol of safety and car cleanliness. Will not become saturated with moisture.



Rubber molded on a perforated metal plate, 24 projecting ribs. Size 8 in. wide, 11½ in. long. Keeps the car clean. Assures safety. Adds to car refinement. Quickly applied.

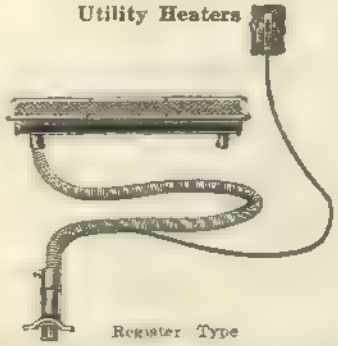
Type C..... each, $1.60

Stanwood Accelerator Heel Plates

A perforated metal plate entirely covered with rubber and provided with a series of longitudinal ribs firmly molded to the metal plate. Size of plate 4 in. wide, 11½ in. long.

Each $0.85

Utility Heaters



Register Type

Designed to fit cars too small for a foot rail type heater. This heater sinks below level of floor, all that shows being the nickel plated register.

Control can be located at driver's seat or in tonneau as preferred.

Utilizes the heat from the exhaust of the car to heat the car itself.

Noiseless in action and will furnish sufficient heat to warm car without becoming hot enough to burn shoes or robes.

Utility Register Type 27 in. long ....each, $30.00
Utility Jr. 17 in. long ....each, 22.50
Utility Jr. Buick Special ..each, 25.00

Automobile Blue Books

"America's Standard road guide since 1901." Gives detailed running directions for every mile to any place that can be reached by automobile—every bit of information both before starting and also en route to make every trip a success.

For every section of the country there is a corresponding 1921 Automobile Blue Book.

All volumes are uniform in style, size and binding, average 1000 pages, printed on special thin paper, with hundreds of maps and illustrations, in limp "Royal Blue" binding, stamped in gold.

Vol. 1 New York State, including Long Island, Ontario and adjacent Quebec, with extension routes into adjacent New England, Pennsylvania, New Jersey and Ohio.

Vol. 2 Connecticut, Massachusetts, New Hampshire, Rhode Island, Vermont, Maine, Quebec, New Brunswick, Nova Scotia and New York State east of Hudson River.

Vol. 3 Pennsylvania, New Jersey, Delaware, Maryland, Virginia, West Virginia and District of Columbia, with extension routes into North Carolina, Tennessee, southern New York State and eastern Ohio.

Vol. 4 Ohio, Indiana, Kentucky and Lower Peninsula of Michigan, with extension routes to Chicago, Clinton, St. Louis, Nashville, Buffalo and Pittsburgh.

Vol. 5 Iowa, Illinois, Missouri, Southern Wisconsin, Western Kentucky and Western Indiana, with extension routes to St. Paul, Minneapolis, Memphis, Little Rock and Topeka.

Vol. 6 Florida, Georgia, Alabama, North Carolina, South Carolina, Mississippi, Tennessee and Eastern Louisiana, with extension routes to Washington, Louisville, Cincinnati and Lexington.

Vol 7 Colorado, Nebraska, Kansas Texas, Oklahoma, Louisiana, Arkansas, New Mexico, Southern Wyoming and Eastern Utah, with extension routes to Phoenix, Grand Canyon, St. Louis, Salt Lake City, and Clinton

Vol. 8 California, Nevada, Utah and Arizona, with extension routes into Oregon and New Mexico and to Yellowstone Park, Cheyenne, Denver and El Paso.

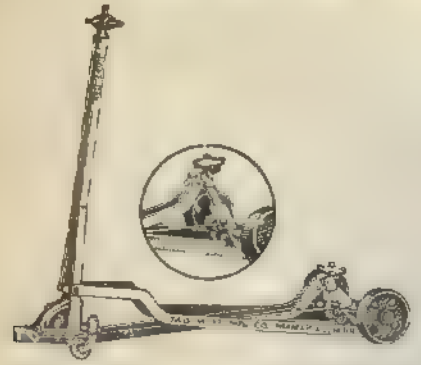
GARAGE JACKS

RED DEVIL DOLLY JACKS



Made of electric steel castings and mild steel bars; steel roller bearings; a big quick lift, roller caster, to swing front or rear of heaviest car or truck; a turn table for any spot in garage; long enough to reach under running boards or rear bumper and spare tire rack; low enough to pass under the raised wheels; indispensable in crowded garages; washrack, unloading freight shipments of automobiles, handling cars in warehouses, salesrooms and numerous other places.

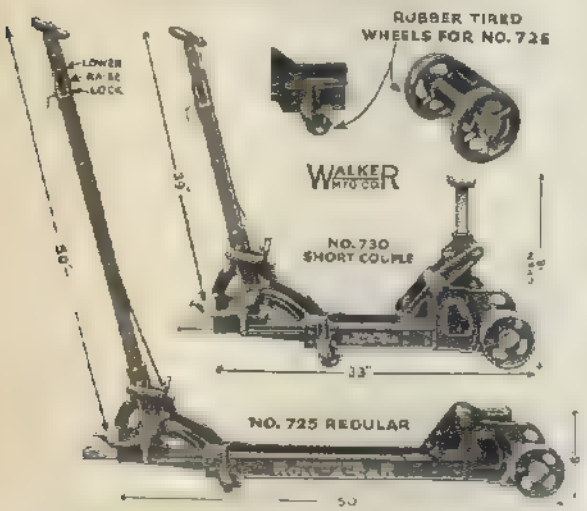
Red Devil Dolly Jacks; range of adjustment 8 to 14½ inches; lifts 4 inches at one stroke; diameter of wheels 8¼ inches; wheel tread 2 inches; length of truck 54 inches; width of track, outside 15 inches; distance between wheels 11 inches; weight 125 pounds. ..... Each $45.00

NEW WAY JACKS

For quick action in lifting and shifting cars or trucks length of frame and wheels over all 40 inches; pivoting wheels, guided and controlled by handle; lifting capacity 5000 pounds; lifting standard composed of two sections, one telescoping within other, and operated by ratchet lift; extremely heavy and well constructed; lifting mechanism is of hardened steel; maximum lift 19 inches; minimum height 9 inches; wheels are equipped with roller bearings and caster under front is equipped with set of ball bearings.

Weaver New-Way Jacks; weight 100 pounds Each $32 50

WALKER ROLL-A-CAR JACKS



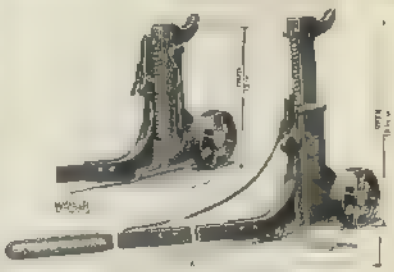
For lifting and shifting cars or trucks; can be placed in position under car in few seconds; control latch on handle gives three absolute controls, raising, locking and reverse; foot pedal at base raises or lowers rack bar by slight pressure of operator's foot; car quickly raised by pumping main handle up and down; each stroke of handle gives ¾-inch raise; main frames of malleable iron; lifting pawls, high carbon drop forged steel, heat treated; front and rear wheels of malleable iron; springs of oil tempered steel; high carbon steel rack bars; cap of drop forged heat treated steel

No. 725—Roll-A-Car Jacks; height 8 inches; raise 10 inches; length 50 inches; cap. 5000 pounds; weight 117 pounds ..... Each $50.00

No. 726—Roll-A-Car Jacks; same as No. 725 except rubber tires..... Each 60 00

No. 730—Roll-A-Car Jacks; same as No. 725 except short coupled; especially designed for taking automobiles out of freight cars..... Each 50.00

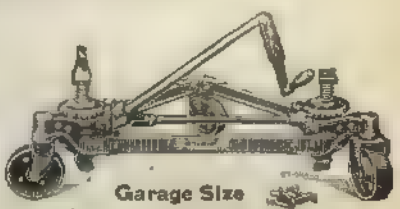
WALKER JUMP JACKS



Especially designed for tire service work; to operate, catch hold of long handle, roll jack underneath axle of car, pull chain attached to handle of car, lifting rack bar against axle; automatically locking racking in place; pressing down on handle shoves wheels underneath car, automatically raising it to proper height; quickly lowered by raising handle.

Walker Jump Jacks; height 13 inches; raise 6 inches; 6-foot handle; cap. 1 ton; weight 30 pounds Each $12 00

AUTO TWIN-JACKS



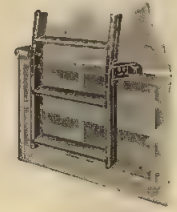
Provides efficient and practical means of handling complete, or dismantled automobiles in garage, repair shop, storage room, paint shop, etc.; one man can readily manipulate a car in any desired manner. Casters and lifting mechanism are fully equipped with ball and roller bearings; very heavy loads can be raised and transported with extreme ease; jacks are designed to take either front or rear axle of car, even though equipped with truss rods; screw hoisting mechanism prevents any possibility of accident; no treacherous ratchets to jar out of engagement, or to be accidentally tripped off by workman while under car.

Weaver Auto Twin Jacks; small car size; 1⅛ in. screws, 28 inches apart; 34 inches between wheels; length handle 34 inches; cap. 4000 pounds; weight 50 pounds..... Each $15 00

Weaver Auto Twin Jacks; heavy type; 1¼-inch screws, 28 inches apart; 34 inches between wheels; length handle 40 inches; cap. 8000 pounds; weight 110 pounds..... Each 24 00

ROLLING STORE OR SHELF LADDERS

A Medium Golden Oak Finish is regularly supplied, but we can furnish Lighter or Darker to match Samples, at No Extra Charge. A 9-inch Extra Deep Top can also be furnished, if desired, at No Extra Charge. Ladder is made of selected Kiln Dried Lumber, Rubbed, Oiled, Filled and Varnished; Sides are 3½ in. wide, Steps are 4 in. deep, and Ladder is 12 in. wide inside. Each Stay Bolt is mortised into Side Pieces and fastened with four Screws; Three Stay Bolts give Sides Extra Strength.



RELIABLE

STRAIGHT SIDE

Our most popular Style, recommended wherever Shelving will permit, i. e., where there is no Base Shelf, or other Projection. Throws practically all the weight on floor, instead of on Shelving or Ceiling. No Track required on Floor.

Track is ⅞ in. Round Steel Tube on Special Brackets, same construction as in Reliable Barn, Garage, Parlor and Fire Door Hangers.

Hangers are adjustable, bearing perfectly at any angle, and permitting free movement on uneven floor; four wheels prevent Binding or Derailing, 2 in Hard Paper Noiseless Wheels, with Brass Bushings.

Floor Travellers are Rubber Tired; 4 in. in Diameter.

In ordering, give Height from Floor to Center of Track (2-20 plus 4-40), Width or Projection of Base Ledge (5-50), Length of Track, and Number of Brackets (about 4 ft. apart, as Uprights permit.

Each

+No. F741A—Ladder, Complete with Fixtures . . . $39.60
Weight 4½ Lbs. per Foot

BENT SIDE

Similar to No. F741A, but with a Bend like **Shelf Base Ladder No. F741E.** Intended for use where Projection of Base Shelf is too great to take **Straight Side No. F741A** satisfactorily; but, wherever Height from Base Shelf or Counter Ledge to Track (2-20) is 6 ft. or more, and Projection of Base Shelf (5-50) is not over 16 in. the **Straight Side Ladder** is generally preferred as it is easier to ascend and descend and takes but little more Floor Space.

Track is ⅞ in Round Steel Tube, with Special Brackets.

There should be 12 in. Head Room above Track. This can be reduced to 7 in., if necessary, but must be so noted in ordering.

Hangers are the same as Hangers of **No. F741A Ladder.**

Floor Travellers same as in No. F741A Ladder.

In ordering, give Height from Floor to Center of Track (2-20 plus 4-40), Width or Projection of Base Ledge (5-50), Length of Track, and Number of Brackets (about 4 ft. apart, as Uprights permit).

Each

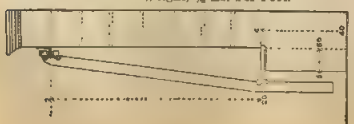
+No. F741D—Ladder, Complete with Fixtures $43.20
Weight 4½ Lbs. per Foot

Per Set

+No. F741B—Upper and Lower Fixtures only, for Nos F741A and F741D Ladders (regularly furnished for 12 in. Ladder) . $18.00
Weight 13 Lbs. Per Set

Per 100 Ft

+No. F741C—Tubular Track; ⅞ in. Diam., Complete with Brackets $21 60
Weight, ¾ Lb. Per Foot.



SHELF BASE

Especially for conditions which require that Ladder operate independently of both Ceiling and Floor Made with extra strong Fixtures, Track and Brackets, because all the weight is carried by Track.

Track is 1⅞ in. Diam. Round Steel Tube on Special Brackets, same construction as in Reliable Barn, Garage, Parlor, and Fire Door Hangers.

Hangers are Malleable Iron, with great strength and wide Bearing on both Track and Base Shelf; Wheels are 3¼ in. in Diam., Steel cased with hard fibre Tread, noiseless, and running with minimum of Friction. Lower Wheels of Upper Fixtures prevent Derailing or Binding.

In ordering, give the following measurements, (see Illustration below): 4-40, 5-50, 2-20, Length of Track, and Number of Brackets (about every 3 ft. as Uprights permit).

Each

+No. F741E—Ladder, Complete with Fixtures $36.00
Weight 4 Lbs. per Foot

Per Set

+No. F741F—Upper and Lower Fixtures only, for No. F741E Ladder (regularly furnished for 12 in. Ladder) $10.80
Weight 8½ Lbs. per Set

Per 100 Ft.

+No. F741H—Tubular Track; 1⅞ in Diam., Complete with Brackets $28 80
Weight 1¾ Lbs. per Foot

ROUND TRACK TROLLEY

For use with unusually high Shelving where Side Ladders will not meet requirements.

Track is Double Tube, or two round ⅞ in. Steel Rails suspended by Patent Hangers; same construction as in Reliable Barn, Garage, Parlor, and Fire Door Hangers. Brackets regularly furnished for 2 ft. Spacing, but may be Spaced as desired

Upper Fixtures are self adjusting, made carefully of Malleable Iron, with four Steel Cased Wheels with Hard Fibre Tread, operating easily and noiselessly and incapable of jumping the Track.

Floor Travellers are 3½ in. in Diam., and also have Hard Fibre Tread.

In ordering, give Height of Ceiling and Length of Track wanted.

Each

+No. F741J—Ladder, Complete with Fixtures . . . $34.20
Weight 4 Lbs. per Foot

Per Set

+No. F741K—Upper and Lower Fixtures only, for No F741J Ladder (regularly furnished for 12 in. Ladder) $10.80
Weight 10 Lbs. per Set

Per Foot

+No. F741L—Double Tubular Track, Complete with Brackets $0.45
Weight 1¾ Lbs. per Foot

Illustration to left, printed to show how to measure, in ordering Store Ladders.

2 to 20 is Distance from Ledge or Base Shelf to Center of Track.

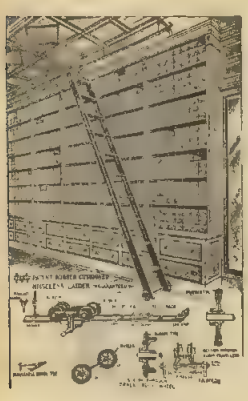
4 to 40 is Distance from Floor to Ledge or Base Shelf.

5 to 50 is Projection of Ledge or Base Shelf

+Entire Page for Factory Shipment Only; F. O. B. Danville, Ill.

ROLLING STORE OR SHELF LADDERS

For Hardware, Shoe, Drug, Grocery and General Stores, Jobbing Houses, Large Office Vaults, Libraries, Book Stores, Factories, Machine Shops and any place where High Shelving is to be easily, quickly and safely reached



No. F742C

No. F742D

No. F742E

No. F742F

MYERS CUSHION TIRED

For Shelving with narrow or no Base Ledge (wide counter at bottom forces Ladder too far away from Shelving). Easiest to mount; Both Hands free to carry Goods; Does not knock off slightly projecting Boxes; etc

Track is Double Angle Steel Rail, either suspended by jointed or rigid Hangers, or screwed close to ceiling with flanged Plates, thus leveling an uneven surface without any blocking, bridging, or other difficulty.

Ladder is constructed of strictly clear Georgia Pine, nicely finished, filled, and varnished; sides are 5 in. wide, open paneled; Steps are 5 in. deep, supported by special malleable Tees; Ladder is 12 in. wide.

Trolley is self-adjusting, of Malleable Iron, with turned Steel Bearings; 3 in. Anti-Rattler Wheels, Lathe finished and Rubber Tired.

Floor Travelers are 5 in. in diameter, composed of metal sides with Rubber Cushion Tires; Steel Axle runs through both Legs

Rubber Tread of both Hangers and Floor Travelers makes ladder almost noiseless.

In ordering, give exact Height of Ceiling and Length of each Track. If Height of Ceiling varies, give Height at each end and center of each Run of Track.

Each

✚**No. F742A—Ladder**, complete with Fixtures, but without Track or Brackets $46.00

Weight 40 to 50 Lbs., according to Length

Per Foot

✚**No. F742B—Track**, complete with Hangers $0.68

Weight 2 Lbs. per Foot

✚F. O. B. Ashland, Ohio

MILBRADT

For all kinds of High Shelving where Base Shelf is narrow, Roller Arms can be made longer, or placed at bottom to run against Base. Take up least possible Space; Noiseless; Light Push will propel Ladder Length of ordinary store.

Side Ladders are 17 in. wide, Sides 2½ in. wide, Top Shelf 7⅛ in. deep, Steps 3½ in deep; Trolley Ladders are 13½ in wide, Sides 3½ in. wide, Steps 4¼ in. deep. Widths given are at Top, and increase ¼ in every Step downward Ladders are of Oak with all Iron Parts Aluminum Bronzed. Finished in natural wood, but can be furnished to match any Sample, for which an extra charge of $1.00 is made; Ladders made of Birch, finished mahogany or any other color $2 00 extra per Ladder.

Each

✚**No. F742C—Trolley Ladder**; Strongly built, Runs on No. F742H Steel Track, fastened to Ceiling; Especially for Hardware Stores or Wholesale Houses, where Heavy Goods are handled; Base Ledge must be narrow enough to permit easy reaching; Easy to climb. $35 00

✚**No. F742D—Bent Ladder**; Preferable for Shelving with wide Base, as it will run close, Rubber rollers 35 00

✚**No. F742E—Bent Ladder**; for use where Shelving is not very strong, or where it does not run down to Floor; Floor Travelers relieve Track and Shelving of most of Weight; Top Travelers self-adjusting to any unevenness of Floor..... 36.00

✚**No. F742F—Bent Ladder**; Similar to No. F742D, but has Swinging Arms attached to Ladder that run against Strip on Shelving; Used where there is no ledge on Shelving 36 00

Average Weight of Ladders, 50 Lbs. Each

TRACK

Per Foot

✚**No. F742H—Trolley Track**, for No. F742C Ladder; complete with Lag Screws and Brackets $0.70

REMINGTON AUTOMATIC PISTOL

No. 52—Pocket model hammerless, 32 cal. 8 shots, length 6⅝ in., width or thickenss 9/10 in., w't unloaded 21 oz., finish, browned (a durable dull black) stocks hard rubber .....each $31.50

Extra Magazines, for No. 52, 32 cal. automatic pistol, each $2.00

Stocks, hard rubber .....each $31.50

No. 51—Pocket model, hammerless, .380 caliber, 8 shots, length 6⅝ in., width or thickness 9/10 in., w't unloaded 21 oz., finish, browned (a durable dull black.)

Extra Magazines, for No. 51, 380 cal. automatic pistol, each $2.00

ONE IN A BOX

Self-Aiming and Completely Safe.

Capacity of magazine, seven cartridges; an additional cartridge can be carried in the chamber, ready to fire instantly when the safety lever is forward. This is two more cartridges than can be carried in any revolver of similar caliber.

Hammerless, with side ejection. Automatic grip safety prevents firing unless handle is grasped and trigger pulled. Permits carrying full cocked with similar safety.

Thumb-operated safety lever adds safety when pistol is laid away or carried. Also serves as an indicator, it and grip safety both showing whether or not hammer is cocked.

Magazine-removal automatic safety rear lock prevents firing if a cartridge is left in chamber when magazine is removed.

Breech remains positively locked until bullet has left the muzzle—not a blow-back action. Positive prevention of shellhead blowouts and breech escape of powder gas.

Each time trigger is pulled, fires one shot, automatically ejects empty shell, and reloads ready to fire. Accuracy and stopping power above police requirements. Especially designed for quick straight shooting—the first self-aiming pistol.

HARRINGTON & RICHARDSON AUTOMATIC PISTOL

No. 32H—.32 caliber, hammerless, 8 shots, 3½ in. barrel, length over all 6½ in., blued finish, w't 22 oz., each $27.00

Extra Magazines, for No. 32H, 32 cal. ....each $1.70

Use 32 cal. automatic smokeless cartridges.

ONE IN A BOX

Simplicity of construction, strength and reliability of mechanism, coil or spiral springs throughout reduce liability of breakage to a minimum.

Three safety devices are provided, one operated by the thumb of right hand and two are entirely automatic, thus insuring absolute safety in handling and carrying.

When the safety lever is in the down or normal position the word "Safe" is visible and the pistol cannot be discharged. By throwing the lever up with thumb the "Safe" is obscured and the pistol is ready for instant use.

The handle must be firmly grasped, compressing the grip safety, when the trigger is pulled to discharge the arm.

The grip safety positively locks the sear and the firing pin cannot be released until the grip safety is pressed in. It is impossible to fire the pistol by a jar of any kind.

The third safety, operated by the magazine, makes discharge impossible when the magazine is removed from the pistol. In all automatic pistols the hammer or firing pin is cocked after first shot has been fired and three is always a cartridge in the chamber until the last cartridge contained has been shot. In this pistol the possibility of unintentional discharge after removal of magazine is eliminated.

COLT REVOLVERS

POCKET POSITIVE, double action, jointless frame, simultaneous ejection, positive lock, center fire, rubber stock.

THREE IN A CRATE. WE DO NOT BREAK CRATES

BUSTER BRONCO

No. T14—Is the rugged little brother to Bobby Bronco, and is identical in all respects except size. Extreme length 24 in., width 12 in., and seat height adjustable to 10½-13 in. For children 2 to 3 years, w't 5 lbs., each $4.20
Attractively Painted in Colors.
THREE IN A CRATE. WE DO NOT BREAK CRATES

REVO-NOC GUARANTEED SPARK PLUGS

In the REVO-NOC line of spark plugs we are offering to the automobile owner a "Guaranteed Product." The special design and construction features which make this guarantee possible assures the motorist of the continuous dependable service necessary to motor efficiency.

Construction Features.

Reinforced center electrode and multiple point construction of REVO-NOC plugs insure long life and a sure, steady spark. Loose assembly of center stem is another feature.

REVO-NOC porcelains are turned, not moulded, insuring against even the slightest variation and carry a heavy REVO-NOC brown glaze which seals against porosity and resulting oil seepage.

A Type for Every Motor

If complete combustion is to be obtained the spark must be delivered into the heart of the gas mixture—and this is impossible unless the proper type of spark plug is used. Few motorists realize the importance of this fact, which is the basic cause of decreased or increased gasoline mileage.

There is a REVO-NOC spark plug made especially for your motor—a guaranteed product of high merit.

DEALER'S DISPLAY CABINET OUTFIT

The outfit complete consists of—
7 Steel Display Cabinet lithographed in three colors.
1 Metal Sign lithographed in three colors (size 10x14).
150 Descriptive circulars.
50 Size Lists showing correct spark plug sizes.
100 REVO-NOC Spark Plugs in the following assortment—
48—**No. 5246**—½ in. Stan. 24—**No. 5247**—⅝in. S. A. E.
18—**No. 5248**—⅞ in. Exten. 10—**No. 5250**—¼ in. Long

No. T5245—Outfit complete ..... each **$58.00**

An Effective Merchandising Plan

The assortment idea consists of considerably more than the mere placing of REVO-NOC spark plugs on dealer's counter. It is in fact, a complete merchandising plan, offering in its entirety the three prime essentials which govern the marketability of any line:—

First—Attractive and forceful display.
Second—Effective consumer advertising literature.
Third—A product which actually carries the quality and serviceability claimed.

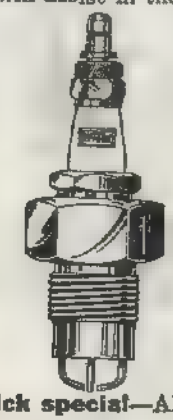
This Assortment fully covers all these essentials—providing not only for the convenience of dealer in the display and handling, but also a direct plan of co-operation which will assist in the sale of a heavy volume of spark plugs.

Special for Ford—Also recommended for Overland and Studebaker pleasure and commercial cars. Reo takes this thread with extension, w't per doz. 3½ lbs.

No. 5246—½ in. standard thread,
per box of 12 **$8.40**

Recommended for Cadillac, Chalmers, Hudson, Marmon, Maxwell, Packard, Paige and other cars requiring ⅝ in. S. A. E. threading, w't per doz. 3½ lbs.

No. 5247—⅝ in. S. A. E., box of 12 **$8.40**



Buick special—Also recommended for cars requiring deep penetration, such as Olds, Interstate, etc., w't per doz. 3½ lbs.

No. 5248—⅞ in. extension,
per box of 12 **$8.40**

Special type for use in cars with deep port or sleeve valve motors, such as Willys-Knight, w't per doz. 3½ lbs.

No. 5250—¼ in. long body,
per box of 12 **$8.40**

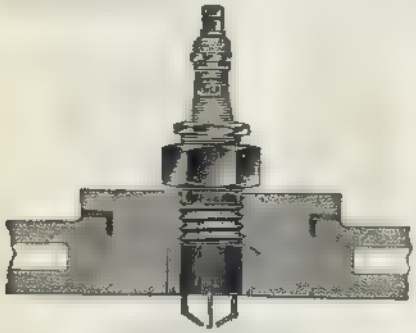
No. 5249—¼ in. long thread special for Dodge.
per box of 12 **$8.40**

Porcelains for all REVO-NOC plugs complete with center stems and gaskets, w't per doz. 1 lb.

No. 52—Assembled Porcelains only,
per box of 12 **$4.50**

POSITION OF SPARK PLUG IN CYLINDER

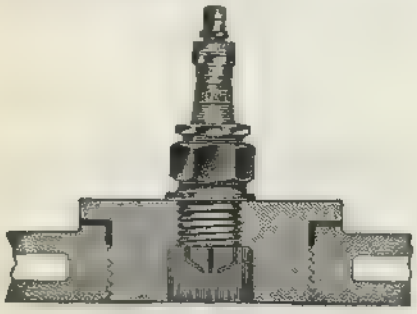
The correct position of the spark plug electrodes within the cylinder is an important item and the successful operation of an engine depends to a great extent upon the correct fitting of a spark plug.



RIGHT WAY

This illustration shows the correct position of the firing points of the plug in position in the cylinder.

The best results are obtained when the firing points are surrounded by the fresh gaseous mixture.



WRONG WAY

This illustration shows the improper fitting of a plug in the cylinder.

The recess between the firing points and the top of cylinder forms a pocket for burnt gas and permits carbon to accumulate rapidly, causing the plug to misfire.

Excessive oil in the combustion chamber, or too rich mixtures of gasoline will cause any spark plug to become fouled or short-circuited by carbon deposits. Unless you remove the cause of the trouble by giving proper attention to engine valves, pistons, rings, lubrication, carburetor adjustment, etc., cleaning will give you temporary relief.

It is also necessary to make any spark plug function perfectly to see that the gap between the electrodes (where the spark jumps) is kept adjusted to .020 to .032 inch. The requirements of any particular engine may vary—you may have to experiment to find just the right setting. When you have found it, keep your plugs always adjusted.

HERCULES JUNIOR SPARK PLUGS AND PORCELAINS

The HERCULES Junior also carries loose-assembled center stem; is manufactured from best of materials; compression tight; will not carbonize or foul; needs no atention after installation; built along scientific principles, both electrically and mechanically, by one of the oldest manufacturers of plugs.

Guaranteed by factory for TWO YEARS continuous service.

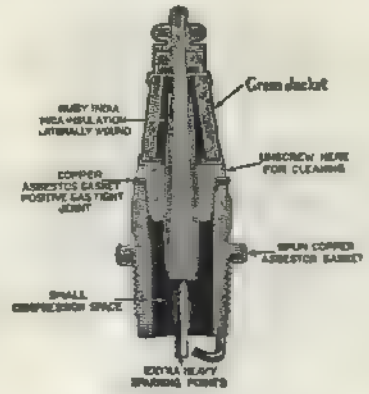
No. 5322—Jr., ½ in. plugs for Fords, w't per doz. 3½ lbs., per box of 12 ..$8.40

No. 5325A—Porcelains completely assembled, for all Hercules Jr., per box of 12 .....$4.00

SPLITDORF SPARK PLUGS

Ruby India Mica is used exclusively as insulation. Unlike porcelain, Ruby Mica is unaffected by heat, fibrous and tough, unbreakable and cannot slip or crack.

After the mica has been laterally wound around the electrode, it is forced into bushing so tightly that windings become, in effect, a solid mass, proof against oil and compression leakage—bushing then screwed into base with a copper asbestos gasket between. The same kind of gasket is used under base when screwed into cylinder.



No. 5272A—P179, ½ in. Ford Special w't per doz. 4 lbs., per box of 10 .....$10.00

No. 5273—P163, ⅝ in. S. A. E., w't per doz. 4 lbs. ....per box of 10 $11.60

No. 5273A—P165, ½ in. long, w't per doz. 4 lbs. ....per box of 10 $11.60

No. 5275—P126, motorcycle, metric, w't per doz. 4 lbs., per box of 10 .....$11.60

No. 5276—P785, ½ in. S. A. E. long body, w't per doz. 4 lbs., per box of 10 .....$11.60

No. 5277—P784, ½ in. long, Buick, w't doz. 4 lbs. .. per box of 10 $11.60

PORTABLE GARAGE JACKS

Excel

Made of high grade semi-steel; drop forgings; all wearing parts case hardened steel. Wide, heavy base, fitted with rollers for easy handling. Can be adjusted immediately to any part of frame or chassis. Equipped with toe extension 4½ inches from the ground, which permits getting under a broken axle.

NO.	Capacity	Lift	Leverage	Wt. Lbs.	EACH
20E	3000 lbs.	10½ to 24½ in.	60 in.	48 lbs.	$36.00

Toe Extension Lift, 4½ to 15 in.

Simplicity

This is one of the most practical, least complicated, and quickest acting garage jacks on the market. One downward push on the handle and the wheel is up in the air, ready for work. The car is held absolutely rigid. Jack cannot tip over, nor can car get away. There are three adjustments for height.

NO.	Capacity	Lift	Leverage	Wt. Each	EACH
6003	3000 lb.	5 in.	60 in.	30 lb.	$15.00

Rex

A scientifically designed, high powered Jack—quick in action—strong and heavily constructed—absolutely safe in operation—built without springs, cogs or ratchets. This jack rests firmly on a four-wheel suspension—no tipping or swaying of the car when raised

It wheels easily into position, no parts to drag. Positive in its action. It automatically locks in any lifted position. Just wheel it under the car and pull the lever. To lower it, grasp the handle and lift the lever.

Successfully operates under any part of the chassis of any car. Constructed of high grade, heat treated steel and malleable. Every part is designed to insure long life under hard usage. Wheel base 12 in., width, 5 in.

NO.	Collapsed Hgt.	Lifted Hgt.	Wt. Each	EACH
25R	5 in.	20½ in.	47 lb	$25.00

Marion

This Jack will not topple over or allow automobile to slip during the time it is being operated. Can positively be used under any make of automobile irrespective of the overhanging obstructions on a car such as large differentials, gasoline tanks, tire racks or bumpers. Made of malleable iron and steel. Strong and durable.

NO.	Capacity	Wt. Each	EACH
50M	50001b.	100 lb.	$32.00

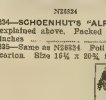
Complete with little spring gun, and cartridge belt holding eight small wooden cartridges. Size 12 x 18½ inches 1.50

Schoenhut's Alphi Blocks

In shape, the Blocks present the semblance of human figures; they are made of hard wood, 6 inches high, 2¼ inches wide, and about ⅞ of an inch in thickness. Covered on both sides by artistic designs, reproduced in seven colors. No two designs being the same. Children are depicted on one side and animals on the other. One letter of the alphabet appears on each side of each block, so arranged that when the twenty-six blocks are set up from A to Z on the Children side, they will appear upon the opposite, or Animal side, Z to A. This arrangement gives an opportunity to spell half sets, or sets of thirteen blocks and still give a complete set of Alphabet.



N25534

N25535

Per doz.

N26634—**SCHOENHUT'S "ALPHI" BLOCKS**—Half-set, or thirteen blocks—as explained above. Packed in strong wooden-frame carton. Size 12 x 16½ inches 3.30

If It's SALES You Want

-Read This!

Merchandise that moves *out* of your store means money that moves *in*. Stovoil never lingers—dealer's shelves know it only for short intervals. *It* sells and sells and *sells!*

Why?

Because it is the only preparation in existence that successfully fights rust; because women everywhere know that for cleaning, polishing and removing rust from stoves and other metal surfaces it is a quick, sure worker; because over 90% of the operating gas companies use and recommend it; because it has been officially approved by every domestic science laboratory to whom it has been submitted; because it is well advertised in the leading women's magazines; because *it makes good on every claim made for it.*

Learn more about Stovoil. Know its profit possibilities for you. Dealers the country over have *proved* that Stovoil is one of those products that is made right, priced right, and sold right. Make us *prove* it to you—N-O-W!

EASIER IRONING

Less Time—Less Work and Less Expense

Royal

Self-Heating Iron

To iron with the old stove-heated irons is hot, tiresome, time-wasting work. Profit by offering your women customers the Royal Self-Heating Iron. It does an average ironing for less than two cents and can be used anywhere—in the coolest room, on the porch, or out under the trees.

The Royal further pleases because it is the right size and weight for easy ironing and because the heat can be regulated to suit all requirements. Every Royal fully guaranteed.

Selling Helps Free to Dealers

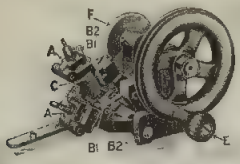
"OUTS" are beginning to appear even in our immense stocks due to the avalanche of orders we are getting in each day's mail. You will help us and help yourself if you tell us in case any item is out to send the nearest like it.

KEY CUTTING MACHINES

RUSSWIN



The Russwin key cutting machine will cut duplicates of all makes of pin tumbler cylinder, flat, double bit, solid and hollow ground keys by changing the cutter and gauge accordingly.

It is the only machine that will do this without complicated changes or adjustments and possible loss of accuracy.

Equipped with two types of cutters, one milling cutter (F) and gauge for cutting pin tumbler keys and two cutting saws and gauges for all other types of keys.

The hinged vice (A,A) holds both original key and blank to be duplicated in rigid and correct position; a shelf on the vice supports the bow on the cylinder key. On each vice there is a hinged stop which screws both as a top shoulder stop (B1) and a setting stop (B2); the shoulder is indispensible when cutting cylinder keys, all cutting from the original cylinder key should be started from the top shoulder. Stop (B1) insures accurate reproduction of the original key; the setting stop (B2) gives the correct distance from the cutter to the gauge (C) by resting the shoulder of one stop (B2) against the cutter and the shoulder of the other stop (B2) against the gauge (C).

Two gauges (CC) one for cylinder and one for other types of keys are furnished with this machine. After the original key and the blank to be cut are placed in position, raise lever (D) with the left hand, turning handle (E) until cutter engages and cuts into blank to be duplicated. Equipped with .035 and .062 inch saws.

Operates by hand or if desired by motor.

	Each
No. 50—Complete with saw and two cutters	+$92 25
Extra milling cutters	+ 16 20
Extra cutting saws	+ 4 50

One in a wood box; weight each 12 lbs.

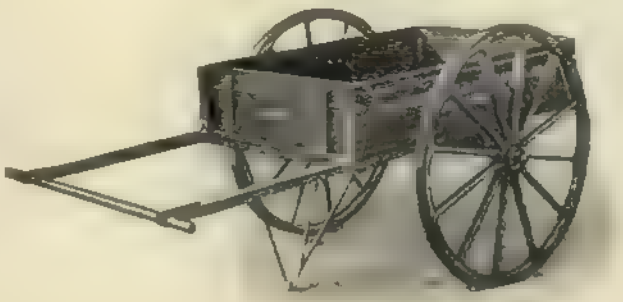
SINGLE HANDLE TRUCKS

All Iron

Will handle a keg of nails or a large barrel. Handle is ⅞ inch round, extending down and forms a nose

No. C3100. Length of handle 44 inches, width at nose 13½ inches; width over all 26 inches, wheels 7½x2 inches; axle 1⅛ inches; weight 40 pounds.....each, **$15.00**

HAND CARTS



Hardwood box and handle, top of box strapped; wood wheels, with steel tires, 2½ inch wheel in foot; nicely painted, striped and varnished; removable ends.

No. 262. Box 44x27¼x8 inches; wheels 36x1½ inches; tread 36⅞ inches; length over all 76¼ inches; weight 142 pounds.. . . . . each, $.

*Not carried in stock; will ship from factory.

SCHEBLER CARBURETORS

The MODEL "L" Carburetor is designed for high speed motors, where low throttling, rapid acceleration, maximum power and speed are required. The lift needle type carburetor is designed so that the amount of fuel entering the motor is automatically controlled by means of a raised needle working automatically with the throttle. The supply of gasoline can be adjusted for low, intermediate and high speed, each adjustment being independent and not affecting either of the others. The model "L" is furnished with a jacket around the throttle, which can be connected with the hot water when a circulating pump is used, and a bend for taking warm air from around the exhaust manifold into initial air opening of the carburetor, by means of the hot air drum and tubing.

Model "L"

No.	Model	Size, in.	W't each, lbs.	Each.

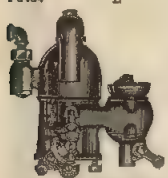
F5433	"L"	1¼	7½	*26.00★*
F5434	"L"	1½	8½	*31.50★*



Model "L"—Dash Control.

The MODEL "L" Carburetor is manufactured with a dash control air valve, it being operated by a lever which is controlled by a switch on the dashboard or steering post of the car. A dashboard or steering column adjuster will be furnished with these carburetors when so ordered. Complete with dash or steering column control, hot air drum and tubing.

NOTE—In Ordering Repair Parts for Carburetors Always State Size.

The MODEL "R" Carburetor is for use on both four and six-cylinder motors. It is a single jet raised needle type of carburetor, automatic in action. The air valve controls the lift of the needle and automatically proportions the amount of gasoline and air at all speeds. This carburetor is designed with an adjustment for low speed; as the speed of the motor increases, the air valve opens, raising the gasoline needle and automatically increasing the amount of fuel. There are two adjustments, the low speed needle adjustment, which is made by turning the air valve cap, and an adjustment on the air valve spring for changing its tension. An eccentric operated either from the steering column or from the dash, which acts on the needle valve and insures easy starting. By raising the needle from the seat in this way, an extremely rich mixture is furnished for starting, and for heating up the motor in cold weather. A choker in the air bend is also furnished.

Model "R"

No.	Model	Size, in.	W't, lbs.	Carburetor only	With Dash Control, Hot-Air Drum and Tubing
F5443	"R"	1	6¾	*$27.20★*	*32.70★*

F5445	"R"	1½	7¾	*31.50★*	*37.00★*

AIR VALVE CONTROLS

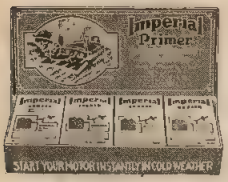
The Dashboard Controls for the air control of the carburetor should be attached in some convenient place on the dashboard of the car. The steering column control should be installed on the steering post. In making these installations it is sometimes necessary to use a bell crank to take care of some offset in the line of connection. As the steering column control is made with different sized bands for attaching, the circumference of the steering post should be given. The steering column control is furnished standard with five feet of tubing and wire. Both types of dashboard controls are furnished standard with three feet of tubing and wire.

No. F5451—Extra controls, w't complete 2 lbs., each ..... *$4.20★*

Specify Type Desired.

★ **Items Marked Thus ★ Are Shipped from Factory Only.**

IMPERIAL PRIMERS



Every outfit is equipped with a self closing Plunger Pump. To draw up the gas, simply pull out the plunger and then release it. The plunger pump does the priming and shutting off.

Starting the car in cold weather in most cases is difficult. The gas must be lifted from the line and placed in a vaporized form at intake valves, so the first flash of the spark plugs ignites it and starts the motor. This Self Closing Primer will do this.

It is not necessary to readjust your carburetor in cold weather. The same running mixture employed in the summer can be used and will supply a rich, fireable, vaporized spray of gasoline for starting. Not necessary to use the choker. Installing instructions included in each outfit.

No. 6087—59D—For Fords, w't each 7 lb. .....each $6.00

No. 6088—58D—For all cars except Fords, w't each 2 lbs., each $7.10

IMPERIAL PRIMER DISPLAY CASE

Put up in a very attractive case.

It is only necessary to handle two styles of primers as they will take care of all cars. Primers are a necessity in the cold weather.

This display case contains:

2 No. 6087 Primers for Fords

2 No. 6088 Primers for all cars except fords

No. F6089—W't each 6½ lbs., each★ $26.20

ONE IN A BOX

STEWART VACUUM SYSTEMS

This System assures an even and perfect feed of gasoline to carburetor. It is small tank under hood on dash or motor and connected to intake manifolds, carburetor and gasoline supply reservoir. The motors suction through manifold drains gasoline from reservoir on rear to small vacuum tank, from which gasoline falls in a positive, smooth flow to carburetor.

Eliminates feed troubles common to other systems. Over the steepest grades and roughest roads it maintains a perfect feed of gasoline.

Standard equipment on ninety-five per cent of all cars. Can be quickly and easily installed on any make of car or truck. W't each 6 lbs.

No. F6841—116—For small cars, such as Dodge and Chevrolet. Reserve capacity, 1.82 pints, each★ $18.00

No. F6842—122—For cars similar in size to Buick. Reserve capacity, 2.12 pints,★ .....each $18.60

Other models for passenger cars

No. F6843—113—Reserve capacity, 2.67 pints,★ .....each $18 00

No. F6844—127—Reserve capacity, 4.19 pints,★ .....each $18.60

Heavy Duty

For motor trucks, has a larger capacity than that of type for passenger cars. Built in two sizes three and three-fourths pints, and five pints.

The Heavy Duty System has also quicker filling and empting facilities, due to Venturi type air valve and double flapper outlet valve. This model will respond to the heaviest truck demands.

Also built for service on tractors, large stationary engines, motor boats, etc. A perfect automatic gasoline feed, w't each 7½ lbs.

No. F6845—138—Reserve capacity, 5.25 pints,★ .....each $19.34

No. F6846—147—Reserve capacity, 4.41 pints,★ .....each $22.68

STROP AND STROPPERS
EVER-READY—AUTOMATIC

Strops automatically, precisely and efficiently.

Merely insert the blade in its position—pass the device up and down the strop several times and the edge of the blade is renewed.

Made of brass, heavily nickel plated, without springs or delicate parts to get out of order. Genuine horsehide leather strop. Per Doz.

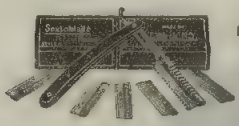
No. 1ERS—Length of strop 14 ins.; width 1¼ ins. $36 00

One in a cardboard box; wt. per doz., about 5 lbs.

SAFETY RAZORS
SEXTOBLADE

The Sextoblade razor combines the virtues of a regular razor with those of a perfect "Safety Razor". It is modeled after the standard razor, both in shape and balance, and can instantly be used as a regular razor if desired. The natural diagonal stroke, the ease and convenience of stropping, the quick simple replacement of blade are a few of the advantages to the Sextoblade.

Style A.

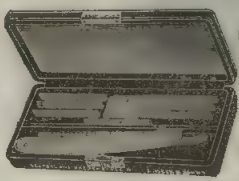


Each

No. A—Complete with black handled razor including 6 blades; put up in a plain leatherette covered box in a sealed carton $3 00 6 00

Weight each about 6 ozs.

Style B.



Each

No. B—A seven day outfit, complete with white handled razor and 7 blades; put up in a neat leather covered plush and satin lined case in a sealed carton $4 00 7 95

Weight each about 9 ozs.

Style C.

Each

No. C—Complete with white handled razor and 7 blades; put up in a soft leather folding case, plush lined; in a sealed box $4 50 9 00

Weight each about 6 ozs.

Style D.

Each

No. D—Traveling outfit complete with white handled razor and 9 blades, and collapsible shaving brush and soap in nickel plated container; put up in a leather covered case, plush and satin lined; in a sealed box $6 50 13 05

Weight each about 10 ozs.

RAZOR STROPS
SEXTOBLADE, CUSHION

Each

No. 209—Size 10¼x1¾ inches; with polished wood handle; each in leatherette scabbard; especially intended for Sextoblade blades $1 00 2 01

Half dozen in a cardboard box; weight each ¼ lb.

SAFETY RAZOR BLADES
FOR SEXTOBLADE SAFETY RAZORS

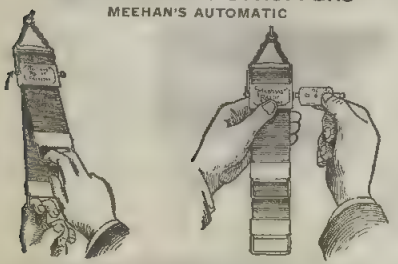
SAFETY RAZOR BLADES
FOR ENDERS SAFETY RAZORS

	Per Package of 5 blades
No. 5E	$0 69

Twenty packages in a carton.

SAFETY RAZOR STROPPERS
MEEHAN'S AUTOMATIC



Strops and sharpens Junn Premote, Durham Duplex, Gillette Military, Enders, O. V. B. and Keen Kutter, and in fact all wafer safety razor blades.

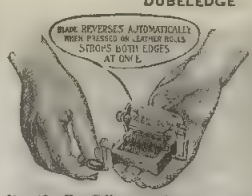
Strop made of black cotton webbing, especially woven for sharpening safety razor blades. All metal parts solid brass, nickel plated. Sharpens both sides at the same time.

Chain and ring hanger, removable metal hand hooks on either end of strop, special holders for the different styles of blades with each strop.

	Each	Per Doz.
No. 1M—Length of strop 16 in.; width 2¼ in	$3 00	31 50

One in a cardboard box; weight per dozen 5½ lbs.

SAFETY RAZOR STROPPERS
DUBELEDGE



A small, compact, heavily nickel plated and easily operated stropper. The sharpening rollers are wound spirally with a strip of horse-hide, sharpening the blade with a diagonal stroke. Blade reverses automatically sharpening edges without removing the blade from the machine.

	Per Dozen
No. 4G—For Gillette blades	$49 50
No. 6DD—For Durham Duplex blades	60 00
No. 5EG—For Ever Ready or Gem Junior blades	49 50

One in a cardboard box; wt. per doz. 4 lbs.

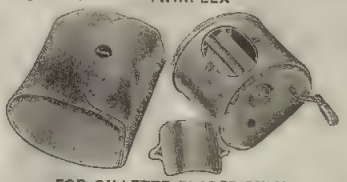
ZIG ZAG AUTOMATIC STROPPER

Stropper equipped for sharpening all standard safety razor blades. Highest grade of leather, suitable for this purpose, used. Metal handle, roughened grip. Cutting of strop impossible, as the slightest change of stroke reverses the blade holder. The curve in the strop gives a barber's stroke. Every stropper guaranteed.

	Per Doz.
No. 1ZZ—Length of strop, 14 in.	$49 50

One in a carton, half dozen in a display box; wt. per doz. 4 lbs.

TWINPLEX



FOR GILLETTE BLADES ONLY

Nickel plated case, 2¾x2¾x1⅛ in.; disappearing handle.

Quick and positive in action. Strops both edges at once, reverses itself and strops other side. The blade is easily inserted and released. The disappearing handle is a clever improvement which considerably reduces the size of the Twinplex.

Metal Nickel Plated Case, Satin Lined.

No.	G200
In less than 1 dozen lots, Each	$11 40
In 1 dozen lots, Each	10 80
In 2 dozen lots, Each	9 20

ONE-SIXTH DOZEN IN A CARTON

SHERWOOD BABY GRAND COASTERS

Designed especially for the little folks, too small for the speedy [illegible] Spring Coaster. Low build for safety, strength with lightness, and adaptability to the many uses the childish imagination can devise for it, are the main features of this little wagon. Body and handle natural varnish, running gear red. Size of body 9×18 inches, wheels 5 inches. Height set up 8½ inches.

No. N18—Without Rubber Tires, w't per doz. 106 lbs., per dozen $38.40

SMITH'S DOCK COMPANY, LIMITED.

THOMAS & WILLIAM SMITH, LIMITED. — **ESTABLISHED 1756.** *Maison fondée en 1756.* Casa establecida en 1756.

H. S. EDWARDS & SONS. :: :: :: — **ESTABLISHED 1773.** *Maison fondée en 1773* Casa establecida en 1773.

EDWARDS BROTHERS. :: :: :: :: — **ESTABLISHED 1892.** *Maison fondée en 1892.* Casa establecida en 1892.

The original Firm of Thomas & William Smith was established at St. Peters in the year 1756, where wooden shipbuilding and repairing was carried on. The present Firm of Smith's Dock Co., Ltd., is an amalgamation which took place in 1899 of the Firm of Thomas & William Smith with the old established Firms of H. S. Edwards & Sons and Edwards Bros. Members of both families are still on the Board of Smith's Dock Co., Limited.

Les débuts de la Maison remontent à la fondation de la maison Thomas & William Smith, qui s'établirent à St. Pierre en 1756, et qui entreprirent la construction et les réparations de navires en bois. La Maison actuelle Smith's Dock Co., Ltd., provient de la fusion accomplie en 1899, de la firme fondatrice, avec la vieille maison H. S. Edwards & Sons et la maison Edwards Bros. Le conseil d'administration de la maison Smith's Dock Co., Ltd., comprend encore des membres de ces deux familles.

La Casa original de Tomás y Guillermo Smith fue establecida á St Peters en 1756, donde se realizaba la construccion y reparación de buques de madera.

La Casa actual de Smith's Dock Company, Limited, resulta de una fusión verificada en 1899 de la casa de Tomás y Guillermo Smith con las acreditadas casas de H. S. Edwards & Sons y Edwards Bros. El consejo de administración de Smith's Dock Company Limited, todavía comprende miembros de las dos familias.

Dimensiones: [illegible] Estos buques [illegible] dos calderas multitubulares con hogares á una cabeza.

Admiral SIMS says:

"I have pleasure in quoting for your information the following letter from Rear-Admiral Hugh Rodman, U.S. Navy. 'The work carried out on battleships under my command by Smith's Dock Company, Ltd., of South Shields, has been most satisfactory in all respects to me and to the Commanding Officers of the Vessels concerned. In every case the work was promptly taken in hand and efficiently and expeditiously carried on to completion.'"

Many telegrams and letters of appreciation have also been received from the British Board of Admiralty

L'amiral SIMS déclare :

"J'ai le plaisir de vous communiquer le passage suivant d'une lettre que m'adresse le [illegible] Amiral Hugh Rodman de la Marine de Guerre des Etats-Unis d'Amérique : 'Les travaux confiés à la Maison Smith's Dock Company, Ltd., à effectuer à des navires de guerre de l'escadre sous mon commandement, ont été exécutés de la manière la plus satisfaisante sous tous les rapports, aussi bien à mon propre point de vue, qu'à celui des officiers commandant les navires en question. En chaque occasion, les travaux ont été entrepris et menés à bien avec la plus grande promptitude et de façon irréprochable'".
